Dear Ms. Monroe:

Thank you for your email. I read the letter filed by Representative Vose and Senators Ward and Giuda and share the concerns they raise.

First, I have no issue with, and fully expect that any of my communications to the SEC will be posted on the Committee's website regardless of any responsive actions that might follow. To my knowledge, this has been the process followed by the SEC in proceedings that predate the addition of an administrator and it's consistent with Site 104.01(f) ("The committee shall post public information on its website at www.nhsec.nh.gov"). Groton Wind under Docket 2010-01 is one example where a complaint was filed and posted to the SEC site before any action was taken by the Committee. It's not clear to me why privacy is now an issue.

Second, I would like to respond to this statement in your email: "To the extent that more formal requests for enforcement are submitted, that information is posted." This is not at all how you handled the Feb 28 letter signed by 17 Antrim residents describing failures with Antrim Wind's ADLS system. While you posted Antrim Wind's responses on the SEC website, you left our letter off the site giving the false impression that Antrim Wind and/or you proactively reported and resolved the problem. As you should remember, you admitted to me that you were unaware of the problem until you received our letter. The ADLS problem continues to be unresolved.

Thank you again for your email. I ask that this communication be posted to the SEC website as well.

Regards,

-- Richard Block --

Subject: Posting of Citizen Complaints on SEC website

Dear Ms. Berwick, Ms. Longgood, Ms. Bucu, and Mr. Block-

On Friday, April 17, the Chairwoman of the SEC received a letter from Senator Ward, Senator Giuda, and Representative Vose regarding constituent concerns about certification of non-compliance related to the Antrim Wind facility. The letter requested an investigation by the Chairwoman or the full SEC. A response to the letter is forthcoming and, for your information, it is posted on the SEC website at the following link: https://www.nhsec.nh.gov/projects/2015-02/post-certificate-filings/2015-02_2020-04-17_ltr_chair_constituant_concerns.pdf.

Item #3 in the letter, set-forth a request that complaints about a facility from the public be posted on the SEC website. As a matter of process, due to privacy concerns, I have not posted e-mail communications sent to me from the public related to complaints about any facility on the SEC website. My approach has been to respond directly to the complainant(s). To the extent that more formal requests for enforcement are submitted, that information is posted.

In light of the request contained in the April 17 letter, I am reaching out to find out if you have any objection to having all e-mail correspondence that you have sent to me, where you complained about the Antrim Wind facility operations, posted on the SEC website.

I look forward to your response.

Sincerely,

Pam
