NH Site Evaluation Committee:  
Commissioner Robert Scott, Chairperson  
21 South Fruit Street  
Concord, NH 03301

**Subject:** Docket 2015-02  
Antrim Wind Project

Dear Sir:

As a New Hampshire resident and the Senior Vice President of Three Phase Line Construction, a New Hampshire based company, I am writing to you today to strongly encourage the Site Evaluation Committee's approval of the permit for the development of the Antrim Wind Project.

I support the development of this wind farm because it is favorable to NH and our region through the production of clean energy and the creation of well paying jobs.

As a NH resident I am concerned to maintain the beautiful environment that we all enjoy and believe that further development of wind farms is the right solution to both meet our energy needs while being environmentally friendly.

Additionally, as an employer of IBEW electrical workers, I am well aware that these developments create well paying jobs will top tier benefits for our tradesmen. These jobs also have a cascading effect with spending for meals, lodging, equipment, supplies, etc. Certainly a boost to the NH economy.

Thank you for considering my endorsement of this project.

Respectfully,

**Steve Autenreith**  
Senior Vice President
