STATE OF NEW HAMPSHIRE

SITE EVALUATION COMMITTEE

NOVEMBER 30, 2012 - 8:35 A.M. DAY 9
Concord, New Hampshire MORNING SESSION ONLY

IN RE: SITE EVALUATION COMMITTEE:
DOCKET NO. 2012-01: Application
of Antrim Wind, LLC, for a
Certificate of Site and Facility
for a 30 MW Wind Powered Renewable
Energy Facility to be Located in
Antrim, Hillsborough County,
New Hampshire.

(Hearing on the merits)

PRESENT: SITE EVALUATION COMMITTEE:

Kate Bailey, Engineer Public Utilities Comm.

(Presiding until 10:41)
Amy L. Ignatius, Chrmn. Public Utilities Comm.

(Presiding after 10:41)

Harry T. Stewart, Dir. DES - Water Division Johanna Lyons, Designee Dept. of Resources & Econ. Dev.

Brad Simpkins, Dir. DRED-Div. Forests & Land Richard Boisvert, Designee Div. Historic Resources

Brook Dupee, Designee Dept. Health & Human Svs.

COUNSEL FOR THE COMMITTEE: Michael Iacopino, Esq.

COUNSEL FOR THE PUBLIC: Peter C. L. Roth, Esq. Sr. Asst. Atty. General N.H. Atty.Gen. Office

COURT REPORTER: Susan J. Robidas, N.H. LCR No. 44

6	MS. BAILEY: Good morning,
7	everybody. I'll open the proceedings on
8	Day 8 sorry. Today is Friday. Today is
9	Day 9 of Antrim Energy, LLC, Application for
10	a Certificate of Site and Facility.
11	We'll start by introductions
12	of the Committee. My name is Kate Bailey. I
13	work at the Public Utilities Commission, and
14	the Chairman has asked me to preside over
15	these proceedings.
16	DIR. STEWART: Harry Stewart,
17	Water Division Director, Department of
18	Environmental Services.
19	MS. LYONS: Johanna Lyons,
20	Department of Resources and Economic
21	Development.
22	DIR. SIMPKINS: Brad Simpkins,
23	Department of Resources and Economic
24	Development.

1	CHAIRMAN IGNATIUS: Amy
2	Ignatius, Public Utilities Commission.
3	MR. DUPEE: Brook Dupee,
4	Department of Health and Human Services.
5	MR. GREEN: Craig Green, New
6	Hampshire Department of Transportation.
7	DR. BOISVERT: Richard
8	Boisvert, New Hampshire Division of
9	Historical Resources.
10	MS. BAILEY: And with us at
11	the Committee table is our counsel, Mike
12	Iacopino. And now I'd like to take
13	appearances.
14	MS. GEIGER: Yes. Appearing
15	for the Applicant, Antrim Wind Energy, LLC,
16	Susan Geiger, Douglas Patch and Rachel
17	Goldwasser, from the law firm of Orr & Reno.
18	Good morning.
19	MS. BAILEY: Good morning.
20	MR. FROLING: Stephen Froling.
21	I'm here for the Harris Center for
22	Conservation Education.
23	MR. STEARNS: Good morning.
24	Galen Stearns, Town of Antrim. With me today

```
1
         is Mike Genest, selectman.
                         MS. ALLEN:
                                      Good morning.
2
         Mary Allen for the Antrim -- for the
3
         Allen/Edwards intervenors.
4
5
                         MS. BAILEY:
                                       Good morning.
                         MS. PINELLO: Good morning.
6
7
         Martha Pinello for the Antrim Planning Board.
                         MS. MANZELLI: Good morning.
8
         Amy Manzelli from BCM Environmental & Land
9
10
         Law, here for intervenor New Hampshire
11
         Audubon.
                         MS. BLOCK:
                                      Good morning.
12
         Loranne Carey Block for the North Branch
13
14
         intervenors.
15
                         MR. ROTH:
                                     Good morning.
16
         Peter Roth, Counsel for the Public.
17
                         MS. BAILEY:
                                       Good morning.
                                                       So
         do we have any preliminary matters this
18
         morning?
19
20
                         MS. GEIGER:
                                       The only
21
         preliminary matter I would mention is that I
22
         handed out for the Committee and for the
23
         parties here today copies of answers to
24
         record requests that were made at the hearing
```

	,
1	back the beginning of November. And they've
2	been marked the answers have been marked
3	sequentially with, I believe, AWE 45.
4	MS. BAILEY: Thank you. Today
5	our first panel of witnesses is from the
6	Audubon Society. Ms. Manzelli, are you ready
7	to proceed?
8	MS. MANZELLI: I am. Thank
9	you.
10	MS. BAILEY: Okay. Could the
11	Clerk swear the witnesses in, please.
12	(WHEREUPON, PHILLIP BROWN, PAUL
13	NICKERSON, CAROL FOSS, FRANCES VON
14	MERTENS were duly sworn and cautioned by
15	the Court Reporter.)
16	PHILLIP BROWN, SWORN PAUL NICKERSON, SWORN
17	CAROL FOSS, SWORN FRANCES VON MERTENS, SWORN
18	TIGHTODS VON MERTENS, SWORT
19	DIRECT EXAMINATION
20	BY MS. MANZELLI:
21	Q. Good. Thank you. Good morning, everybody.
22	Let's just make sure the microphones are on.
23	They were powered up. Are all of your red
24	lights on?

- 1 A. (Nickerson) Yeah.
- Q. Let's make sure to keep those close to your
- mouths, please.
- So, starting in the middle with Carol
- Foss. Carol, could you please state your
- name and address for the record.
- 7 A. (Foss) My name is Carol Foss. I live at 26
- Penacook Street in Penacook, New Hampshire.
- 9 Q. And what is your position with New Hampshire
- 10 Audubon?
- 11 A. (Foss) I'm Director of Conservation.
- 12 Q. Bring your mic in a little bit closer,
- please.
- 14 MS. BAILEY: You have to --
- you can't share the mic. When it's your
- 16 turn, you have to completely take over the
- 17 mic.
- 18 MS. MANZELLI: Thank you.
- 19 Do you need her to repeat her
- 20 answer?
- THE COURT REPORTER: No, I'm
- 22 all set. Thank you.
- 23 BY MS. MANZELLI:

24

Q. What educational degrees do you have?

```
1 A. (Foss) I have a bachelor's in biology from
```

- Colby College in Waterville, Maine; a
- master's in zoology from the University of
- 4 Connecticut; and Ph.D. in wildlife ecology
- from the University of Maine.
- 6 Q. And very, very briefly, aside from your
- degrees, please provide a description of your
- 8 qualifications.
- 9 A. (Foss) I've been working in the field of
- 10 conservation biology, primarily in New
- Hampshire for the last 32 years, and have
- experience in field projects, as well as
- policy issues.
- 14 Q. Thank you. And are you the same Carol Foss
- 15 who submitted prefiled direct testimony,
- dated July 31st, 2012, which has been marked
- 17 as ASNH 25?
- 18 A. (Foss) I am.
- 19 Q. And are you the same Carol Foss who filed
- 20 first supplemental prefiled direct testimony
- on October 11th, 2012, which has been marked
- 22 as ASNH 27?
- 23 A. (Foss) I am.
- 24 Q. And do you have any corrections or updates to

that testimony? We'll do rebuttal later.

- 2 A. (Foss) I do not.
- 3 Q. And if you were asked the same questions
- 4 contained in your prefiled testimonies, would
- 5 your answers be the same today?
- 6 A. (Foss) Yes, they would.
- 7 Q. Now moving on to Francie.
- Francie, can you please state your name
- and address for the record.
- 10 A. (Von Mertens) Yes. Frances Von Mertens, 234
- 11 Elm Hill Road, Peterborough.
- 12 Q. And what is your position with New Hampshire
- 13 Audubon?
- 14 A. (Von Mertens) I'm a volunteer.
- 15 Q. And what are your qualifications?
- 16 A. (Von Mertens) A long-time, on-the-scene
- 17 volunteer for New Hampshire Audubon, the
- 18 Harris Center, among other conservation
- 19 groups. But strictly as a volunteer.
- 20 O. And are you the same Francie Von Mertens who
- 21 submitted prefiled testimony July 31st, 2012,
- which has been marked as ASNH 23?
- 23 A. (Von Mertens) I am.
- 24 Q. And with respect to the supplemental prefiled

```
1 testimony of Paul Nickerson, dated
```

- October 24th, 2012, which has been marked as
- 3 ASNH 28, were you the primary author of that
- 4 testimony?
- 5 A. (Von Mertens) I wrote that testimony.
- 6 O. And was it submitted in this docket under Mr.
- 7 Nickerson's name because you were expected to
- be out of the country for this entire
- 9 hearing?
- 10 A. (Von Mertens) I was out of the country for
- that week. And I think it was everyone's
- 12 expectation that the process would be
- 13 completed that week, so Paul Nickerson
- 14 adopted my testimony.
- 15 Q. And do you now adopt as your own the
- 16 supplemental prefiled testimony of Paul
- 17 Nickerson, dated October 4th, 2012, which is
- 18 marked as ASNH 28?
- 19 A. (Von Mertens) If that's agreeable, yes, I
- would like to do that.
- 21 Q. Do you have any updates or corrections to
- 22 either of your testimonies?
- 23 A. (Von Mertens) There's -- yesterday, reading
- 24 my supplemental, there is a word there that I

1 hope to address as being inaccurate.

- 2 Q. Okay.
- A. (Von Mertens) But I'll definitely cover it in my answers to questions.
- 5 Q. Okay. Aside from that which we will cover
- during rebuttal, if you were asked the same
- questions in your prefiled testimonies, would
- your answers be the same today?
- 9 A. (Von Mertens) Yes, other than that one
- 10 unfortunate word.
- 11 Q. Okay. And moving along to Phil. Phil, can
- 12 you please state your name and address for
- 13 the record?
- 14 A. (Brown) Phillip Brown. I live at 151 Antrim
- Road, Hancock, New Hampshire.
- 16 Q. And what is your position with New Hampshire
- 17 Audubon?
- 18 A. (Brown) I'm the Director of Land Management.
- 19 Q. And what degrees do you have?
- 20 A. (Brown) I have a bachelor's of science from
- 21 Rutgers University, and I've been working
- 22 towards a master's.
- 23 Q. In what?
- 24 A. (Brown) In conservation biology.

- Q. And aside from your degrees, very, very
 briefly, please provide a description of your
 qualifications.
- A. (Brown) I've been working in the field since
 2002, doing mostly land-management work, but
 also land conservation and overseeing
 education programs.
- Q. And are you the same Phil Brown that filed prefiled testimony, dated July 31st, 2012, which has been marked as ASNH 26?
- 11 A. (Brown) I am.
- Q. Do you have any updates or corrections to your testimony, aside from rebuttal?
- 14 A. (Brown) No, I don't.
- Q. And if you were asked the same questions

 contained in your prefiled testimony, would

 your answers be the same today?
- 18 A. (Brown) Yes, they would.
- Q. Now moving along to Paul. Paul, can you
 please state your name and address for the
 record.
- 22 A. (Nickerson) Yes. My name is Paul Nickerson.
 23 I live at 7 Sparhawk Drive in Londonderry.
- Q. And what is your position with New Hampshire

1 Audubon?

A. (Nickerson) I'm a member of the board of trustees, and I'm also chair of the Environmental Policy Committee.

- Q. And very briefly, can you provide a background of your qualifications?
- A. (Nickerson) Sure. I have a B.S. from the
 University of Maine, Orono, in wildlife
 management, 1966, and an M.S. in forestry
 from UNH, 1970. I worked for U.S. Fish and
 Wildlife Service from 1970 to 2004. Early
 work was involved with contaminants, in those
 days, things like --

14 (Court Reporter interjects.)

A. -- things such as DDT, aldrin, dieldrin,
mirex, all of which are gone now, thanks to
Rachel Carson and people like her.

