Subject: Antrim Wind Farm

I'm writing to endorse my support for the wind farm in Antrim, NH. My husband and I have been residents of Antrim since 1999. My family roots go much farther back and I spent summers here as a child. I believe we need to have alternative fuel sources and I think the wind power makes a perfectly reasonable alternative to fossil fuels. I have seen wind power being used in many other areas or the country and in Canada and I don't find them offensive at all, in fact they are quite graceful.
