Subject: Antrim Wind Energy project

Ms. Monroe,

As a homeowner on Franklin Pierce Lake my family and I have enjoyed the pristine beauty of the lake and surrounding mountains since 1955. I am alarmed to hear that the Antrim Wind Energy project is being reconsidered because I believe it would permanently mar the view and the tranquility of the area, and poses a serious threat to the birds. It will undoubtedly lower property values for all those in the area which could also lower property tax revenues so crucial to the local government budgets.

I do not believe it will have a beneficial impact on the energy rates of the people and will only benefit those who are building the project or leasing the land. Please put a permanent end to this project while it is still possible.

Thank you for your consideration,

Robert S. Roberts, M.D.