Subsequently, I got very interested in bald eagles, and I was fortunate enough to be in a position to coordinate the national bald eagle surveys, conducted by the Service in '73 and '74; then moved to the Northeast as Endangered Species Coordinator, continuing work with bald eagles and numerous other

```
endangered and threatened species throughout
```

- the Northeast region, which extends from
- Maine to Virginia; then happily retired in
- 4 2004 and joined Audubon.
- 5 Q. Thank you, Mr. Nickerson.
- And to all of the witnesses, let's speak
- 7 in a little bit of a slower cadence. I've
- gotten the same admonishment, so...
- Now, Paul, are you the same Paul
- Nickerson that filed prefiled testimony,
- dated July 31st, 2012, which has been marked
- 12 as ASNH 24?
- 13 A. (Nickerson) Yes, I am.
- 14 Q. Do you have any updates or corrections to
- that testimony, aside from rebuttal?
- 16 A. (Nickerson) No.
- 17 Q. And if you were asked the same questions
- 18 today as you were asked in your prefiled
- testimony, would your answers remain the
- 20 same?
- 21 A. (Nickerson) They would.
- 22 Q. Okay. All right. Returning now to rebuttal
- to Carol.
- 24 Earlier testimony in this hearing was

that some of the wind turbines will be sited 1 2 on rock outcroppings. Can you comment on this?

Could I have a MS. GEIGER: 4 5 cite for the testimony that you're referring to, Ms. Manzelli? 6

> MS. MANZELLI: Sure. It was Mr. Martin, Day 4 PM. This is November 1st, 2012, Page 30, Line --

MS. GEIGER: Thank you.

11 MS. MANZELLI: Lines 8 to 12.

12 MS. GEIGER: Thanks very much.

BY MS. MANZELLI: 13

3

7

8

9

10

17

18

19

20

21

22

23

- So the testimony was that some of the wind 14 0. 15 turbines will be sited on rock outcroppings. 16 Can you comment on this?
 - Α. (Foss) My interest in that situation is that rock outcroppings on ridgelines are frequently, or at least sometimes, used as nest sites for the common nighthawk, which is a listed species in New Hampshire.
 - Earlier testimony in this hearing -- and as an example, Mr. Kenworthy's testimony on Day 1, 10/29/12, Page 50, Lines 22 to the end

of the page, and Page 51, Lines 1 to 6 -
some earlier testimony involved the

advisability of requiring -- excuse me.

Strike that question.

An October 26th, 2012 e-mail from Sarah Nystrom, the Northern States Bald and Golden Eagle Coordinator for the U.S. Fish and Wildlife Service, rated the risk to golden eagles from this project as "low," based on the output of a collision risk model. Can you please comment on this risk categorization?

- A. (Foss) It's based on a model. It's kind of axiomatic in the scientific world, that no model is right, but some models are useful.

 This is a relatively new model. I just returned at midnight from a wind and wildlife conference in Denver, where this model was discussed at some length. There are some modifications that could be made. And in any event, such a model should be considered one of several lines of evidence in determining a risk rating.
 - Q. And are you aware of whether Ms. Nystrom's

1 rating was based solely on the model?

2

3

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

- A. I am not directly aware of that. But it's my impression that that's how the Service is doing these rankings at the present time.
 - Q. Another correspondence, also dated

 October 26, 2012, this time a letter from New

 Hampshire Fish & Game, references a nighthawk

 fatality at a wind facility in New Hampshire.

 Can you please comment on that fatality as it

 relates to this project?
- (Foss) There were actually two fatalities Α. involving adult male nighthawks which appeared to be, shall we say intruders, at a nesting territory that was located very close to one of the turbines. There is the potential for a similar situation to occur in Antrim or at the proposed facility. pads make very attractive nesting habitat for They're a ground nester. this species. It's been documented that there are birds in the In the case of Lempster, their pre-construction surveys also detected nighthawks in the vicinity. There wasn't an issue until... I want to say this is the

fourth year of operation at Lempster, give or take. So it's not necessarily an issue that would become apparent immediately.

Q. And just for at least my understanding, can you elaborate on what you mean by an "intruder"?

4

5

6

21

22

23

- 7 (Foss) Nighthawks seem to have the habit of, Α. 8 once young have hatched at a given nest -and I've seen this with ospreys as well --9 adults from neighboring territories will come 10 11 in and inspect the family, or whatever they're doing. But they will come in to the 12 area. And they're very focused, so they're 13 14 not paying attention to the turbine rotors.
- Q. And what about a turbine pad makes it an attractive site for nesting?
- A. (Foss) Pads are typically gravel. Nighthawks
 do not build a nest. They lay their eggs
 directly on the surface of the ground. So
 gravel provides good camouflage for the eggs.
 - Q. Earlier testimony in this matter from Mr.

 Bartlett -- excuse me. I combined those -
 from Mr. Butler and Mr. Martin on Day 4,

 November 1st, the PM testimony, on Page 11,

Lines 9 to 16, the earlier testimony was that 1 rock removal would be required; that rock 2 will be removed according to how the 3 contractor chooses to do it; that the 4 contractor will be chosen later; therefore, 5 the exact method of rock removal is not known 6 7 now; and that possible rock removal methods include blasting, pressurized water and 8

chemical methods.

9

10

11

12

13

14

15

16

Now, looking at Exhibit ASNH 8, which you should have in the pile before you. If you don't, I have a copy here.

(Witness reviews document.)

- Q. Looking at that exhibit, it depicts a person looking at boulders. Is this an example of the boulder fields in the project site area?
- A. (Foss) It is represented to be such. I have not personally been there.
- Q. And do boulder piles such as this have any wildlife habitat value?
- A. (Foss) From what I see in the picture, this
 would be an ideal location for a bobcat den,
 a porcupine den, and even a turkey vulture
 nest site.

Q. And are such boulder piles common in the New Hampshire landscape?

A. Of this magnitude, not to my knowledge.

MS. GEIGER: I'm going to object to this line of questioning. It seems to me like this is information that could have been put in the parties' direct testimony, or in the supplemental testimony. I believe Ms. Von Mertens, in some of her testimony, talked about some of these things, boulders, if I'm not mistaken. So I just think this is too late in the game to start bringing in all this stuff at this level of detail. And I'll just leave it at that.

MS. MANZELLI: Based on the testimony from Mr. Butler and Mr. Martin, we learned the different methods that these rocks would be removed and the extent to which they would be removed and the volume to which they would be removed. We also learned that we're not going to learn anything more about the rocks at this time because of them not hiring a contractor right now. And I only have one more question on this point.

1 MS. GEIGER: I think these

witnesses started testifying about these

3 rocks as "habitat," and I just think that

4 that could have come into the record through

direct testimony, and we would have had a

chance to do some cross-examination on it.

And I'm just not prepared to do that today

because my experts aren't here. So I just

9 think it's really unfair to start going into

this level of detail on information that

could have been presented a long time ago.

12 (Discussion among Subcommittee members

off the record.)

14 MS. BAILEY: I think it's fair

15 rebuttal. We saw similar pictures from the

Applicant, I believe. So I'll allow you to

17 proceed.

6

- 18 BY MS. MANZELLI:
- 19 Q. I believe the pending question was: Are such
- 20 boulder piles common in the New Hampshire
- 21 landscape?
- 22 A. (Foss) I already answered that.
- 23 Q. Okay. Final question on this. What species
- would be expected to use such boulder piles,

aside from the ones you've already mentioned, if any?

A. (Foss) Those would be the prime species.

Q. Okay. Now, Francie, these questions are for you.

Earlier testimony -- for example, Day 7,
November 28th, from Ms. Vissering in this
hearing mentioned the "Forest Legacy
Program." And you mentioned the program in
your testimony also. Can you describe
basically what that program is?

A. (Von Mertens) The Forest Legacy Program is federal funds from the Department of Agriculture. And I'm mostly familiar as a volunteer for land trust. It's very collegial. The major land trusts in this state work with the State --

MS. GEIGER: Excuse me. I'm going to object to this. And I apologize.
But again, this witness was not asked to rebut anything that Ms. Vissering said or another witness said. She was asked the question to explain the Forest Legacy funds.
And I just think that's information that

could have been shared with everyone earlier in the process. And I would object to the witness now explaining and adding to the record information that could have and should have been placed in her direct prefiled testimony.

MS. MANZELLI: As I said, she did reference this in her direct prefiled testimony and --

MS. GEIGER: Right, and my objection --

MS. MANZELLI: Let me finish, please. However, there has been some question raised during the hearing from Ms. Vissering, and I believe, but I can't provide a cite, from at least one other witness, about the nature of this program. At the time that her prefiled testimony was filed, we didn't know that that would be an issue. But it is now, and so we would like the chance to clarify it.

MS. GEIGER: I guess I don't have a problem with rebuttal, but I do have a problem with clarifying information about a

program that this witness referenced in her testimony. I think it's beyond the scope of rebuttal that our witnesses were allowed to

do, and I would object.

MS. BAILEY: Everybody on the Committee works for a state agency. We understand what the Forest Legacy Program is. So I think we can move on.

BY MS. MANZELLI:

- Q. Earlier testimony in this matter, including Mr. Kenworthy's testimony on Day 1,
 October 29th, Page 74, Lines 21 to 24, Pages 75 and 76, and on Page 76, Lines 1 to 6, that testimony regarded the agricultural and forestry practices that would be allowed under the four conservation easements proposed as the Conservation Plan. Can you comment on this?
- A. (Von Mertens) This is where I can address the word that I mentioned in my supplemental -first supplemental prefiled direct testimony on Page 2, towards the bottom, third paragraph from the bottom.

MR. IACOPINO: Is that

1 Exhibit 28?

MS. MANZELLI: It should be
the supplemental prefiled testimony of Paul
Nickerson. I can give you the reference.

5 MR. IACOPINO: I have that as 6 ASNH 28.

MS. MANZELLI: Yes, thank you.

MR. IACOPINO: And what page

are we on?

WITNESS VON MERTENS: Page 2,
third paragraph from the bottom.

MR. IACOPINO: Thank you.

A. (Von Mertens) I wrote, "There are no restrictions or guidelines on forestry practices," and I was incorrect. There are guidelines. And I'd like to address my concerns about the restrictions and talk a little bit about conservation easements, if I could. And this directly relates to the four conservation easements on four of the seven leased properties for the project. And a conservation easement results from dialogue between the landowner and the entity that's going to hold the easement, the land trust or

1 government agency.

MS. GEIGER: Excuse me. going to object here to an explanation about conservation easements. If Ms. Von Mertens or any other panel member wants to rebut what Mr. Kenworthy said in the transcript that Ms. Manzelli cited, I'm happy to let them do But to go into a lengthy explanation this. about what's in the easements that have been in this record since June -- we filed them in June of 2012 -- these witnesses could have very easily gone into this on their direct prefiled testimony which was filed in July of I think now to sit here and listen to 2012. an explanation or some issues concerning the conservation easements that the project is proposing is something that is not permitted on rebuttal. It's something that should have been put in the witnesses' prefiled testimony. I would object.

MS. MANZELLI: If you would allow me, let me remind Ms. Von Mertens what the question is.

MS. BAILEY: Okay.

BY MS. MANZELLI:

- Q. The question is: Mr. Kenworthy characterized the agricultural and forestry practices that would be allowed under the four conservation easements. He described them as "limits" to that development. Can you comment on that?
- A. (Von Mertens) And that's where there are guidelines. Those are guidelines.

 Conservation easement is -- a typical conservation easement is 80-percent boiler plate, and then you get down to Section 3, the Reserved Rights.

And the forestry and agricultural practices/guidelines are boiler plate conservation easements. But if you don't have a forestry -- the requirement of a forestry management plan done by a licensed forester submitted to the agency or land trust holding the easement for their approval, then they're simply best management practices and guidelines. And we are a very agricultural and forestry-friendly state. And the guidelines are just that; they're guidelines. And that's the issue, that

there's not the requirement of a forestry management plan specified. It's the generalities, boiler plate. And that's in response to Mr. Kenworthy's saying that there are restrictions. And in my opinion, there are guidelines, but not restrictions. restrictions, to me, have a higher level of ability for the agency or land trust holding the easement to follow up and make sure that these restrictions are honored.

