Site evaluation committee
Thomas s. burack

I would like to be recognized as a intervenor on the groton wind project, docket no. 2010-01.

I have concerns on the following items

1. the health effects on my family.
2. the health effects on my farm animals.
3. the blasting of ledge and the effects on my water supply for both chemicals and the loss of my spring water.
4. the loss of my land value.
5. the large amount of traffic that will occur, and the small road r.o.w. for the large, heavy, and oversize trucks. also the road closing due to the oversize trucks.
6. this project will definitely have a negative effect on my family due to the loss of peace and quiet both short and long term.

Thank you,
Carl s. spring
