September 30, 2015

Dear Ms. Murray:

New Hampshire is facing some of the highest energy costs in the entire country but it seems like there is opposition to just about every energy proposal out there. Young people are leaving NH because of this. We need our political and regulatory leaders to start taking action to ensure we have an adequate AFFORDABLE supply of energy.

Many younger people like me want to live here. We want to own homes that are affordable. Your approval of the SEA 3 improvements will help get lower priced domestic propane into the state and that will help a great deal. More and more homes are using propane for heat in New Hampshire so getting affordable propane here is within reach. Please show the people of NH we are starting to address this issue by approving the SEA 3 upgrades as soon as possible. Thank you.

Sincerely,

CHRISTIAN MADDOX
