

Dear Pamela -

I am writing in support of the Antrim Wind Project. Local renewable energy projects like this keep revenue in our state and have a positive impact on local economies. NHEC is a utility that truly represents the interests of NH residents, and the fact that they are willing to manage 25% of the intermittent power that will be generated from the 9 turbines is a strongly favorable indication to me. In addition, the siting has been carefully balanced with land conservation planning. I wish we had a project like this in Bethlehem (rather than a growing landfill) to contribute to our tax base. I hope the SEC will vote in favor of this project.

Sincerely,

Marni Hoyle
Bethlehem, NH
