Hello Pamela and Site Evaluations Committee,

I hope this note finds you well. As an advocate of sustainable energy I have been encouraged to contact you to express my support for the Antrim Wind Project. I live in Henniker and occasionally recreate in Antrim I have been aware of the possible project for a while and have heard arguments for and against. While initially having had some concerns about the visual impact of turbines on the landscape and the bird population, having visited other regions of the U.S and other countries where the presence of turbines is a reality, I have come to accept them and feel that the benefits outweigh the drawbacks. It would be nice if New Hampshire could continue to move in the direction of sustainable energy production.

Sincerely,

Jason Paul
