

To whom it may concern:

I am writing this letter in support of the Antrim Wind Energy Project.

This project will create much needed jobs for NH. As stated :The project is expected to contribute 84 full time equivalent employee jobs during the construction phase and 12 FTE jobs during operations.

Considering the projected tax revenue to the Town of Antrim to be 8 million plus over the first 20 years, with no real maintenance costs to the town, and with the benefit to the local area economy being projected at over 53 million dollars, this project looks to be a win-win scenario.

I feel it is the responsibility of all of us, to take every opportunity to utilize this technology to reduce our carbon foot print, lessens our requirements of foreign oil and utilize a much safer and greener alternative to our energy sources.

We all need to take the responsibility of ensuring our energy sources for America's future very seriously.

Sincerely,
