NH Site Evaluation Committee
Pamela G. Monroe, Administrator
21 South Fruit Street, Suite 10
Concord, NH 03301

Re: SEC Docket #2015-02

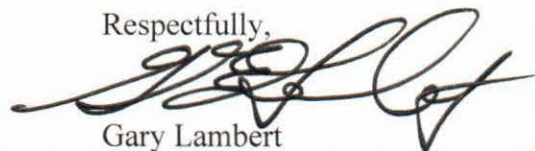

Dear Honorable Committee:

I am writing to you today to urge you to approve the Antrim Wind Project. I appeared in person at the public hearing on this matter but I had to leave to go back to work before I was called to speak.

I have been an avid outdoorsman and hunter all of my life and am proud of our state's commitment to preserving our natural resources. Over the past year I have been volunteering with Citizens for Responsible Energy Solutions, talking about clean energy opportunities right here in our state.

I want to applaud the Antrim Wind Project for striking a balance between harnessing clean energy while carving out 908 acres that will be permanently conserved. This seems to be a smart balance that the Antrim Select board supports, along with the Sierra Club and their entire elected state delegation. To make this an even better deal for NH conservationists and rate payers, a significant portion of the power generated by the Antrim Wind Project will stay in the state of New Hampshire to power local homes and businesses. I hope the Site Evaluation Committee sees this project as a model for smart, community supported energy.

Respectfully,

Gary Lambert
