GROTON WIND RE HEARING
March 25, 2013

Department of Environmental Services
Site Evaluation Committee
Thomas Burack, Chairman
PO Box 95
Concord, NH 03302

Re: Groton Wind Maintenance Building

Dear Mr. Burack:

This letter is a follow up to my previous grievance to your committee dated January 30, 2013 Docket No. 2010-01 regarding the non permitted location of the Groton Wind Maintenance Building.

My property located at 551 Groton Hollow Road, Rumney, NH 03266, known as Parcel ID Map 16-2009 of the Town of Rumney official tax records.

Since the Groton Wind Maintenance Building was constructed in a non- permitted location. My property becomes a direct abutter to the project without any consideration to how it now effects the property value. As mentioned in my original letter of concern. My right to re-sale will never be sold for market value again, regardless of any improvements made to the property.

The clear cut of trees and brush at the non-permitted site has created an unsightly view to the once scenic location. Again with no consideration to abutters.

This issue needs to be rectified and I pray that your site committee takes this concern under consideration.

There was no need for the neglect displayed to me, my neighbors and the surrounding environment for the benefit of gain to others.

Respectfully,

Marianne Peabody
