Re: Docket No. 2012-01

To whom it may concern:

As Antrim residents my husband and I are concerned that you have been receiving comments from those opposed to the Wind Turbine Project and we just wanted you to know that we are all for it. We think it would be a very good thing, not only for Antrim, but for our country. It is time we do something that will help to clean-up our environment so our children and grandchildren can breath cleaner air.

All over the world you will see wind farms, why not in Antrim. Please don't let a few short-sighted people stop this project from going through. Antrim needs your help.

Sincerely,

Karen and Albert Weisswange
