We do not support the Groton Wind project at this time. We feel that giant windmill towers erected along the ridge-lines would be aesthetically obnoxious as well as economically dubious for the production of electricity in terms of cost effectiveness. We had envisioned smaller windmill installations for producing electric power at individual residences on a neighborhood level.

This project deserves as much public scrutiny as the Northern Pass project. Please allow more time before making a decision regarding the Groton Wind project.

Sincerely,  
John and Susan Tucker  
Plymouth, NH 03264
