Subject: SEC hearing Antrim wind

To; Pamela Monroe
Subject; Antrim Wind project.

I am writing to you in regards to the industrial wind farm that AWE is proposing. I have been and still am opposed to this project. I am a true "Antrim Native" having lived in town for 60 years. I am a taxpayer and own several properties in town and my residence is within 1/2 mile of the proposed project. Certainly the background of AWE doesn't give me confidence that they have the ability or expertise to even do this project and make it successful. The small changes that have been proposed really aren't much, looking at the total impact this project would have on the Tuttle mountain area. The fact that the SEC has denied the permit twice certainly speaks to this. I am asking the committee to stand by their original 2 decisions and deny the permit again.

Thank You for your consideration
