Dear Ms. Monroe,

As a resident of Antrim I am concerned about the proposed Antrim Wind project. After research I can find no advantage to the residents of Antrim from this project. Furthermore, I foresee a decreased tax revenue for the city and state since property values will decrease and consequently so will the property taxes. It seems to me the only people benefiting from the Antrim Wind project are those from out of town or even out of state. I hope you will find this proposed site to be unfit as it so negatively impacts residents, wildlife, and our future economy. You may see a short-term gain in employment; however, I am confident it is outweighed by the long-lasting negative impacts of this project.

Sincerely,

Bradrick J. Pretzer
