October 13, 2008

Thomas S. Burack, Chairman  
Site Evaluation Committee  
NH Dept of Environmental Services  
29 Hazen Drive  
Concord, NH 03302 – 0095

Dear Mr. Burack,

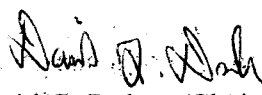

The Town of Dummer has some serious concerns about the wind park development that has been proposed by Granite Reliable Power, LLC, for construction in Dummer and in several unincorporated places to our North. We attended the SEC hearing in Groveton on October 2, and we presented a letter that lists our concerns. We have asked the SEC to endorse our concerns in the form of conditions to be placed on the permits that have been requested, and we want these conditions to be made binding on both the present and future owners of the proposed facilities.

In short, we have made our pitch; so now what? How will we know whether or not the SEC will impose our requested conditions?

The PUC Chairman described a process that culminates in a couple of days of hearings in Concord next March. Should we plan to attend those hearings, or will our issues be decided upon before then? Are there any other events between now and March that we should monitor?

Thank you for your attention to this matter. These issues are very important to us.

Sincerely,

  
David G. Dubey, Chairman  
Board of Selectmen
