Dear New Hampshire Site Evaluation Committee:

I am writing to urge you to approve the application for the construction of the Antrim Wind project. I truly believe that as a nation, state, county or town we have an obligation to seek and develop alternative energy sources. No one wants to give up on any of their conveniences and so we are depending more and more on electricity. I believe Antrim Wind is one of the few large-scale opportunities we have to make a real change. Our children and grand-children deserve to breath cleaner air. We all know what burning coal can do to our lungs. All over the world you will find wind turbines, so why not in Antrim, N.H.. Please don't let this opportunity pass us by.

While most of our town is in favor of the Wind Project there are those few who believe that this project will have a negative environmental impact on Tuttle Hill. Those opposed cite that their view will be affected, or that their property value will go down and they won't be able to sell their homes. Why would they want to when the town will be getting tax revenue from Antrim Wind, which in turn will reduce homeowners taxes.

I truly hope that the SEC does not let the opinions of the few short-sighted opponents derail this project.

Very truly yours,

Karen Weisswange
