I am writing to share my displeasure with the proposed Antrim Wind Project, located in the Gregg Lake area of Antrim, NH. This project will alter the lives of several friends of mine in this area. Not only will the noise pollution be a constant annoyance, but the view that everyone in the Gregg lake area has enjoyed for many years will be destroyed.

This project defies all logic. Why put the towers in this area? There are other areas that are as good or better. That will not adversely affect anyone. Why benefit a foreign company to the detriment of an unspoiled area? I can see some good, if the product (electricity) would benefit the local area, but not a neighboring state.

Please, please reconsider the folly of this project. Thank you for your help,

Stanford W. Long

A handwritten signature in blue ink, appearing to read "Stanford W. Long". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
