**Re: Application of Tennessee Gas Pipeline Co.**

Dear Mr. Pfundstein:

I have taken the liberty of reviewing my notes from the Concord site visit, the Concord public information hearing, the Pelham site visit and the Pelham public information hearing. I have noted that your client was requested to provide the following items by various members of the Committee during the course of these proceedings. I would ask that you consider these items as requests for additional information and/or data requests from the Committee:

1. Copies of a written filing and/or copies of the various deeds demonstrating ownership of the land and buildings at the Laconia Meter Station in Concord, New Hampshire.
2. A diagram, schematic or other description of public water availability and/or fire hydrants available at the Concord meter station.
3. A written explanation of the manner in which LNG would be used to alleviate any loss of service associated with construction of the proposed project.
4. A written explanation of the battery back-up process for power in the event of an electrical power outage.
5. An explanation of who the regular operations people who would be responsible for the Concord facility are, and how far they are from the facility.
6. With respect to the Concord station, please provide a measurement of the distance from the meter station to the nearest residence.

Donald J. Pfundstein, Esq.

7. A written description of the local emergency response training provided to local authorities, as well as a normal operating procedure offered for local responder training.

8. Please submit one copy of the power point utilized at the Pelham meeting.

9. Please provide one copy of all of the slides contained in the aforementioned power point for the record.

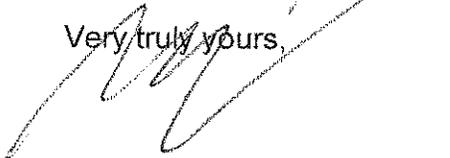

10. A written explanation of the criteria to be used for hiring a sound expert to conduct sound testing within 30 days after the compressor station is in service.

11. Please provide an updated alteration of terrain plan. It is believed that the alteration of terrain plan used during the site visit in Pelham was a newer version.

This letter contains the list of materials that my notes reflect were requested by the Committee during the course of the public informational proceedings. Of course, we will have a transcript within a couple of weeks and we can compare these requests with the transcript to see if there were any that I missed. Nonetheless, I would suggest that it would be appropriate to start accumulating the information which is described in this letter and if there was additional information requested, we will follow up after receipt of the transcript.

Should you have any questions, please feel free to call me.

Very truly yours,

Michael J. Iacopino