- Q. Turning now to Phil. Phil, earlier testimony from Mr. Gravel on Day 3, October 31st, 2012, the PM Session, on Page 114, Lines 2 to 6, in his testimony he said that, in Vermont, the little brown bat and the Northern long-eared bat are listed in the state as endangered, whereas in New Hampshire they're not. Can you please comment on that?
- A. (Brown) From what I'm aware, currently, the little brown bat is listed as a species of special concern in New Hampshire. I am not aware of the status of the other species of bat.
- Q. And with respect to the bat that you are

```
aware of, do you know if that bat had that
status, for example, for the entire year of
```

3 2012?

23

- 4 A. (Brown) I'm not aware of when that came into status.
- 6 Q. Okay. Do you know why it's listed as a 7 "species of special concern"?
- 8 A. (Brown) I believe primarily because of White
 9 Nose Syndrome playing a role in its
 10 precipitous decline.
- 11 Earlier testimony, again from Mr. Gravel, Q. Day 3, 10/31/12, PM session, this time on 12 Page 166, Lines 4 to 13, his testimony was 13 that, if an animal is using a particular area 14 15 a certain way, you can expect it to use it in 16 a similar manner in the future. And he also said there's a relatively high degree of 17 certainty there, but that the witness -- he 18 also said that he had not applied statistics 19 20 to those type of surveys that we were 21 discussing during that testimony. Can you 22 please comment on this?
 - A. (Brown) Yes. I believe that statement is very general. And while it may apply to some

species of migratory raptors, it certainly
doesn't apply to all of them; in particular,
to the broad-wing hawk, which comprises about
80 percent of migratory count totals at New
Hampshire Audubon's hawk watches. It
exhibits very high variability from year to

year in the numbers that it occurs in.

23

24

Earlier testimony from Mr. Valleau, same Q. Day 3, 10/31/12, PM Session, on Page 180, Lines 5 to 19, was that the ridge would not be characterized as a "leading line." "It's unlikely that it's a leading edge -- or a leading line." It's not possible, based on the survey data. "We saw relatively small numbers of raptors, and we correlated the data we collected with data from other nearby sites that are known hawk watch sites. we have significantly smaller numbers on those particular days than these other ridges which are known to be kind of leading-edge ridges for raptor migration. So those are focal points, and that's why they're used for hawk watch sites. So we saw relatively small numbers of raptors."

Could you please comment on this testimony?

- 3 A. (Brown) Can you please repeat part of that?
- 4 Q. Sure.
- 5 A. (Brown) I missed the second half of that.
- 6 O. Sure. He said that it would not be

7 characterized as a "leading line." It's

8 unlikely that it's a leading edge or a

9 leading line, based on the survey data. "We

saw relatively small numbers of raptors, and

we correlated the data we collected with data

12 from other nearby sites that are known hawk

13 watch sites. And we had significantly

14 smaller numbers on those particular days than

15 these other ridges which are known to be kind

of leading-edge ridges for raptor migration.

17 So those are focal points, and that's why

18 they're used for hawk watch sites. And this

is how he concludes, "So we saw relatively

20 small numbers of raptors."

21 A. (Brown) Okay. There are a few points in

there, so I'll start with the leading lines

assessment.

19

24

I don't believe it's easy to make that

assertion, that the site isn't a leading line or the ridgeline isn't one that's a leading line, based on the amount of data we've seen.

I believe it speaks to the need for more years of data to show that variability playing out.

And regarding the other points about comparing the site to comparable hawk watches in the area, I can -- I have a personal observation that was made on one particular day from Bald Mountain, which is located along the southeastern edge of the Tuttle Hill to Willard Mountain ridgeline. And assuming that this is similar points of view that observers had from the ridgeline where they were doing the surveys, my numbers actually showed more species, more individuals of certain species than a hawk watch at Pack Monadnock Mountain that New Hampshire Audubon runs during the same time frame.

Q. So are you saying that this project site could be a leading ridge or a leading line, but more data is needed?

- 1 A. (Brown) I would say that's fair.
- Earlier testimony, also from Mr. Valleau, 2 Q. same Day 3, October 31st, PM, Page 181, Lines 3 2 to 20, he said, typically, birds aren't 4 moving when the weather's bad. 5 "They're typically not going to be in the cloud cover. 6 You know, they can't just follow the wind 7 8 current, because you can't necessarily see the wind current. But they're looking for 9 other ridges. They're looking for other 10 11 birds migrating. So they'll see another concentration of birds and move in that 12 direction. So they like to have visibility 13 when migrating is what we think." 14

Can you please comment on that?

15

16

17

18

19

20

21

22

23

24

A. (Brown) While it may be true that birds aren't flying directly through clouds all the time, there are conditions at hawk watch sites that would actually be more beneficial when there is some cloud cover in order to actually see some of the smaller specs of distant raptors migrating; in particular, broad-winged hawks, which can be distant, are often not picked up visually against a clear

blue sky. So, cloud cover is beneficial.

- Q. So you're saying cloud cover, in some instances, increases or improves visibility?
- 4 A. Yes.

23

- Now, Mr. Valleau, on the same day, on Page
 188 of the transcript, Lines 20 to 23, said
 that, if you look at the hawk watch site
 data, which is pretty well distributed around
 New Hampshire, they always have golden eagles
 on their hawk watches. Can you please
 comment on this?
- (Brown) From the data from two hawk watches 12 Α. that New Hampshire Audubon has been involved 13 14 with over the past eight years, Pack 15 Monadnock averages between 3 and 11 golden 16 eagles per season, and that's typically with around 400 or more hours of observation 17 throughout the season. The Carter Hill 18 19 Observatory in Concord only has documented 20 four golden eagles in a total of five years, 21 with a similar number of hours of 22 observation.
 - Q. So are you saying that they're less common than the earlier testimony indicated?

A. (Brown) From that testimony, my indication
was that the expectation was that golden
eagles would be more common than they
actually are at our sites.

Q. Also from Mr. Valleau and Mr. Gravel, but this time, the next day, Day 4, November 1st, in the morning --

MS. GEIGER: I'm going to object to this. And I apologize. I should have objected earlier. I thought the ground rules going into this area of rebuttal was for the purpose of allowing the witnesses to conduct brief rebuttal of what was put in the parties' supplemental prefiled testimony. Now we're getting into -- I mean, we're getting into witnesses rebutting things that were said by other witnesses at the hearing. And Mr. Iacopino can correct me if I'm wrong, but I thought, going into this, the purpose of this brief oral rebuttal was to rebut what was in the supplemental prefiled testimony.

MR. IACOPINO: You are correct. That was the purpose of rebuttal in this. And when we sent out the memo, I

forget what date it was under, that's what
the purpose of rebuttal was to be, because we
were concerned that somebody might ask
questions on cross-examination and then rebut
the answers that they raised themselves on
cross-examination of witnesses. So you are
correct.

MS. GEIGER: Can we please have an order from the Bench limiting the scope of this rebuttal to comments of these witnesses rebutting what's been put on other parties' supplemental prefiled testimony, as opposed to what other witnesses testified to at the hearing?

MS. BAILEY: Ms. Manzelli.

MS. MANZELLI: I understand the applicable rules here would be limited to the extent that I understood the previous order. But I understood that the practice the parties have been engaging in so far during the hearing was to rebut testimony that has come in during this hearing, as well as exhibits that have come in during this hearing, which is substantive information

that we are processing and have a right to respond to.

20

21

22

23

24

MS. BAILEY: Does anybody else have anything to say about this?

Yes, I agree with MR. ROTH: what Ms. Manzelli just said. I know that in my rebuttals, I did do what Ms. Geiger is complaining about. And I believe I heard during the prehearing conference -- and I'm not going to quote you on this -- but I believe I heard Mr. Iacopino say to us at the prehearing conference that the rebuttal could be used to rebut some of the testimony that was given at least during the rebuttal by the witness who had just been sworn in. can't speak to what the order or the memorandum says. But that was my recollection. So I believe that this practice has been employed in this case thus far.

MS. GEIGER: If I might add, I mean, obviously this puts the Applicant at a disadvantage. We have the burden of proof, and we're not going to be able to rebut

anything that these witnesses -- orally rebut anything that these witnesses say here today. So, you know, if we're going to go down this path, I would respectfully ask for the opportunity to bring my witnesses back to rebut what other witnesses have said here at the hearing.

MR. ROTH: I quess I would just make one more point, and it's not to contest anything she just said, because I don't have a problem with what she said. But as I recall, again, from the prehearing conference, one of the reasons -- because I thought this practice was actually not a good practice to employ for this very reason. one of the reasons that was explained to me, that I found somewhat persuasive, was that it puts into sort of direct focus what otherwise people would sort of use a friendly cross-examination to attempt to accomplish anyway. So I think it's not a question of how -- whether the information gets in; it's a matter of how. And so I guess that's where we are.

{SEC 2012-01} [DAY 9 MORNING SESSION] {11-30-12}

1	(Discussion among Subcommittee members
2	off the record.)
3	MS. BAILEY: Okay. I am going
4	to allow you to ask questions about responses
5	that other witnesses gave that were different
6	than information that was provided in their
7	rebuttal written testimony or prefiled
8	testimony. So
9	MS. MANZELLI: Thank you. I
10	understand the ruling. But it doesn't answer
11	the question of testimony that a witness gave
12	that was not different, but additional.
13	MS. BAILEY: Okay. In that
14	case, I want you to identify who asked the
15	question that elicited that additional
16	testimony. And I don't want and I would
17	like a direct question, not, "Can you just
18	comment."
19	MR. IACOPINO: Can I just
20	MS. BAILEY: Yeah.
21	MR. IACOPINO: Ms. Manzelli, I
22	believe part of the problem is that when you
23	ask the question, you know, "What are your
24	comments on that?" it just opens the door,

which is really unfair to the other parties, 1 2 to your witness to expound even beyond just saying, I think what he said there was wrong 3 because of whatever the reason is. And 4 5 that's, I think, causing part of our problem If the Committee knows that the 6 7 witness from the other parties said A, and your witness says B, the Committee can then 8 assess the weight to give that. But to just 9 10 give them free rein is unfair because it does 11 affect the ability of the other parties to cross-examine them. 12

MS. MANZELLI: Understood.

BY MS. MANZELLI:

13

14

15

16

17

18

19

20

21

22

23

24

Q. With respect to testimony from Mr. Valleau and Mr. Gravel on Day 4 in the morning, on Page 40, Lines 4 to 4, Page 41, Lines 20 to 24, and also Pages 42 and 43, and Page 44, Lines 1 through 10, this testimony was in response to questions from -- it appears that the questions are from Mr. Robinson. And this was an ongoing Q & A between Mr. Robinson and the witnesses. I just want to make sure all of it regarded -- yes, all of

it was questions from Mr. Robinson.

That testimony indicated that no nighthawk surveys were performed during the time which they migrate, and that data was gotten on the nighthawks from other surveys. Do you believe that that's adequate?

A. (Brown) No, I don't.

1

2

3

4

5

15

16

17

18

19

20

21

22

23

24

Could I object to MS. GEIGER: this? I mean, it seems to me what's happening here is Ms. Manzelli is getting an opportunity to do recross. Because if a Committee Member asks a question, and then obviously the Applicant's witness, which this was back then, we got to do redirect, other parties were not allowed to do recross. Ι was not allowed to do recross examination after redirect. So the transcripts have been out there now for a couple of weeks. had an opportunity to review them, to develop a list of questions. I just think this is totally unfair. Not only does she have the benefit of time in reviewing the transcripts and formulating questions, but she also basically has the benefit today of doing re-

cross-examination. And I'd object to that. 1 I think these questions could have been asked 2 on cross, perhaps. But the fact that they're 3 now being asked after the Committee has had a 4 5 chance to ask questions, I thought the last thing that happened -- or has been happening 6 7 here since I've been involved, is that we do redirect, and that's the end of it. 8 I just 9 think this is getting too many bites at the apple, and I think there's got to be a 10 11 cut-off somewhere. MR. ROTH: I don't see Mr. 12 Valleau on the stand, so I don't see how this 13 I think what she just did was 14 is recross. consistent with the order of the Chair. 15 16 (Discussion among Subcommittee members 17 off the record.) Ms. Manzelli, can 18 MS. BAILEY: 19 you tell me if the response that Mr. Gravel 20 and Mr. Valleau provided in answering Mr. 21 Robinson's questions was different than what

MS. MANZELLI: I'm not sure.

