

Application of Groton Wind, LLC

Docket No. 2010-01

Record Request: 1) Explanation of the calculation of the carbon offset information in Mr. Cherian's prefiled testimony. 2) Profile of claimed capacity factory, including production capacity at times of peak load.

Response:

1) On page 67 of Application, the comparable fossil fuel emissions is calculated for the project assuming an appropriate capacity factor. Mr. Cherian's prefiled direct testimony at page 17 indicates comparable fossil fuel emissions based on a 2 MW turbine and is based on rated capacity.

2) This response is being submitted to the Site Evaluation Committee and Counsel for the Public subject to a Motion for Protective Order and Confidential Treatment.
