Dear Ms. Murray:

I would like to present to the Site Evaluation Committee my thoughts concerning the Wind Farm Proposal for Antrim, N.H. by Eolian and Antrim Wind Energy.

In 1973-1974 I built a home in Antrim and have resided here ever since. My relatives have been in Antrim from the early 1900's on.

The Antrim landscape is important to me in several ways, including the use of some of it for sources of electrical power. In my opinion we would do well to avoid increasing nuclear power plants and those that burn fossil or other polluting fuels.

Also, it is my belief that the vast majority of Antrim citizens do not go along with the irresponsible actions of an overly vocal minority seemingly supporting the protests against wind power by one couple.

over → 2.

wind power cont'd –

When people consider possible options for providing electrical power in our region I think wind power tops the list as being the safest, least polluting, and kindest to all flora and fauna in Antrim, N.H.

Sincerely,

Liz Robertson
