Subject: Please support the Antrim Wind Project

As a community member in Antrim NH, I understand those who worry that the wind towers may ruin their view or decrease their property value. I too had these same concerns when the bright night lighting was installed at the ball field one street away, lighting the evening sky so bright at my home just one street away and yes the noise from the night games can be a bit much - I sure wish it were not in my back yard - but you know what - it is and the reality is that it is not about me - it is what is best for the future for community and for our children.

My children were raised in Antrim, we owned a camp at the back of Gregg Lake where we spent many hours watching the loons and the hills. I try to imagine all the possibilities for this land and the views I have come to love.

We now have eight grandchildren, all except one being raised right here in the Antrim area. They are amazing and they are the future. It is not about me - it is about the future we leave to them.

The wind towers will offer so many benefits to them for years to come. Fewer house lots and broken up parcels of land, open spaces, renewable energy, a project to be proud of, lessons learned on how to balance technology and the environment, responsibility and stewardship, protecting the best of and making the best use of what our environment has to offer.

Please support the Antrim Wind project...For the future

Respectfully,

Mari Hyer Schacht
