**Subject:** Antrim Wind Project

Good morning Ms. Monroe.

My name is Donald Fitzgerald and I along with my wife Stacey live on Reed Carr Road in Antrim, NH. I have just recently met my neighbors the Berwick's. I and my wife were surprised to find out that a decision on this project is pending. I know this is very late in the process to become involved but we and many of our neighbors on this end of the road have been left in the dark about this I submit. I do remember a town wide vote a couple of years ago on this and the townspeople were not in favor of this project going forward by a strong margin. I was under the impression it was done and over with then. I also remember the SEC had disallowed the project on the grounds that the project would negatively impact the natural splendor of this beautiful wild area. From what I have been able to gather in a very short amount of time, this "new" proposal is very much the "old" proposal. I could go on but I won't take your time as I'm sure at this point you have heard all of what I would have to share. I would just say in closing that I just don't think the meager returns received from a wind farm can possibly mitigate the loss of a tremendously splendid stretch of land such as this. Places such as this are what define New Hampshire. I have often said to my wife while sitting at Willard pond. "Stacey, it is so beautiful here with these hills all around us. I feel like I'm sitting in the palm of gods hand". Please count us as against this destructive project. Thank you so much for your time. Sincerely, Donald and Stacey Fitzgerald