I could look it up if we want to take the

{SEC 2012-01} [DAY 9 MORNING SESSION] {11-30-12}

was in his prefiled testimony?

22

23

```
1
                 But I'm not sure that their prefiled
         testimony mentioned -- characterized their
2
         nighthawk data as "incidentally gotten from
3
         other surveys," and that's the issue that
4
         we're trying to explore here.
5
                         MS. BAILEY:
6
                                       Does the
7
         Applicant know?
                                       I don't -- I'm
8
                         MS. GEIGER:
         sorry.
                  I didn't hear the question.
9
         trying to find the transcript.
10
                         MR. PATCH: Could you repeat
11
         the transcript you're referring to?
12
13
                         MS. MANZELLI:
                                         Sure.
                                                Let me
14
         just turn back to my notes here.
15
         referring to Day 4 AM, and it starts on
16
         Page 40 and extends through Page 44, to Line
17
         10.
                         MS. BAILEY:
18
                                       Ms. Manzelli,
19
         while looking that up, can I ask you how many
20
         more of these types of questions do you have?
21
                         MS. MANZELLI:
                                         Three.
22
                         MS. BAILEY: Of any transcript
23
         cites?
24
                         MS. MANZELLI:
                                         Yes.
```

1 MS. BAILEY: There's only three left? 2 MS. MANZELLI: 3 Yes. (Discussion among Subcommittee members 4 off the record.) 5 MS. BAILEY: Okay. 6 7 what we're going to do. We're going to take a 15-minute break, and you're going to 8 share -- or a 10-minute break, and you're 9 going to share with the Applicant the 10 11 transcript cites, and they're going to try to determine whether it was new information or 12 whether it was covered in prefiled direct or 13 rebuttal testimony, and we'll take it from 14 15 there. 16 MS. GEIGER: Okay. I don't think we need to take a break. I think we 17 found it in the witnesses' prefiled 18 19 testimony --20 MS. MANZELLI: Excuse me. 21 I'll withdraw the question, and I will not 22 ask the remaining questions. 23 MS. BAILEY: Okay. 24 BY MS. MANZELLI:

```
Q. So at this time, any further corrections or updates? We've covered that already; right?
```

MS. MANZELLI: Okay. So at

4 this time, the witnesses are available for

5 cross-examination. Thank you.

6 MS. BAILEY: Thank you.

7 Mr. Roth.

8 MR. ROTH: Okay. I'll see if

I can make more progress in the next hour.

10 CROSS-EXAMINATION

11 BY MR. ROTH:

- 12 Q. I'm going to start here. Ms. Foss, as I
- recall, you had -- you or Audubon had some
- role in the Granite Reliable Project; is that
- 15 correct?
- 16 A. (Foss) Yes, it is.
- 17 Q. Okay. Are you familiar with the
- 18 High-Elevation Mitigation Settlement
- 19 Agreement that was reached in that case
- 20 between the Applicant and the, believe it was
- 21 the Fish and Game Department --
- MS. GEIGER: I'm going to
- object on --
- 24 Q. -- and the Appalachian Mountain Club?

1 MS. GEIGER: I'm going to object on the grounds of relevance. 2 MS. BAILEY: He hasn't asked 3 4 the question yet. BY MR. ROTH: 5 Are you familiar with that? 6 7 MS. BAILEY: Can you give me 8 an offer of proof? MR. ROTH: Certainly. 9 The offer of proof is that, in the Granite 10 11 Reliable case, there was a High-Elevation Mitigation Settlement Agreement which was 12 reached between the project proponent, the 13 14 New Hampshire Fish & Game Department and the 15 Appalachian Mountain Club. Under the terms 16 of that --17 CHAIRMAN IGNATIUS: Mr. Roth, can I -- can you just give us -- not fully 18 testify on what you think the answer is? 19 20

What I'm hoping to hear is where you're heading with the question, and why is it relevant to this case.

MR. ROTH: Okay. There was land that was put into conservation use,

21

22

23

1 basically fee-simple to Fish and Game, and it

- was subject to certain conditions and
- provisions. And there's been a lot of
- 4 testimony in this case, and including by
- these witnesses, I believe, about Forever
- 6 Wild easements and whether they are
- 7 infrequent or whether they're common or
- 8 whether they've ever been done in cases like
- 9 this, and I wanted to ask about that.
- 10 CHAIRMAN IGNATIUS: All right.
- 11 Well, if you can focus it on the Forever Wild
- 12 easements that there's been testimony about,
- 13 and really zero in on that and not general
- 14 discussion about Granite or other cases, that
- would be helpful.
- MR. ROTH: Oh, yeah. Believe
- me, I don't intend to do that. There's a lot
- in this document. I really want to zero in
- on Forever Wild.
- 20 BY MR. ROTH:
- 21 Q. So the basic question was: Are you familiar
- 22 with the agreement that was reached?
- 23 A. (Foss) In general, not in detail.
- 24 Q. Okay. And is it -- in your general

1 understanding, did you -- do you believe that

- permanent conservation of approximately
- 3 1700 acres of high-elevation use for habitat
- 4 was provided?
- 5 A. (Foss) Yes.

13

14

15

16

17

18

19

20

21

22

23

24

- Q. I put my ear to the microphone. That was clever.
- And that there was an additional

 620-acre conservation parcel that was also

 put into permanent conservation?
- 11 A. (Foss) Again, I'm familiar with it in 12 general, but not in detail.
 - Q. Okay. I'm going to show you a page from the High-Elevation Mitigation Settlement Agreement, which in the Granite Reliable Power case was introduced by the Applicant as Petitioner's Exhibit 48. The pages aren't numbered, but this appears to be Page 3 of that document. I'm going to give you Pages 2 and 3.

Now, of course, I'm flying blind here.

But on Page 2, which is the first page you're looking at, there's some highlighted text there. Can you read that for me, please?

```
1
         (Foss) This is under the section of
    Α.
         Mitigation Provisions, No. 1. "GRP shall
2
         secure the permanent conservation of the
3
         following lands above 2700-feet elevation,
4
5
         plus or minus, per A.7, totaling
         approximately 1735 acres through transfer of
6
7
         fee title to New Hampshire Fish and Game or
8
         other appropriate state agency, approved by
         New Hampshire Fish and Game.
9
10
         Thank you. I'm sorry?
    0.
11
         (Foss) I was just going to say, and there
    Α.
         follows specific descriptions of parcels.
12
         Thank you. Now, on the following page
13
    Q.
14
         there's some highlighted text. I'm not going
15
         to ask you to read that into the record, but
16
         just read it for yourself.
17
                (Witness reviews document.)
                         MS. GEIGER:
                                      Could I see a
18
19
         copy of what she's reading, please?
20
                         MR. ROTH:
                                    It's the only one I

MS. GEIGER: I'm going to object to information -- or object to the questioning along these lines, because it's clear from that document and from the question -- excuse me -- from the information Ms. Foss has just put into the record about what's in that document, it relates to permanent conservation of high-elevation lands which are above 2700 feet. And in this particular case, we have heard testimony, I think have evidence in the record, that the site in Antrim for the Antrim Wind Project is not at that high elevation and not considered a high-elevation habitat because it's under 2300 feet. So I'm not sure what the High-Elevation Mitigation Settlement Agreement has to do with the Antrim site,

{SEC 2012-01} [DAY 9 MORNING SESSION] {11-30-12}

which does not have high-elevation areas.

And in addition to that, I
think it's important to note that Fish and
Game intervened in the Granite Reliable
project docket and was a party to that
proceeding, and they're not a party to this
proceeding. And I understand that none of
the Committee members sitting here today sat
on the Granite Reliable project, so I'm just
offering this information by way of
background.

MR. ROTH: She's making an argument, and that's fine for a closing memorandum. But I think yesterday we heard testimony from Mr. Jones who said that, yeah, it's not above that elevation, but it's habitat representative of the same type of habitat.

In addition, the purpose of this is not to say that this is high-elevation spruce-fir habitat and that it necessarily should have a high-elevation mitigation settlement, but simply to point out that in another case before this

Committee, not that long ago, mitigation through conservation easements was done by permanent conservation. What I think -- and I'm going to ask the witness to confirm that this is Forever Wild.

MR. FROLING: Madam Chairman,
I'd like to address this as well.

MS. BAILEY: Mr. Froling.

MR. FROLING: Can I have the document? This appears to be two pages of an agreement between --

MS. BAILEY: Could you use the microphone, please?

MR. FROLING: This appears to be an agreement between two parties. I can't tell from the two pages that I have of it even who the parties are, let alone the context of the agreement. I don't have the benefit of sitting through the Granite Reliable case. Others here may have done that. But this appears to be -- I don't know why this would be introduced. It hasn't been offered in the case. I don't think we should be relying on agreements that we don't even

1	know the context or the parties.
2	MR. ROTH: This is
3	cross-examination. I'm simply asking you
4	know, we're going to be here a really long
5	time if everything the parties try to do is
6	met by a phalanx of objections and discussion
7	like this. But I'm simply trying to ask the
8	witness about the provisions of this
9	agreement. The Committee can take judicial
10	notice of the entire agreement. It's in the
11	record of the Granite Reliable case. And I'm
12	simply trying to ask the witness to confirm
13	that those provisions that are in there look
14	like a Forever Wild conservation package.
15	(Discussion among Subcommittee members
16	off the record.)
17	MS. BAILEY: Okay. I am going
18	to defer the Presiding Officer title to the
19	Chairman, because she will deal with this a
20	lot faster than I will.

CHAIRMAN IGNATIUS: I don't know about faster, but...

Mr. Roth, I'd asked you to be very specific in your question about Forever

 $\{SEC\ 2012-01\}\ [DAY\ 9\ MORNING\ SESSION]\ \{11-30-12\}$

Wild easements, and you said you would do
that. And then we got into whether or not
Ms. Foss was familiar with an agreement
reached in another document, and she said she
was not, other than in a very general sense.
So, again, getting into everything about the
other docket, questions about what else was
in that -- we're not taking judicial notice
of the entire record. That's not going to
become part of this record. We've got enough
to deal with in this record.

Now, the fact that you want to talk about Forever Wild easements is fine. I told you that. But --

MR. ROTH: I'm trying to get there.

CHAIRMAN IGNATIUS: Well, then get there. We don't need to talk about Granite Reliable. You said you wanted to ask about Forever Wild easements. Why don't you ask the witness if she know about them, what do they entail, and what you think is good or bad about them, rather than what happened in Granite Reliable.

MR. ROTH: I was asking her -that's what I was going to do before I met
the objections. But all I asked her to do is
read Paragraph 3 of this document. And there
are provisions in there that describe this

6 particular grant, and I was going to ask her

8 see in a permanent Forever Wild grant.

Now, if I may proceed with the question?

if those are reflective of things you would

11 CHAIRMAN IGNATIUS: If you
12 please will focus it on what a Forever Wild
13 easement is, as opposed to what happened in

Granite Reliable, I think that's fair.

MR. ROTH: I'm trying to do

16 that.

7

9

10

14

17 BY MR. ROTH:

- Q. Would a Forever Wild easement or grant
 include, such as you just read in this paper
 that I just showed you, restrictions on
 future development and timber harvesting
 being prohibited?
- 23 A. (Foss) Yes.
- Q. Would it include restrictions on operation of

- 1 motorized recreational vehicles?
- 2 A. (Foss) Yes.
- 3 Q. Would it prohibit additional roads or
- 4 structures?
- 5 A. (Foss) Yes.
- 6 Q. Would it -- okay. That's all. Thank you.
- 7 On that.
- Now, Ms. Foss, you've had an opportunity
- 9 to review the ABPP and other documents in
- 10 this file; correct?
- 11 A. (Foss) Correct.
- 12 Q. Did you find in there, anywhere, an adequate
- 13 plan for managing existing or created habitat
- 14 for nighthawks?
- 15 A. (Foss) Not in the last versions that I have
- 16 reviewed.
- 17 Q. Okay. Do you believe that there are things
- 18 that could be done to do that? And if so,
- 19 what would they be?
- 20 A. (Foss) Yes. I mean, the first thing that
- 21 would need to be done would be surveys to
- determine whether or not nighthawks were
- nesting on the site. And as I think we've
- seen with the Lempster case, this is not --

this is not something that can necessarily be
determined in the first year or two

post-construction. It would need to be done
on an annual basis during the operation of

We're still working with the owners and operators of the other facility to come up with an appropriate strategy for dealing with this situation. We have a conference call scheduled in a couple of weeks to come up with a plan for 2013. There's a little more research that's going to need to be done in the field before we can come up with a specific plan. So I can't offer specific -- a specific mitigation strategy at this time. That's going to be somewhat dependent on the exact situation. But I do believe that mitigation will be possible.

- Q. Were you here when Trevor Lloyd-Evans testified?
- 21 A. (Foss) I was not.
- Q. So you have not had an opportunity to review his testimony?
 - A. (Foss) I have not.

the facility.

- 1 Q. How about his prefiled written testimony?
- 2 A. (Foss) I read it, but that was some months
 3 ago.
- Okay. Now, in your prefiled testimony, you 4 Q. mentioned that migrating golden eagles 5 typically migrate at altitudes of 6 7 approximately 100 to 200 meters above ground level over summits, ridge tops, cliffs, et 8 cetera. And that's on Page 4 of your 9 10 original prefiled. Is that 100- to 200-meter 11 area, from your knowledge, is that within the

rotor sweep of this project?

13 A. (Foss) I believe it is.

12

20

21

22

23

- Q. Okay. In your testimony on Page 5, you speak
 of the "documented passage rate" for Antrim
 Wind. That's at the bottom of Page 5. And
 is that documented passage rate calculated by
 the Applicant's people, or is that somebody
 else?
 - A. (Foss) I calculated passage rates based on the number of hours of observation at this site and a number of other sites, and the number of a given species that was observed during that passage rate -- I mean during

that time period. And I did limit the time
periods to the migration period of the

- 3 species in question.
- 4 Q. So that .020 GE per hour, that's your figure?
- 5 A. (Foss) Correct.

- Q. Okay. Do you think that the information that
 you relied upon is sufficient to know for
 sure what the passage rate would be?
 - A. (Foss) I guess I'm not entirely clear on the question. I mean, a passage rate for a given species at a given site is going to vary from year to year, in all probability. So I would want to express it as an average passage rate over at least five years if I was going to generalize about a passage rate at a given site.
 - Q. But does more information improve your confidence level in stating a figure? And I don't mean year to year. But in any given year, if you were to spend more hours and more days in the field making observations and counts --
- 23 A. (Foss) You would have a more accurate passage rate.

