NH Site Evaluation Committee
Pamela Monroe, Administrator
21 South Fruit Street, Suite 10
Concord, NH 03301

Dear Ms. Monroe,

Although I am not a resident of Antrim, I am a resident of New Hampshire and write to you in full support of Antrim Wind Energy. Antrim, NH has the resources available to produce wind energy, and I believe that our state should utilize that resource. I understand many people have concerns that the AWE will disrupt the conservation lands that currently exist. AWE has shown that it not only considers, but actually *cares* about conserving the land surround the wind project. According to the SEC's findings, the Antrim Wind project would effect less than 1% of the conserved land. The AWE project will conserve approximately 908 acres of land, which should be considered a significant amount of land. This 908 acres will be permanently conserved thanks to Antrim Wind Energy, even after their wind energy project may no longer exist.

Antrim Wind also provided \$100,000 to the New England Forestry Foundation to conserve additional land in this area. It is apparent to me that AWE wants to conserve the integrity of this land as much as possible. I believe that other companies may not consider conserving any additional land when siting energy facilities in the area, and the fact that AWE has taken steps to preserve additional land speaks volumes. I hope that the Antrim Wind project is accepted because it will conserve land, provide clean energy, and allow New Hampshire to come closer to reaching our renewable energy goals.

Sincerely,

Emma Brunet
