29 Hazen Drive  
PO Box 95  
Concord, NH 03301

***Re: Letter from Senator Forrester and Representative Smith***

Dear Ms. Murray:

This responds to the concerns expressed in the December 12, 2013 letter from Senator Jeanie Forrester and Representative Suzanne Smith to you.

Please be assured that Iberdrola Renewables and Groton Wind, LLC are actively and diligently working to resolve all outstanding questions pertaining to the operation of our Groton Wind Project, including but not limited to direct conversations with parties who have raised the questions reflected in the Dec. 12 letter. However, we strongly maintain that Groton Wind is operating safely, and is led and operated by well-trained personnel.

Iberdrola Renewables is proud of our strong focus on fire prevention, as the safety of our staff, contractors and the community is always the first priority at our 60 energy facilities around the country. Our regular Internal assessments, controls, procedures, training and use of qualified personnel, plus our close coordination with local fire departments and other emergency responders allows us to maintain high safety standards at all of our facilities. This management framework governs how we work every day at every facility to ensure that we meet and exceed applicable safety requirements. To call into question our capabilities in such a manner overlooks our extensive track record, wide-ranging experience, and protocols already in place, in New Hampshire and beyond.

We are certainly open to any discussion concerning new technology or improving industry best-practices. We remain committed to trying to reach an amicable solution with all parties who have raised issues concerning Groton Wind.

Iberdrola Renewables, LLC
