RE: Groton Wind Project, RPR #1422
Survey clarification for 91 Groton Road, Hebron and 12 Smith Bridge Road, Plymouth

Dear Ms. Luhman;

The NH Division of Historical Resources (DHR) received additional information regarding 91 Groton Road, Hebron and 12 Smith Bridge Road, Plymouth from your office. The DHR requested individual survey of both properties in our letter dated, February 1, 2011.

The additional information provided photographs and a brief description as to why the above two properties did not warrant additional survey. It was noted that 91 Groton Road had been heavily altered during the modern period and no longer retained architectural integrity. Based on the information provided, the DHR agrees with this recommendation and 91 Groton Road no longer needs to be surveyed for the Groton Wind project.

Additional photographs were also submitted for 12 Smith Bridge Road, Plymouth with a brief discussion noting that the setting had been largely altered at this property. It was difficult for DHR staff to get a sense of this change based on the information provided. Therefore, the DHR requests that 12 Smith Bridge Road, Plymouth be surveyed individually.

We look forward to reviewing the survey forms for the Groton Wind project. Please contact Nadine Peterson at 271-6628 or Nadine.Peterson@dcr.nh.gov if you have questions regarding Section 106 review and Mary Kate Ryan at 271-6435 or MaryKate.Ryan@dcr.nh.gov if you have questions regarding survey requirements.

Sincerely,

Nadine Peterson
