

Dear Mr. Michael Iacopino and Interim Administrator,

For the sake of clarity and transparency, I believe it is worth to reiterate that in the absence of a notice for a committee meeting (and therefore a determination on our waiver request of July 24, 2020), we are mobilizing this week for the fall sound measurement campaign as previously indicated. We still believe it is in the public interest that sound measurements are taken sooner than later during the fall, even if only at the accessible locations.

Let me know if you have any questions.
Thanks and best regards,

Jeff L.

Mr. Latour,

I expect that you will soon receive a notice scheduling a meeting of the NHSEC to address the waiver requests, review the Tocci reports and to review the various complaints and comments that have been received since February. I anticipate that the meeting will be held via a WebEx or similar remote platform as we are still under emergency pandemic orders.

Best,

Mike

Subject: RE: Antrim Wind - Request to adjust schedule and location for the post-construction sound monitoring

Dear Interim Administrator,

As you know, we are still pending a determination on our waiver request of July 24, 2020 regarding the schedule and location for the post-construction sound monitoring. With the 2020 fall coming to an end soon and the absence of determination/direction from NHSEC, we believe it is in the public interest that sound measurement during the fall be done sooner than later even if only at the accessible locations. With that in mind, I thought it would be best to email you to inform you of our intention to mobilize at location L1, L2, L3 and L5 during the week of November 9 to install the sound measuring equipment. Please let us know if you have any concerns with this course of action.

Let me know if you have any questions.
Thanks and best regards,

Jeff L.

Subject: Antrim Wind - Request to adjust schedule and location for the post-construction sound monitoring

Dear Ms. Pamela Monroe,

Please find attached our request to adjust the schedule and the location for the post-construction sound monitoring.

Let me know if you have any questions.

Thanks and best regards,

Jeff L.