```
1 Q. Okay. Now, this is in Ms. Foss's
```

supplemental testimony, but I think it

perhaps is a question better for Mr.

4 Nickerson, given his experience with golden

5 eagles and eagle permits and the like. And

6 this is -- your testimony is about, I

believe, the ABPP. And on Page 2 of your

8 testimony, you say, "This section should" --

9 the Bald and Golden Eagle Protection

10 section -- "should state that at the present

11 time, the USFWS is issuing no incidental take

permits for golden eagle east of the 100th

meridian."

So do I take from that, that even if the

15 Applicant wanted to get a golden eagle take

16 permit, it could not do so?

- 17 A. (Nickerson) That's correct.
- 18 Q. And what would it mean to the project if they
- 19 were to kill a golden eagle?
- 20 A. (Nickerson) That would depend upon the

21 negotiations between them and the U.S. Fish

22 and Wildlife Service. A lot of it would

depend upon the extent on which they tried to

24 mitigate the likelihood that a golden eagle

would be taken. Fish and Wildlife Service

- 2 has prosecutorial discretion in cases like
- 3 this.
- 4 Q. Have there been any golden eagle kills in the
- 5 Northeast or in the East in general?
- 6 A. (Nickerson) I'm not -- by wind? By wind?
- 7 O. Yes.
- 8 A. (Nickerson) I am not aware of any.
- 9 Q. Okay. Now, Ms. Von Mertens, I'm going to ask
- 10 you about the Forest Legacy Program, but I'm
- not going to ask any details about repeating
- 12 how it's done or anything. And I have a very
- 13 specific question -- well, one very specific
- question and another for a little more
- 15 detail.
- The first one is: It's my understanding
- 17 that the Forest Legacy Program has
- 18 contributed funds in various ways to conserve
- 19 properties that are in the "Super Sanctuary"
- and around it. Is that a fair summary?
- 21 A. (Von Mertens) That's correct.
- 22 Q. Okay. And are there other properties around
- the project area that might be under
- consideration or eligible for future

consideration as being in the or put in the Forest Legacy Program?

- A. There was one recently completed, Crotched

 Mountain in Greenfield, abutting the town of

 Antrim, and that was just in the news two

 months ago. The Forest Legacy funds were

 approved -- I'll be brief.
- Q. Yeah, I'm going to stop you right there
 because I'm not interested in projects that
 have already been approved by Forest Legacy.
 I'm asking you about whether there were
 properties -- and again, I know this is
 perhaps secret information. But are there
 properties around Antrim or in Stoddard or
 other adjacent to or near the project that
 might be considered for Forest Legacy?
 - A. (Von Mertens) Forest Legacy has four main criteria. Can I state those? I know you're familiar with them, but I think it's helpful.

 CHAIRMAN IGNATIUS: Briefly.
 - A. (Von Mertens) It's intact forests, which
 means not fragmented; it's wildlife habitat;
 it's aesthetics, how we view them; and
 recreation. They're open to the public. And

so those four criteria, yes, it's as we've 1 all heard in testimony.

resource-rich area. So, yes, there are large 3

It's a very natural

blocks of intact forest that would qualify. 4

BY MR. ROTH:

10

11

12

13

14

15

16

17

18

19

20

- Okay. Do you think that the presence of the project might have an adverse effect on the ability of those other possible projects to qualify under the Forest Legacy Program?
- (Von Mertens) I think the life of the Α. project, as I understand it, cannot go beyond 50-odd years. And I think... I think those in charge know that -- can look that far in So I don't know. the future. I would hope that people would be farsighted enough to -so I guess I don't know.
- Q. But it is possible that the fragmentation and visual effects of the project might make the Forest Legacy Program decide to look elsewhere?

21 CHAIRMAN IGNATIUS: I think 22 she just said she didn't know, didn't she?

23 (Von Mertens) It's possible.

BY MR. ROTH: 24

```
1 Q. Now, do you have, or can you point out on the
```

- 2 map that's behind you -- I guess I want to
- understand better what -- because when I look
- 4 at all your testimony, I still have only sort
- of a vague idea about where the Super
- 6 Sanctuary is and what are the conserved lands
- 7 surrounding the project. Is that something
- 8 you can --
- 9 A. (Von Mertens) Can we look at exhibit -- there
- is a map. It's ASNH Exhibit 3.
- 11 Q. Okay.
- 12 A. (Von Mertens) I believe this is the only map
- in the record that gives an accurate
- delineation of Audubon's dePierrefeu-Willard
- Wildlife Sanctuary.
- MR. IACOPINO: If I might, I
- 17 actually have colored paper copies for the
- 18 Committee, because when I scanned it, it was
- only a black and white. I'm just going to
- 20 pass these out to you.
- 21 A. (Von Mertens) And I'll be happy to point out
- 22 Forest Legacy land here.
- 23 BY MR. ROTH:
- 24 Q. Let's wait until we're all -- are we there?

```
MR. IACOPINO:
                                        Ms. Manzelli,
1
         did you make these available to everybody?
2
                         MS. MANZELLI: Not in color on
3
4
         paper.
                         CHAIRMAN IGNATIUS:
5
                                              Perhaps if
         each party, if there are enough to go around,
6
7
         each party have one copy; that way, if Ms.
         Von Mertens refers to a color, everyone will
8
         know what that reference is. So if you can
9
         look on each other's, that would help.
10
11
                         MS. MANZELLI:
                                         I did
         distribute all the Audubon exhibits
12
         electronically, and those are in color.
13
                         CHAIRMAN IGNATIUS:
14
                                              I know.
         Our scanned version is black and white.
15
16
                         MS. MANZELLI: Oh, okay.
17
                         MR. IACOPINO:
                                        Because it's in
         the first set that was provided before you
18
         were involved.
19
20
                         MS. MANZELLI: My apologies.
21
    BY MR. ROTH:
22
         Okay. Ms. Von Mertens, you were about to
23
         describe the Forest Legacy aspects of the
         project. I think this picture gives a pretty
24
```

{SEC 2012-01} [DAY 9 MORNING SESSION] {11-30-12}

good idea of what the Audubon Sanctuary 1 configuration is, and now I understand it 2 much better. But which of these is sort of 3 Forest Legacy money and --4 5 CHAIRMAN IGNATIUS: I'm sorry, I thought your question was, how 6 Mr. Roth. 7 do the proposed conservation lands relate to what's been called the "Super Sanctuary," as 8 opposed to funding sources? 9 10 MR. ROTH: That's correct. 11 And what she did is she provided -- or once we got a look at this chart, I thought what I 12 just said was, I think I understand now what 13 14 the Super Sanctuary and the conservation land 15 looked like with respect to the project area. 16 Now I'm asking her to describe how it was 17 funded. CHAIRMAN IGNATIUS: 18 And why is that relevant to this case? 19 20 MR. ROTH: Because I think 21 there's Forest Legacy money in there and --22 CHAIRMAN IGNATIUS: And why is

has to make?

that relevant to the decision this Committee

23

MR. ROTH: Because there was discussion with Ms. Vissering a few days ago about whether these properties were of so-called "statewide significance." And one of the criteria for that was, at least explained by some witnesses, whether it had public funding behind it. So I'm trying to show that there's public funding behind the Audubon Society's conservation projects surrounding the project.

CHAIRMAN IGNATIUS: All right.

Anything you can do to focus the questions

and not have a general discussion about

programs and criteria would be helpful.

Thank you.

MR. ROTH: I'm just asking her to describe which of these parcels had Forest Legacy money, and if you know how much.

A. (Von Mertens) There was one Forest Legacy grant, and it was called "Forest Legacy Willard Pond, Phase 1 and Phase 2." Phase 1 expanded the sanctuary to the -- stretching down to the southwest 376 acres. That was about -- it was over a half-million dollars.

1 Five hundred and something. That was Phase

- Phase 2 was what Jeff Jones talked about
- 3 yesterday; it was \$3 million. And that's --
- the Stoddard line there -- this map doesn't
- 5 show it -- it's 1700 acres. I believe you
- 6 can see Robb Reservoir there. But those
- 7 1700 acres aren't clearly delineated here.
- 8 And there also was an LCHIP grant from the
- 9 state, and that's federal money administered
- 10 by Division of Forest Lands. There was also
- 11 federal -- local matches required. And so
- there was an LCHIP grant of \$250,000, and I
- believe Fish and Game contributed \$150,000.
- 14 So that's federal and state investment in the
- 15 forest and aesthetics and recreation and
- 16 wildlife habitat.
- 17 Q. Thank you. Now, you've had an opportunity to
- 18 review the conservation easements that have
- 19 been proposed for this project?
- 20 A. (Von Mertens) I have.
- 21 Q. Is it your understanding that those easements
- are proposed for all of the properties that
- are part of the project?
- 24 A. (Von Mertens) It's my understanding that they

1 are not.

5

- Q. So there are some that will not be at all easemented or conserved --
- 4 A. (Von Mertens) And those are indicated on this
- 6 Q. Okay. Which ones are those?

ASNH Exhibit 3.

- 7 A. (Von Mertens) They're the red cross-hatched, 8 one, two, three, four properties.
- 9 Q. Okay. Thank you.
- 10 MS. GEIGER: Could I just ask?
- I want to make sure I understand what's on
- this map. Ms. Von Mertens, does this map
- depict the project --
- 14 MR. ROTH: I'm sorry. You can
- ask questions when it's your opportunity to
- do cross-examination.
- 17 MS. GEIGER: I'm sorry. I
- 18 just wanted to make sure I understood what
- 19 was being shown here. But I'll wait until
- 20 cross. I apologize.
- MR. ROTH: That's okay.
- 22 BY MR. ROTH:
- 23 Q. Is there anything special about the
- 24 project -- the properties that don't have

conservation easements on them?

A. (Von Mertens) It's fragmented the conservation. The conservation easements are applied to a certain percentage of the project impact area and the ridgeline.

CHAIRMAN IGNATIUS: Can I clarify? Because I also misunderstood, and I think what Ms. Geiger was asking about -- so, Mr. Roth, I'm going to ask it.

You said the areas that are under the Company's -- the areas that do not have conservation easements are in red cross-hatching. But that looks different from my reading of the legend. Is that correct?

A. (Von Mertens) The four conservation easement properties have the diagonal red striping.

And the five properties -- I'm not sure my math is right. But the properties that are not -- that are under lease, that do not have protection, are outlined in red, but do not have the cross-hatching. And this map is -- I think there's been some -- have been a couple changes in the locations of the

1 turbines. But this is pretty close.

2 CHAIRMAN IGNATIUS: All right.

3 So I think --

way around.

6

10

MR. ROTH: I understand the confusion now, because the cross-hatch was --

(Court Reporter interjects.)

7 MR. ROTH: I think she earlier 8 testified that the cross-hatch was the 9 unconserved areas, but in fact it's the other

- 11 A. (Von Mertens) Thank you. I'm sorry.
- Q. Now, Ms. Von Mertens, have you looked at the project's proposals with respect to control of invasive species?
- 15 A. (Von Mertens) I've looked through -- I've

 16 done a word search for "invasive species"

 17 with what's been entered into the testimony

 18 so far.
- 19 Q. Have you found a plan in there for controlling invasive species?
- 21 A. (Von Mertens) I've found -- and this is not
 22 to say there wasn't mention that I didn't
 23 find. So what I did find had to do with
 24 construction period only.

Q. Okay. Is there a program for dealing with invasive species after construction?

A. (Von Mertens) Not that I could find.

3

16

17

- Q. Okay. Are you aware of any other projects
 that have been certificated by the Committee
 that have invasive species programs?
- 7 (Von Mertens) Again, I did a search. And I Α. believe it's Granite Reliable that has one of 8 the conditions. And I might have this 9 reversed. But I believe it's 23 made mention 10 11 about invasive species. This is plant species, upland plant species. But, again, 12 only during the construction stage, and it 13 14 mentioned two species in particular. Ι 15 couldn't find anything else.
 - Q. Is there anything that you would recommend to the Committee for including as a condition for invasive species control?
- A. (Von Mertens) The main challenge -
 MS. GEIGER: I'm going to

 object to the question. It seems to me that

 this is the type of thing that the witnesses

 could have put in their prefiled direct

 testimony. I'm just hearing about this from

