RE: Proposed Northern Pass Transmission Project

Mr. Honigberg:

The people of Whitefield and surrounding towns are up in arms over Northern Pass' recent announcement that they will not be burying their transmission lines through our towns. In light of this new information, 535 registered voters and concerned residents of Whitefield and surrounding towns have signed the following petition requesting full burial of the Northern Pass transmission lines through Whitefield and neighboring towns. We are sorry we did not get to everyone, because we know there are countless more who feel as we do. This petition speaks for all those who stand against the proposed Northern Pass Transmission Project and the many harmful effects it would have on our community.

Signed,

Registered Voters and Concerned Residents of the Whitefield Community

WHITEFIELD CITIZENS' PETITION

✓ Registered Voters

As residents of Whitefield, we are very upset that Northern Pass now proposes to bury the transmission lines for 52 miles starting just south of our town, but isn't willing to do the same here. With 10.4 miles of proposed lines, Whitefield has the second most total mileage of any town, and the most overhead mileage on the route. Whitefield is a destination for tourists, and the gateway to the Great North Woods, the engine of Coos County's tourism economy. The proposed overhead lines would be visible from all points of access to or through our village and would damage our town's beauty and appeal. These above-ground lines do not respect Whitefield's citizens, our community and businesses, our historic village and heritage, our landscapes and vistas, our conservation land, or our sense of place.

This is our town and our future. We will not stand by and watch as Whitefield is destroyed by monstrous above-ground lines.

Whitefield's historic town slogan identifies us as "A friendly town with a beautiful point of view", and we intend to keep it that way. If Northern Pass is to go forward, we insist that the lines be buried.

Whitefield Selectboard

Whitefield Planning Board

Whitefield Economic Development Corporation

✓ Registered Voters

As residents of Whitefield, we are very upset that Northern Pass now proposes to bury the transmission lines for 52 miles starting just south of our town, but isn't willing to do the same here. With 10.4 miles of proposed lines, Whitefield has the second most total mileage of any town, and the most overhead mileage on the route. Whitefield is a destination for tourists, and the gateway to the Great North Woods, the engine of Coos County's tourism economy. The proposed overhead lines would be visible from all points of access to or through our village and would damage our town's beauty and appeal. These above-ground lines do not respect Whitefield's citizens, our community and businesses, our historic village and heritage, our landscapes and vistas, our conservation land, or our sense of place.

This is our town and our future. We will not stand by and watch as Whitefield is destroyed by monstrous above-ground lines.

Whitefield's historic town slogan identifies us as "A friendly town with a beautiful point of view", and we intend to keep it that way. If Northern Pass is to go forward, we insist that the lines be buried.

Whitefield Selectboard

Whitefield Planning Board

Whitefield Economic Development Corporation

✓ Registered Voters

As residents of Whitefield, we are very upset that Northern Pass now proposes to bury the transmission lines for 52 miles starting just south of our town, but isn't willing to do the same here. With 10.4 miles of proposed lines, Whitefield has the second most total mileage of any town, and the most overhead mileage on the route. Whitefield is a destination for tourists, and the gateway to the Great North Woods, the engine of Coos County's tourism economy. The proposed overhead lines would be visible from all points of access to or through our village and would damage our town's beauty and appeal. These above-ground lines do not respect Whitefield's citizens, our community and businesses, our historic village and heritage, our landscapes and vistas, our conservation land, or our sense of place.

This is our town and our future. We will not stand by and watch as Whitefield is destroyed by monstrous above-ground lines.

Whitefield's historic town slogan identifies us as "A friendly town with a beautiful point of view", and we intend to keep it that way. If Northern Pass is to go forward, we insist that the lines be buried.
