Ms Murray:

Please record my opposition to the Wild Meadows project. My family has owned a cottage on Newfound Lake (and paid taxes to the town of Hebron) for 48 years. There is no doubt that construction of the proposed wind turbines will blight the beauty of the lake and the entire watershed region. Any economic and conservation benefits of this particular wind power project - the extent and nature of which are greatly debated - do not justify the placement of these monstrous industrial machines in a region of New Hampshire whose natural character has long attracted tourists and residents, and which should be preserved for years to come.

Thank you.
