Re: Petition to Intervene NH Site Evaluation Docket No. 2015 - 06 Northern Pass

Dear Ms. Monroe:

We hereby petition the State of New Hampshire's Site Evaluation Committee to grant us full intervention status in the proceedings for the above mentioned docket due to the right of way (ROW) located on our property in Easton, NH and in proximity to our vacation home. Although NP has announced an amended route that includes burial of the line in our area, "Alternative 2" (see below) has not been formally withdrawn. We are therefore petitioning for Intervenor status.

We use the home and rent it to vacationers on a short-term basis to help cover costs. We plan to retire to the house in a few years. According to the original site plans that were detailed on the Northern Pass website, and outlined in Alternative 2 in the draft EIS that NP submitted last July to the DOE, the current wooden utility poles contained in the ROW on our property will be replaced by twice as many steel towers that are approx. double the height of the existing poles. The current poles are not visible from the house; their replacements will be highly visible above the tree line, and we believe the house may be within the fall line of at least one of the towers.

Should the proposed transmission line be constructed on the ROW on our property, we believe our interests that would be affected by the SEC's Northern Pass proceedings include the following:

- Decline of property value; there has already been a decrease in the assessed value of the home since NP was announced
- Loss of rental income due to the negative aesthetic impact of the transmission towers
- Negative impact on health & safety (proximity of house to the towers' fall line, EMF's)
- Decreased quality of life due to noise, loss of scenery

Thank you for your consideration of this petition.

Respectfully Submitted,

Lelah Sullivan
