

Dear Sir:

04/04/09

I am a senior citizen of the North country and have had contact with Nash Stream, TRIO Ponds and Philips Brook area the last fifty years or more.

When I first learned of the Wind Tower Project I was devastated - upset to say the least.

I couldn't imagine desecrating and demolishing that prime forest area - a habitat for the deer, the moose, rabbits and all the smaller varieties of wild life. The birds - the blue jays, the wood peckers the hawks etc which circle the areas - an occasional eagle.

My husband "Howard" was a lifetime member of TRIO Ponds Sporting Club - my son "Barry" followed. In that respect as he bought the camp site originally owned by Fish & Game Director of NH - Mr. Ralph G. Carpenter.

Winter travel via Skidoo Trails gave us access to the Fire Tower - the valleys and mountains nearby.

Dummer Pond camp was a stop over - 3rd Pond was a berry picking site besides being a remote fishing spot.

In my opinion it would be a crime to threaten the habitat of wild life with this extensive proposed wind turbine project.

And secondly, as others have mentioned the power projected is going to be no asset to Northern NH homes or business.

I pray that advisors in this project sense the intimate details considering
(over)

permanently destroying the mountain
top in its majestic grandeur and
all it envelops
Once done it can never be reversed!

P.S. Thank you for accepting comments
which will influence decision.

Yours Truly,
Pauline H. Craggy
