Dear SEC Members:

I am a propane user to heat my home in Hooksett. It seems each winter New Hampshire faces a growing need for more propane and with that comes higher costs. The proposed changes at the SEA-3 propane facility in Newington sounds like a positive step to help deal with propane costs. By adding more railroad unloading capability, more lower cost domestic propane will be delivered to the state and that means lower costs for those of us who depend on this to heat our homes.

My entire neighborhood is looking to you for relief. Many of us have discussed the need to act now. It is time to face the reality- we need more supply and we need to find the cheapest way to do that. Please don't miss this opportunity to get relief to thousands of NH residents like me. Please vote yes on the SEA-3 exemption request. Thank you.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas Prasol". The signature is fluid and cursive, with a large initial "T" and a long, sweeping underline.
