September 30, 2015

Dear Committee Members:

Energy costs are hurting NH families like mine. A huge percentage of my wife's and my paychecks are going to pay for utilities. It is time to start addressing this problem.

The Sea 3 propane facility in Newington has been a key distribution facility supplying propane to houses and businesses all across New Hampshire for many years. Propane has come into Newington from other countries by ship. The upgrades they have presented to you will allow for more domestic propane to be delivered to the facility by train, which will then be distributed to consumers. With the price of domestic propane significantly lower than foreign supplies, it only makes sense to allow the modifications.

Please support the upgrades to the Sea 3 facility so we can get cheaper propane to NH. Thank you.

Sincerely,

Ryan Brandreth
