Subject: wind towers

we are writing in regards to the groton wind towers. first let us say, we are all for it! I have watched the tug of war between the towns and really don't understand why **everyone** is not for this. There has been no real proof that these wind towers have any negative affect on anything. There is proof however on how pofitable they will be for our state and our towns. there is so much more we could say about the posative affect, so if you read all literature and letters you will agree to.

sincerely,
Ted and Donna Bryant
