Attn: Ms. Jane Murray

Dear Ms. Murray and SEC Members:

Thank you for allowing me the opportunity to submit comments in favor of the SEA-3 project in Newington, NH. As a New Hampshire resident and consumer of propane, I want to encourage you to support the upgrade proposal that is currently before you.

For thousands of NH residents, propane is the primary source for heating their homes. I am extremely concerned about the availability of affordable propane. Last winter was a difficult and expensive season and with predictions that the upcoming winter may be a repeat, please do not drag your feet in getting more and cheaper propane into New Hampshire. Your action will have a direct impact on thousands of households.

The Sea-3 proposal will help get more affordable domestic propane into the state. That will help a lot of people with our heating bills that just keep rising. It frustrates me when I hear about people fighting this plan because New Hampshire keeps falling behind in addressing our energy needs. Please support the SEA-3 upgrades.

Thank you.