```
this group of witnesses right now for the
first time, and I guess I wonder why.
```

CHAIRMAN IGNATIUS: Mr. Roth, is this in response to something that's come up from another witness, or could it have been addressed previously?

MR. ROTH: I didn't prepare
the witness's testimony, so I don't know what
she could or what she might have put in it
with respect to it. But I think she does
mention invasive species in her testimony.

And so --

13 CHAIRMAN IGNATIUS: Where is 14 that?

A. (Von Mertens) Could I just mention one -
CHAIRMAN IGNATIUS: No, please
hold on. I'm sorry.

MS. MANZELLI: Excuse me.

Unless, Francie, you have a citation to where

you discuss invasive species in your testimony, then I believe the Committee would allow you to speak to that.

A. (Von Mertens) I don't believe I did mention invasive species.

{SEC 2012-01} [DAY 9 MORNING SESSION] {11-30-12}

MR. ROTH: Okay. I'll

withdraw that question then.

- 3 BY MR. ROTH:
- 4 Q. Ms. Von Mertens, you talked in your testimony
- about Willard Pond being a premiere trout
- 6 pond. Is that pond stocked with trout, or
- 7 are they native?
- 8 A. (Von Mertens) It is, I believe, both.
- 9 O. So who stocks the trout?
- 10 A. (Von Mertens) I'm afraid you're asking the
- 11 wrong person.
- 12 Q. Would that be the Fish and Game Department?
- 13 A. (Von Mertens) I don't know.
- 14 Q. Mr. Brown, do you know the answer to that?
- 15 A. (Brown) Yes, I believe New Hampshire Fish and
- 16 Game does stock the trout.
- 17 O. And are there also native trout in the pond?
- 18 A. (Brown) I would clarify that. Possibly those
- 19 trout are naturalized. I'm not sure if
- 20 they're a native trout.
- 21 Q. While we're on this subject, I note in your
- testimony, Mr. Brown, that you said you spoke
- to fishermen who say that the presence of the
- 24 project would, if I'm remembering it

correctly -- I'll just get to it.

2

3

4

5

6

7

8

9

10

You said, "Many of the fishermen I spoke to that morning expressed their unsolicited opinions of how the proposed wind facility would negatively affect their fishing experience here."

Now, the question is: First of all, don't you agree that fishermen are notorious liars?

[Laughter]

- 11 Q. That aside, do you think those statements by those people were credible?
- 13 A. (Brown) In what way can I say --
- 14 Q. Well, do you think they were being sincere?
- 15 A. (Brown) Sincere. That's how I interpreted it.
- 17 Q. Okay. I recall one witness -- or one person,
- and I can't remember which witness said this,
- 19 but may be it was you, Mr. Brown, that the
- 20 fishermen complained that the fishing wasn't
- 21 particularly good. Do any of you remember
- who actually made that comment? That was
- you, Ms. Von Mertens?
- 24 A. (Von Mertens) I have a friend, Ed Henault,

who I mentioned in my testimony. And again,
this is anecdotal. But we talk about the
Patriots and fishing quite a lot. And he
came back from fishing one day, and I said,
"How did it go?"

And he said, "Oh, I didn't catch anything. But that's not what it's all about."

Q. Maybe he's just not very good at it.

- 10 A. It could be. But he saw an osprey and said
 11 the osprey had better luck fishing than he
 12 did.
 - Q. Do any of you believe that the water quality or the fishing opportunities in the pond will be affected by the construction of the project?

CHAIRMAN IGNATIUS: Can I -- I think you want to focus that on any witness who spoke to that in their testimony and not just generalized among the four, so that we have some kind of control here.

A. (Von Mertens) I spoke about water quality, and it was -- the word "pristine" is what people use for Willard Pond. And I wasn't

```
1 talking about the water quality with fears of
```

- water-quality degradation because of the
- 3 project. I was talking about the experience,
- 4 the pristine experience that draws people to
- 5 Willard Pond, including water quality,
- fishing, visual, et cetera.
- 7 Q. Now, Mr. Brown, you spoke about aesthetics
- and the management of the sanctuary. Are you
- familiar with Ms. Vissering's testimony?
- 10 A. (Brown) Somewhat.
- 11 Q. And are you aware that she recommended that,
- as mitigation, among other things, the
- project take out Turbines No. 9 and 10?
- 14 A. (Brown) I think I recall that.
- 15 Q. And replace those -- replace all of them,
- minus 9 and 10, obviously, with smaller
- 17 turbines?
- 18 A. (Brown) Okay.
- 19 Q. You remember that?
- 20 A. (Brown) I believe I remember that.
- 21 Q. Do you agree with those recommendations?
- 22 A. (Brown) From what perspective would I have
- that decision to make?
- 24 Q. That's a fair question. Do you believe that

```
if those two things were to occur, would that
```

- 2 satisfactorily mitigate the impact, the
- aesthetic impact of the project on the
- 4 sanctuary?
- 5 A. (Brown) I think that could help mitigate.
- But essentially, it's mitigation rather
- 7 than --
- 8 Q. Avoidance?
- 9 A. (Brown) -- not having the turbines
- 10 themselves.
- 11 Q. Now, you spoke -- I think it was in your
- rebuttal -- about the need for more data.
- 13 Are you aware that in Granite Reliable and
- 14 Groton, the Committee required three years of
- 16 studies?
- 17 A. (Brown) Are you addressing me?
- 18 Q. Yes, Mr. Brown.
- 19 A. (Brown) I seem to recall that.
- 20 Q. Okay. And do you think that that would be an
- appropriate thing to do in this case as well?
- 22 A. (Brown) Yes.
- 23 Q. Okay. And I believe in response to a
- question from Ms. Manzelli, you said that you

thought that the project site could be a leading line.

3

4

5

6

7

8

9

10

23

24

What is the evidence that you would refer to, to support that assertion?

- A. (Brown) Well, I don't have any evidence to support that. But I don't think there's any evidence that speaks against that, either.

 Just speaking to the need for more data collection to determine that. It certainly would be possible.
- 11 Q. So there's no observations that you made that

 12 lead you to that conclusion, other than the

 13 fact that it wasn't done?
- 14 (Brown) I have one observation, one Α. 15 comparable, in looking at one day of data 16 collection for the period of two hours, 17 comparing that to Pack Monadnock and looking at the comparable numbers of raptors of 18 19 certain species between the two sites. 20 what I saw could indicate that there would be 21 essentially good migration patterns along 22 that ridge.
 - Q. So is Pack Monadnock recognized as a leading line or edge as it's --

- 1 A. I think it's generally recognized as that.
- Q. Okay. How has bald eagle use been documented
- within the sanctuary? Have you seen them?
- 4 A. (Brown) Yes, probably mainly incidentally.
- 5 But also on dedicated hawk watching days from
- 6 various points, I would say the bald eagles
- are fairly common visitor to the sanctuary
- 8 itself, in both migration and during the
- breeding season and other times of year.
- 10 Q. Based on your work at the sanctuary -- and I
- take it you're there sort of full time? Is
- 12 that --
- 13 A. (Brown) No.
- 14 Q. No?
- 15 A. (Brown) I did spend one year as a resident,
- as I stated in the testimony.
- 17 Q. Okay.
- 18 A. (Brown) But I'm a frequent visitor.
- 19 Q. Okay. And you're familiar with the people
- who use it, the user groups and populations
- 21 that go there?
- 22 A. (Brown) Somewhat.
- 23 Q. Do you think that the presence of the wind
- 24 project up on the ridge above the sanctuary

- and the pond will negatively impact
 visitation to the sanctuary and the pond?
- A. (Brown) I do think that that would limit visitation to the pond and the sanctuary.
- Q. Okay. There were some questions the other day about clearing of the summit of Goodhue Hill. When was that cut down?
- (Brown) It's been -- it's complete now. 8 Α. But the majority of the cutting I believe 9 10 occurred last winter. It was a two-year 11 operation, and I'm a little vague on my memory of actually when that cut was begun 12 13 and completed. But it was all completed by the end of this past winter. 14
- 15 0. When was the decision made to do that?
- A. (Brown) I don't recall exactly when. But it was guided by a forest management plan.
- Q. Okay. When you made the decision to do that,
 were you aware that there was a proposal to
 construct a wind farm on the other side of
 the pond, up on the ridge on the opposite
 side?
- 23 A. (Brown) I don't recall if I was aware of that.

