

Delta Power Services Regional Management

NERC Compliance Officer & Eastern Region

Pete Sessler, NERC Compliance Officer & Eastern Region Manager, Delta Power Services

Mr. Sessler has 28 years experience in the power generation industry focusing on management, operations maintenance and systems management. Pete began his career in power plant operations and maintenance with Pennsylvania Power & Light (PP&L), honing his coal technology O&M skills with increasing responsibility positions within the PP&L utility group. He later became a Supervisor of Peaking Power where he had responsibility for the operations and maintenance of 25 combustion turbines with PP&L. As Power House Utilities Maintenance Manager at Hess Oil Virgin Islands Refinery, Pete was responsible for the maintenance and repair of turbines, boilers and the desalination plant at the refinery. Prior to moving to DPS, he was Plant Manager at two (2) Progress Energy Power stations in the Southeastern US and moved to a higher level responsibility position, managing Progress Energy's turbine maintenance organization. Pete received his BSME from Rutgers University, College of Engineering and is a licensed professional engineer (PE) in the state of Pennsylvania.
