Subject: The turbines in Antrim, NH

83 Old Marlow Road  
Washington, NH  
October 10, 2016

Dear Ms. Monroe,

I am writing to express my concern over the turbines that are being considered for Antrim, NH. I am a 35 year resident of Washington, NH, and as such witnessed the construction of the Lempster NH windmills. I am an avid kayaker and spend lots of time at Pillsbury State Park. I see the windmills as a scar upon the landscape, as you turn on the pond they loom over you ruining the peaceful setting with their hum and movement. One of the most beautiful views of Washington is as you approach from Route 31, now above the town looms windmills with their red warning lights and spinning arms! Needless to say I am opposed to their being built in Antrim. They will have a terrible affect on the Willard Pond conservation land and those who enjoy it's beauty. Pitcher Mountain is also a family favorite and from there you will be able to see the whole wind farm ruining what is a beautiful view.

Please consider the fact that our state's economy is largely based on tourism and as a former New Yorker and now lifelong NH citizen, I did not come to NH to see turbines dotting the landscape.

Thank You for your Consideration

Christine G Piatt
