Subject: Antrim Wind Docket 2015-02

Dear SEC

I am writing as a concerned citizen who has followed the wind proposals/proceedings over the years. I live far enough away that I will not see/hear the turbines. My concern is twofold:

1) The coziness of "Antrim Wind Energy" with the select board since day one, including non-transparent backroom deals, and disregard for reasonable citizen concerns (often better described as hostility).

2) The impact on the huge wildlife corridor that many have worked tirelessly over the years to protect, including precious wetlands, (the Cedar Swamp, some of NH's most pristine lakes-- Audubon's Willard Pond, Gregg Lake, not to mention the many precious lakes in Stoddard.)

I have travelled widely in Europe and have seen many successful wind installations, but never any in such a pristine treasure of a location.

The money would be WAY better spent helping people invest in solar. Now with the new Tesla solar roof tiles and home storage batteries, solar is the way of the future. The solar panels on our 1789 farmhouse supply all our electricity AND we are giving back to the grid.

Let's not throw the baby out with the bath water!

Sincerely
Nancy Knowles
Antrim
