Re: Antrim Wind Energy, LLC (SEC Docket #2015-02)

Dear Honorable SEC Committee,

As a resident of Antrim for 22 years and a business person in Antrim for almost seven years, I am in favor of the Antrim Wind Project. Understanding that this project is not without impact, the time has come for each town and each person to do their part – however small – to slow climate change and reduce the harmful impact of our ways of convenience. Climate science is real with the backing of sound data. To ignore or deny this, and think that we as citizens and localities can ignore our responsibility or leave it to others to resolve is arrogant and foolhardy at best.

By supporting and approving the Antrim Wind Energy project as a small step toward moving away from harmful fossil fuels and extrication processes, we are finally getting on board with more modern, efficient, and renewable energies. Renewable energy, as you are well aware, is a move to replace – not duplicate – current harmful practices. Rather than repeat the sound scientific evidence, I note the eloquent and insightful comments submitted by Mr. Ben Pratt and Ms. Rebecca Enman regarding respectable science.

Much work has been done by previous town entities to support this project and ensure that the town benefits from a constructive working relationship with Antrim Wind, as well as to acknowledge our responsibility as citizens of the Planet to do our part in preserving what we have without leaving an undue burden to future generations. Once again, it would appear that the larger portion of Antrim's residents who do support the Antrim Wind project are not as vocal or prominent as the smaller group who remain opposed to it.

No doubt, there is a balance to be struck here and there is the notion of "the greater good" for the long-term. I respectfully urge you to find a way to approve the Antrim Wind Project here in Antrim in a responsible and respectful manner to meet that greater need.

Thank you for your time.

Sincerely,

Cynthia D. Crockett  
Antrim, NH
