

7/28/2010

Dear; Mrs./Ms. Jane Murray

My name is Richard Mattos from 700 Lancaster Street, Berlin, NH 03570. I usually don't get involved in to many things, since I like most people have busy schedules.

However I am writing this letter in Total Opposition to the Proposed Laidlaw Bio Plant being constructed in Berlin.

With all the Green energy that could be produced such as Wind turbines, Solar, and of course the Berlin Landfill that Burns methane into the air at the moment (Which could be easily transferred to produce electricity to power approx 1500-2000 Homes).

I find that the Proposal from Laidlaw is Extremely ill planned and wasteful! For everyone involved except them of course who would be profiting from this.

I like most of the Berlin residents are against this, however I am actually taking a moment to express my concerns.

I don't feel that the proposed Bio plant is at all in the City nor the Berlin Residents best interest and I feel it should not be built.

Like I said earlier in this letter there are numerous GREEN energy producing alternatives that could be used instead of this.

Thanks you for your time.

Sincerely,

A handwritten signature in black ink, appearing to read 'Richard Mattos', with a long horizontal flourish extending to the right.
