

Dear Mrs. Monroe,

Please approve the Antrim Wind Project for clean energy. Having lived in the town for more than 30 yrs, both my wife and I feel that this will greatly benefit the area with much needed energy, funds and employment.

We are firm believers in clean energy.

In our first home, we had a solar hot water system installed. This lowered our electric bill considerably and was easily maintained. We have now added a solar electric system to our current home but are still waiting for Eversource to go online. Clean energy is the only way to go as fossil fuels fluctuate with worldly drama and have too much of an effect on our greenhouse gasses. This wind project will help lessen fossil fuel dependency without damage to the environment.

Thank you,

Paul and Betsy Matthes
