RE: Groton Wind, SEC Docket No. 2010-01

The Groton Board of Selectmen would like to express its support for the application of Groton Wind LLC for a Certificate for Site and Facility. After a thorough, careful review adequately addressing the relevant issues, we would urge the Site Evaluation Committee to approve this project. This proposed project has been well received and supported by the vast majority of townspeople expressing an opinion, as well as by Select Board itself. To date we have been involved in extensive, good faith negotiations with Groton Wind LLC/Iberdrola Renewables through its representative, Mr. Edward Cherian, in attempts to execute an agreement addressing a host of issues to include construction, operation and decommissioning. Though as of this writing this agreement has not yet been finalized, its future adoption is expected. Groton Wind LLC/Iberdrola Renewables' proactive efforts to engage and inform both Town government and the townspeople regarding this project have been appropriate, educational and refreshing. In addition, we recognize the benefits of clean, renewal energy in reducing our dependence on fossil fuels and enhancing our environment. This project also promises to greatly expand our small Town's tax base, which is expected to reduce the financial burden on its citizens and taxpayers. Thank you for your efforts and consideration of our concerns.

Respectfully,

The Groton Board of Selectmen:

Miles Sinclair (Chairman)

Kyle Andrews

Christina McClay
