Re: Groton Wind – SEC Docket – 2010-01

Dear Sir,

As residents of Groton we support of the Groton Wind Project. We moved to New Hampshire from Maryland four years ago and built an a five star rated Energy Star home because we believe that we are all responsible for saving and maintaining our environment. One way to do this is to decrease our use of fossil fuels and wind power is definitely a step in that direction. We realize that there are a few issues regarding this project, the main one as we see it is a bond/guarantee for Iberdrola to pay for the decommissioning of the wind turbines at the end of their usefulness. If this issue can be resolved we totally support this project.

Respectfully,

Celine Richer
