Dear Ms. Murray,

I would like to reiterate the position communicated both to Ms. Geiger and Mr. Iacopino in recent emails responsive to the May 13th motion that our interpretation of the process is that this matter must be brought up through appeals format, first to an appropriate Environmental Services Council per its own site-map instruction, or eventually to the NH Supreme Court. To allow the applicant to circumvent the dictated appeals process would appear to violate the rules at hand and due process rights of other concerned parties(intervenors,et al).

Trusting that this matter will appropriately be redirected back to the applicant for redirection through proper appeals process,

I remain Cordially,

Lawrence A. Mazur, MD(Mazur-Wetterer Intervenor Group)