```
1 Q. Okay. There has been some discussion about
```

- whether the sanctuary and the pond are used
- at night and in the winter time. Mr. Brown,
- 4 have you seen or are you aware of people
- 5 using the property at night?
- 6 A. (Brown) Yes, it certainly does occur. And
- 7 I've seen that firsthand, both unregulated
- and on authorized Audubon field trips.
- 9 Q. So I understand that the -- I can't remember
- 10 whose testimony it was in, but somebody said
- the sanctuary is officially closed at night.
- 12 Is that correct?
- 13 A. (Brown) The trails are closed from dusk
- 14 through dawn.
- 15 Q. But people go in there, anyway?
- 16 A. It does happen occasionally.
- 17 Q. Is the boat ramp and the pond closed in the
- 18 dark?
- 19 A. (Brown) I'm not certain of what Fish and
- 20 Game's rules say about that. But the boat
- 21 ramp and the pond are both used at night as
- 22 well sometimes.
- 23 Q. Okay. And how about in the wintertime? Is
- the sanctuary closed in the winter?

- 1 A. (Brown) No, it's open all winter.
- 2 Q. The roads are plowed all the way in there?
- 3 A. (Brown) It is.
- 4 Q. And who plows the road in there?
- 5 A. (Brown) I believe the Town of Hancock is
- still doing the plowing.
- 7 Q. Right up to the boat ramp?
- 8 A. (Brown) Yeah, typically to the boat ramp.
- 9 Q. And what kind of activities go on there in
- 10 the wintertime?
- 11 A. (Brown) Guided field trips, skiing,
- snowshoeing, hiking. You know, pretty much
- 13 everything except the water-based activities
- 14 that occur throughout the year.
- 15 Q. No ice fishing?
- 16 A. (Brown) No, it's fly fishing only.
- 17 Q. Is it catch and release?
- 18 A. (Brown), No. Not as far as I know.
- 19 Q. Mr. Brown, in your testimony on July 31st, on
- 20 Page 6 -- and this is really just a
- 21 clarification point for me -- you say, "An
- 22 old logging road and relatively newly created
- foot trail provide foot access to and around
- this parcel" -- which I think you're

```
1 referring to the Tamposi parcel -- "on which
```

- a conservation easement is held by the State
- of New Hampshire."
- 4 A. (Brown) Yes. What is the question about
- 5 that?
- Q. The question is: Is that Fish and Game or some other agency that holds that easement?
- 8 A. (Brown) That's the Forest Legacy easement 9 that was being referred to before.
- 10 Q. Okay. And which part of the State holds
- 11 that? Is it Fish and Game or DRED? Or do
- 12 you know?
- 13 A. (Brown) I believe the Department of Resources
- 14 and Economic Development.
- 15 Q. Okay. That's all my questions. Thank you
- very much all, of you.
- 17 CHAIRMAN IGNATIUS: Thank you.
- 18 Mr. Froling.
- 19 MR. FROLING: I have a few,
- very brief questions about Forever Wild
- 21 easements.
- 22 CHAIRMAN IGNATIUS: Thank you.
- 23 And can you borrow one of the microphones?
- MR. FROLING: I'd be delighted

1 to.

3

8

9

10

11

12

2 CHAIRMAN IGNATIUS: Thank you.

CROSS-EXAMINATION

- 4 BY MR. FROLING:
 - Q. I believe these are all directed to Ms. Von

 Mertens, who I know. But I'll introduce

 myself. I'm Stephen Froling, and I represent
 the Harris Center.

Could you show the Committee where the Tamposi easement is -- that is to say, where the Forest Legacy is easement on this map?

Can you just point to it?

- 13 A. (Von Mertens) On ASNH Exhibit 3 that I
 14 referred to earlier, you can see "Bald
 15 Mountain" written there.
- 16 Q. Yes.
- (Von Mertens) And it's 376 acres. And Phil 17 Α. Brown might have to help me here. 18 I know it goes down to the southwest to the road. 19 20 can see that there's a trail down through 21 there. That's the Tamposi easement. 22 up close to the summit of Bald Mountain and 23 then cuts due east to where the logo of the 24 sailboat -- well, a little south of that.

But it's -- is it okay for Phil to help me

out there? He's -- how did I do?

- 3 A. (Brown) I think you described it pretty well.
- It doesn't contain the entire trail leading
- 5 up from the junction of Willard Pond Road,
- 6 but it is the higher elevations to the west
- of Willard Pond Road and south of the summit.
- 8 Q. Sorry. Do you know or can you tell from the
- map behind you whether that's an area that
- includes highest-ranked habitat in the state?
- 11 A. (Von Mertens) It does.
- 12 Q. Do you know whether that's a Forever Wild
- 13 easement?
- 14 A. (Von Mertens) Insofar as -- it's not. It
- allows commercial logging following a forest
- 16 management plan.
- 17 Q. Is it a requirement of that easement, that
- 18 there be logging?
- 19 A. (Von Mertens) Forest Legacy is for forestry
- 20 resources. Yes, it is. There is.
- 21 Q. Can you show the Committee where the Gilbert
- 22 easement is?
- 23 A. (Von Mertens) Just a -- can I do a postscript
- 24 to that? And again, Phil Brown, oversees the

```
forest management plan. I believe that there
are no cut areas designated on the Tamposi
```

- Forest Legacy parcel. That would be Forever
- Wild. But I need to check with Phil to make
- 5 sure that's true.
- 6 WITNESS BROWN: Do I have
- 7 permission?
- 8 CHAIRMAN IGNATIUS: Yes,
- 9 please.
- 10 A. (Brown) Yes, that is the case. The forest
- management plan did specify that certain
- stands would be left uncut, as long as -- at
- least in this round of management.
- 14 Q. Is it also true that you amend that forest
- 15 management plan or steward plan every 10
- 16 years and redesignate those lands?
- 17 A. (Brown) I can't recall if it's 10 or 15. It
- may be a 15-year redesignation.
- 19 Q. But it is a requirement that you consider and
- amend it from time to time.
- 21 A. (Brown) Yes.
- 22 Q. Can I move to the Gilbert parcel? Can you
- show me where the Gilbert parcel is on that
- 24 map?

```
1 A. (Von Mertens) Yes. There's Willard Pond,
```

- blue. And it's 130 acres that cover about a
- 3 third of the shoreline, and it goes back into
- 4 the upland.
- 5 Q. Does that easement include land which is
- 6 highest-ranked habitat in the state?
- 7 A. (Von Mertens) It does.
- 8 Q. Is that a Forever Wild easement?
- 9 A. (Von Mertens) Again, there are areas there
- that, through forestry management, are no-cut
- 11 areas. And then there are areas -- you know,
- 12 I could go into more detail. It was
- 13 clear-cut by the owner before, so there
- 14 was -- it's forest management. Audubon does
- 15 guide its forest management plans by wildlife
- 16 considerations.
- 17 Q. I understand that. But it's not a Forever
- Wild easement.
- 19 A. (Von Mertens) There's not surveyed areas that
- 20 are designated as Forever Wild. You're
- 21 correct.
- 22 Q. All right. Can you point the Committee,
- please, to the Caughey easement, please?
- 24 CHAIRMAN IGNATIUS: Can you

```
1 spell that word, please?
```

- 2 MR. FROLING: Oh, sorry. It's
- C-A-U-G-H-E-Y.
- 4 A. (Von Mertens) That is the paler green. It's
- due west of the Audubon, darker-green,
- 6 Wildlife Sanctuary. It's somewhat square-ish
- 7 with a tail down to the southeast. It's
- 8 privately owned by abutters to the sanctuary,
- 9 but --
- 10 Q. And Audubon holds the easement on that.
- 11 A. (Von Mertens) Audubon holds the easement,
- 12 yes.
- 13 Q. Does that include land which is
- 14 highest-ranked habitat in the state?
- 15 A. (Von Mertens) It's mostly -- yes, it does.
- 16 Q. Is that a Forever Wild easement?
- 17 A. (Von Mertens) No, it's not.
- 18 Q. Can you tell the Committee whether Audubon
- 19 holds any Forever Wild easements in the area
- of Willard Pond?
- 21 A. (Von Mertens) Again, I'll answer it, and then
- 22 I'll let Phil.
- Not strictly in terms of surveying. The
- Harris Center took an easement, a Forever

```
Wild easement, recently in my town.
1
2
         there was a surveyed area designated on the
         map that was Forever Wild after a natural
3
         resource inventory inventoried the natural
4
5
         resources found in the exemplary part.
         in negotiations with the landowner, that was
6
7
         surveyed and marked on the map. So that was
8
         an easement that did have a survey.
                                               I don't
         believe that Audubon has a Forever Wild
9
10
         easement to that extent.
                                    But again, that's
11
         high natural resource. We do a natural --
12
         NRI, Natural Resource Inventory, on our
```

14 Q. Can I come back to the question?

properties to designate --

15 A. (Von Mertens) -- no-cut areas.

- Q. Could I please come back to the question?

 Does Audubon hold any Forever Wild easements

 in the area, in the vicinity of Willard Pond?

 It's a simple yes or no.
- 20 A. (Brown) I'm not certain of that. I would
 21 have to check the language.
- A. (Von Mertens) Could we talk about farther north, where we do? No, I think the -- sorry.

```
1
    Q.
         That's all my questions. Thank you.
                         CHAIRMAN IGNATIUS:
2
                                              Thank you.
         Mr. Beblowski? Mr. Jones? Ms. Sullivan?
3
4
         Ms. Longgood.
5
                         MS. LONGGOOD: No questions at
         this time.
6
7
                         CHAIRMAN IGNATIUS:
                                              Mr.
8
         Stearns?
                         MR. STEARNS: No questions.
9
                         CHAIRMAN IGNATIUS:
10
                                              Ms.
         Pinello.
11
                         MS. PINELLO:
                                       No questions.
12
13
                         CHAIRMAN IGNATIUS: Ms. Edwards
14
          -- Ms. Allen. Excuse me.
15
                         MS. ALLEN:
                                     No questions.
16
                         CHAIRMAN IGNATIUS: Mr. Block.
17
                         MR. BLOCK:
                                     Yes.
                                            If you don't
         mind, I'd like to pass the microphone over to
18
         Loranne to ask a few questions.
19
                         CHAIRMAN IGNATIUS: That would
20
21
         be fine. And let me ask you, do you
22
         anticipate a few or quite a few?
23
                         MS. BLOCK: No, I don't have
24
         that many questions.
```

{SEC 2012-01} [DAY 9 MORNING SESSION] {11-30-12}

1 CHAIRMAN IGNATIUS: All right.

Why don't we go ahead, and then we'll take a

3 break soon. But go ahead.

CROSS-EXAMINATION

5 BY MS. BLOCK:

4

14

15

16

17

18

19

20

21

22

23

24

Q. Good morning. My first question is for
 Carol. And this is just a point of
 clarification for myself.

9 You said the common nighthawk is a
10 listed species. And by that you mean
11 state-endangered?

- 12 A. (Foss) Correct.
- 13 Q. Okay. Thank you.

I'm not sure who this is specifically directed to. So whoever feels comfortable with this -- maybe Carol.

I had actually asked questions similar to this to Mr. Lloyd-Evans. I mentioned that I have seen over the years, and I have been a very frequent visitor to the Willard Pond Sanctuary, that there appear to be significant bat colonies there. Is that an accurate observation on my part, and is that an area of concern for you?

A. (Brown) I'm sure I can address that a little bit.

Over the years, as we know, the bat populations have been declining pretty significantly only recently. But over the years, within the cabin owned by New Hampshire Audubon there was a significant bat population. That cabin is still standing. The bats aren't there anymore. But the bats have occupied a barn owned by Willard -- owned by New Hampshire Audubon. And that is at least one significant colony, as said so by New Hampshire Fish and Game and U.S. Fish and Wildlife Service staff.

- Q. So my question, I guess, is: Do you feel turbines would pose an additional risk to that colony?
- A. (Brown) I don't know enough about that. I'm not an expert on bats.
- Q. Okay. And I think this is a question again
 for Carol. I think it was in relation to
 something you said about Lempster and
 post-construction studies in regard to
 nighthawk habitat. And my question, I guess,

is in this project, would it make sense to
perhaps do pre-construction studies about
habitat for nighthawk?

- A. (Foss) To the extent that there is a potential nesting habitat along the area to be -- well, along the ridge, it would be -- it would be helpful to know what the pre-construction situation is. I have not been on the ridge myself. So I don't know to what extent that suitable habitat is available. But from previous testimony, it's certainly been suggested that potential nesting habitat exists along the ridge.
- Q. Thank you.

The other question I had is about high-elevation land, that it was stated, I think just previously, that that needed to be 2700 feet and that the project was at 2300 feet; yet, Jeffrey Jones said something yesterday, and I'm really paraphrasing, that soil, vegetation, et cetera, can make an area "high elevation," even if it's not technically at that high elevation. Does that make sense to one of you?

