**Petition for the New Hampshire Energy Facility Site Evaluation Committee to Rule on the Clean Power Development, LLC Berlin Project**

Pursuant to New Hampshire law (RSA 162-H), we, the undersigned registered voters from Gorham, New Hampshire, hereby request the New Hampshire Energy Facility Site Evaluation Committee commence a proceeding to determine whether the proposed Clean Power Development, LLC biomass power plant in Berlin, New Hampshire should receive a full review from the Site Evaluation Committee. The Clean Power proposal is a 29 megawatt project - just one megawatt below the threshold level requiring Site Evaluation Committee review - and therefore Clean Power has not sought a Certificate from the Site Evaluation Committee. We believe the Site Evaluation Committee should nevertheless take jurisdiction over this project to determine whether it is consistent with the State energy policy and whether it will have a significant impact upon the local and State environment and the orderly development of the region.
