To: Chairmen site Evaluation Committee

Dear Chairman Burak: I am Contacting you to tell you how upset and disappointed in the idea of the wind mill project. My name is Nate Lamoureux; I am a sophomore at WMRHS in Whitefield NH. I am totally against the wind turbines. It is going to ruin so much in our economy. They are going to clear cut the top of our mountains that I admire everyday to putt this ugly 410 ft wind tower. That my parents have to pay for to put energy somewhere else. They are going to kill the wild life on 23 different peaks in my area. Now I really don't think that it is worth killing wildlife for that. I believe in an alternative energy source to the fullest. Why can't it be some where it's not going to kill the economy, like the deserts of Texas or something? Or even something like solar or hydro that most people won't even notice. I don't want to go for a hike in the future with my kids and think how much better it would be with something to see. They say that it is going to be in a place where I won't even notice, but how can you not notice this gigantic football field and a half sized pole standing straight up? So if you put this up everything the North Country is about is going to be ruined Thank your for taking the time to hear what I have to say.

From: Nate Lamoureux
