

558 LANE SCHOOL ROAD  
ANDOVER, NY 14806-9509

**ROUTE SURVEY**

**SURVEY DATE:** October, 1 2009, Conducted by John Mills

**ORIGIN:** Origins of both Maine and Pennsylvania were analyzed to accommodate each of the components that would be transported from their respective origin.

**DESTINATION:** Groton, New Hampshire

**LOAD DIMENSIONS:** The following route survey was done for the overall load dimensions of

**Length: 160'**  
**Width: 14'6"**  
**Height: 15'0"**  
**Gross Weight: 275,000 lbs.**

**ROUTES OF TRAVEL:**

*MAINE ORIGIN:* **NH Routs:**

I-95(S), SR-101(W), I-93(N) X26, SR-25(W), Groton Hollow Rd.

*PA ORIGIN:* **NH Routes:**

SR-10(N), SR-9(E), I-89(S), I-93(N) x26, SR-25(W), Groton Hollow Rd.

**CONCLUSION:** It was found that the proposed routes for the above overall load dimensions provide adequate clearance for overhead obstructions and turning radius' of the required equipment for the moves of these components.
