Docket # 2011-2

Mr. Chairman,

I'm writing to express my support of the SEC taking control of the evaluation process for the Town of Antrim in regards to the Eolian / Antrim Wind Project. As a resident, homeowner, small business owner and taxpayer for over 25 yrs in Antrim, I believe that I am one of the 70+% silent majority of residents polled in favor of the project. But we need your help!

To insure that this project is completed correctly, the SEC needs to be involved to assist the local boards addressing location, environmental impact and permitting process. Our citizen boards however well meaning, do not have the resources or expertise to navigate the complexities of this scale project.

We have in town a very vocal minority trying to derail the process of application and permitting. We need a transparent independent third party to assist and mediate to insure that all questions are answered without bias and in a timely fashion.

I ask the SEC Board to accept the Select Board of Antrim request to intervene and assist the town with this project.

Respectfully,

Wesley Enman
