Subject: Wind Turbines

Dear SEC I lived in California when they built the wind turbines in the Mohave Desert. I thought at the time it was a great idea. However I started to get sick a lot, extremely tired and so dizzy that I could not even walk across the room without holding on to something a lot of the time. The doctors could not seem to find the problem.

About that time my husband retired from the military and we moved to Texas. The doctors there ran a lot of test, but could not find the problem. Finally one sent me to a specialist and he found the problem. Lucky for me, he had seen the problem before. My inner ear had been seriously bruised. He said that the wind turbine had caused the problem. It took months of treatment to get back to where I could have a some what normal life. It has been over 30 years since this happened and I still have days that I have problems. Not as bad as before, but they are still there. I can not imagine if what would happen if they put the wind turbines only a mile from my house. I would have a direct sighting of them from my back yard.

The town has already voted it down twice and the SEC has voted it down once. Please consider voting it down again. The people here do not want them. Thank you very much for reading my e-mail. Lynn H Burdette Antrim NH