```
1 A. (Foss) Typically in New Hampshire, when we
2 talk about "high-elevation spruce-fir
3 habitat," we're referring to areas primarily
4 in the northern part of the state that
5 support a particular suite of plant and
6 animal species. And I was not here to hear
7 Mr. Jones, so I really don't want to comment
```

Q. Okay. Thank you. That was that spruce-fir -- that was exactly what he was talking about. So, thank you. That does help clarify things. And that's the end of my questions.

14 CHAIRMAN IGNATIUS: Thank you.

15 Dr. Kimball? Ms. Linowes?

16 (No verbal response)

on what he meant.

CHAIRMAN IGNATIUS: Then I think we're here now for questioning from the Applicant. And I imagine you have a number of questions, so why don't we take a break. It's now 10:30. Let's resume at -- let's try to keep it to 10 minutes. We'll resume at 10:40.

(Whereupon a recess was taken at 10:30

a.m., and the hearing resumed at 10:45 a.m.)

3 CHAIRMAN IGNATIUS: We are

4 back, and we are now beginning

5 cross-examination from the Applicant.

6 Ms. Geiger.

7 MS. GEIGER: Yes, thank you.

8 CROSS-EXAMINATION

9 BY MS. GEIGER:

- 10 Q. Good morning. I don't know that I've met all
- of you in person. But I'm Susan Geiger, and
- 12 I represent the Applicant.
- I think I'll start with you, Ms. Von
- 14 Mertens. When did you first learn about the
- 15 Antrim Wind Project?
- 16 A. (Von Mertens) I think I attended the second
- 17 hearing in Antrim. Mr. Kenworthy and Mr.
- 18 Soininen were presenting. So whenever that
- 19 was, I attended that hearing in Antrim Town
- 20 Hall.
- 21 Q. How many years ago was that?
- 22 WITNESS VON MERTENS: When was
- 23 that?
- MR. KENWORTHY: 2009.

1 A. (Von Mertens) 2009, probably, I hear from Mr. Kenworthy.

- Q. Okay. Thanks. I just wanted to make sure
 that the hearing you were referring to is not
 part of this Site Evaluation Committee
 process; right?
- 7 A. (Von Mertens) It was a town -- Antrim town citizens and interested parties.
- 9 Q. Okay. And have you had had an opportunity to
 10 speak with either Mr. Kenworthy or other
 11 representatives of Antrim Wind about the
 12 project?
- 13 A. (Von Mertens) I've talked to Mr. Soininen a
 14 bit.
- Q. Okay. And have you been approached or
 discussed with them the possibility of having
 Audubon consider or discuss conservation
 easements for this project?
- 19 A. (Von Mertens) I was a bit of a go-between,
 20 between Mr. Soininen and New Hampshire
 21 Audubon for their meeting at Mr. Soininen -22 I think he initiated it. I e-mailed back and
 23 forth. I'm not sure who initiated it. But
 24 it was part of the Antrim Wind-Eolian, at

1 that time, process.

- Q. I believe, turning to Page 3 of your testimony, you said, "Additions to large, unfragmented blocks of conserved open spaces have a high priority for Audubon; is that correct?
- 7 (Von Mertens) Audubon -- for the land Α. conservation community in general, Audubon is 8 more interested in their existing 9 sanctuaries, expanding them, and exemplary 10 11 wildlife habitat. Those are our two criteria. We're not a strict land trust. 12 We do lots of things -- or Audubon does lots of 13 14 things.
 - Q. So is that the reason why Audubon has not engaged in or agreed to engage in conversation with the project about the possibility of having Audubon become more involved with conservation easements that would be part of this project?

 MS. MANZELLI: Object. The

question presupposes testimony that's not in the record.

24 CHAIRMAN IGNATIUS: Ms.

1 Geiger.

MS. GEIGER: Yeah, I'm just
trying to ascertain from Ms. Von Mertens'
prefiled testimony concerning Audubon's -- or
her position that conservation of open spaces
has a high priority and understand why. And
I believe there was testimony in earlier
sessions, I think from Ms. Vissering,
indicating that she thought it would be
unlikely that Audubon would be willing to
coordinate or discuss with the Applicant, and
I'm trying to find out why.

CHAIRMAN IGNATIUS: Why not ask directly if she has had those conversations or would be interested.

MS. GEIGER: Well, I'll ask

17 that. Thank you.

18 BY MS. GEIGER:

- Q. Have you had those conversations?
- 20 A. (Von Mertens) I'm trying to be really -21 listen to the question and then -- but my
 22 brain doesn't always work that way.

23 Audubon was very aware that the Harris
24 Center -- the Harris Center is the

premiere -- it is the land trust in this

particular geographic area. We were aware

that active conversations were going on

between Eolian, Antrim Wind and the Harris

5

21

22

23

24

Center.

- Q. Okay. And so are you satisfied that the
 conservation easements that the project has
 granted to Harris Center -- or would be held
 by the Harris Center, if the project is
 permitted, would be managed appropriately by
 the Harris Center?
- 12 A. (Von Mertens) I put in my testimony the

 13 concerns about residential development being

 14 allowed and forestry allowed without a

 15 forestry management plan.
- Q. And I understand that. But do you have any concerns that the Harris Center would not engage or implement an appropriate forestry management plan, should it become the holder of these conservation easements?
 - A. (Von Mertens) They can't. They're not empowered to do that. That's the landowner's job. And that's how it's done. The landowner determines what forestry they want

1 to do.

2

3

4

11

12

13

14

15

16

17

18

19

20

21

22

23

- Q. And do you have any reason to believe that the landowners upon which these easements would be situated would not engage in an appropriate forestry management plan?
- (Von Mertens) Landowners -- conservation easements -- I'm not going to speak quickly, but I'm aware that I might be cut off. Conservation easements change ownership. The first generation typically has a high land ethic. They negotiate with the land trust what they want to conserve, and then another generation of landowners comes. typically land trusts have real trouble with the second generation, third-generation landowners who might not have a strong land ethic. These conservation easements are a particularly different kind of conservation easement; purchased, not donated. I wasn't part of the exchange between the landowner and the Harris Center and Antrim Wind Energy. But it's always back and forth. And these are unusual easements.
- Q. Let's go back to your original testimony.

1 As I understand it, you adopted Mr.

- Nickerson's supplemental testimony as your
- 3 own; correct?
- 4 A. (Von Mertens) Yes.
- 5 Q. So if I have questions about that, I should
- be directing them to you instead of Mr.
- 7 Nickerson.
- 8 A. (Von Mertens) Yes, thank you.
- 9 Q. Now, on your first testimony, your direct
- 10 testimony, on Page 5 you explain that deeds
- 11 to several properties around Willard Pond
- have restrictions on hunting and fishing; is
- 13 that correct?
- 14 A. (Von Mertens) I was given a history of the
- sanctuary and how it grew. And they do, but
- they're not legal. Deed language is not
- 17 legally binding. It was the wishes of the
- 18 donor in 1930. And so there is fishing and
- there is hunting on some of the parcels.
- 20 It's not legally -- you need a conservation
- 21 easement with an agency or land trust to make
- 22 it legal.
- 23 Q. Is it your position that hunting and fishing
- or other recreational activities that occur

in the sanctuary would no longer occur if this project is built?

- A. (Von Mertens) It would have no impact on hunting or the legality of hunting or fishing, where that is -- where hunting is somewhat restricted.
- Q. Okay. On Page 14 of your testimony, you indicate that you have concerns about the visual impacts of the project on the Willard Pond Sanctuary; is that correct?
- 11 A. (Von Mertens) That's correct.
- 12 Q. Is this your own personal concern, or is this the position of New Hampshire Audubon?
- A. (Von Mertens) It's certainly my concern. And
 Audubon has adopted a policy on wind energy,
 and I don't know to what extent aesthetics
 were mentioned in that policy.
- 18 Q. Do you have a copy of that policy?
- 19 A. (Von Mertens) I do.

that.

3

4

5

6

24

- 20 Q. Is it in the record?
- 21 A. (Von Mertens) I believe it is.
- 22 Q. Could you give me the exhibit number, please?
- 23 A. (Von Mertens) Well, I'll need some help with

{SEC 2012-01} [DAY 9 MORNING SESSION] {11-30-12}

I believe it's one of your exhibits,

but I'm not sure. And I think Amy might need to help me here.

MS. MANZELLI: I'm sorry?

4 WITNESS VON MERTENS: The New

5 Hampshire Audubon policy on wind energy

6 projects.

7 MS. MANZELLI: I believe

8 that's an AWE exhibit?

9 MS. GEIGER: I was just

10 curious if the document -- to save some time,

I thought maybe the document that she had in

her hands had the number on it. And I

13 apologize if --

14 MS. MANZELLI: It does not. I

15 apologize for that also. Sorry.

16 BY MS. GEIGER:

23

17 Q. All right. So, to your knowledge, has New

18 Hampshire Audubon, either members of the

governing body, the governing board of that

20 organization, taken a vote to the effect that

21 the -- that it has concerns about the visual

impacts of the project on Willard Pond?

A. (Von Mertens) I think Mr. Nickerson, as past

board chair, might be more familiar with the

aesthetics. I know that wildlife and other things are mentioned.

- A. (Nickerson) Thank you, Francie. The board
 has voted to intervene. And one of the major
 reasons that we voted for intervention was
 our concern about the visual impacts. So the
 answer to your question is yes. And I was
 board chair at the time and presided over the
 vote for intervention.
- 10 Q. Okay. Now, on Page 14 of Ms. Von Mertens'
 11 testimony, you've indicated that the visual
 12 impacts of avian [sic] obstruction lights
 13 deserve full consideration. Is that your
 14 statement?
- 15 A. (Von Mertens) Of avian -- I mean --
- 16 Q. Aviation.
- 17 A. -- aviation, not avian. Did you say avian or did I?
- 19 Q. I probably did. Aviation. I'm sorry.
- A. Freudian. Yes, and at that time I didn't know about the agreement that Appalachian Mountain Club and the FAA and...
- Q. So you're familiar with the Applicant's
 agreement to implement, when approved by FAA,

- 1 a radar-activated lighting system?
- 2 A. (Von Mertens) I am.
- 3 Q. And what is your position on that?
- 4 A. (Von Mertens) It's an improvement.
- 5 Q. Okay. Thank you.
- Now, Ms. Foss, turning to your

 testimony, please. Is it fair to say that

 the bulk of your prefiled testimony concerns

 golden eagles?
- 10 A. (Foss) Yes.
- 11 Q. Okay. And on Page 4 of your prefiled

 12 testimony, you talk about golden eagles that

 13 have been killed by turbines in California,

 14 Wyoming, Oregon and Washington; is that

 15 correct?
- 16 A. (Foss) Yes.
- But isn't it true -- and I think it's in 17 0. response to a data request from Antrim Wind, 18 which would be AWE 27, and I believe it was 19 20 indicated this morning in testimony, maybe by 21 Mr. Nickerson -- that there haven't been or 22 you're not aware of any golden eagle 23 fatalities or mortalities at an operational 24 wind farm in the eastern United States? Is

1 that your testimony?

- 2 A. (Foss) That's correct.
- Q. Why didn't you mention this back in your prefiled testimony?
- 5 A. (Foss) I guess the density of bald eagles in
 6 the west -- I'm sorry -- golden eagles in the
 7 west is orders of magnitude higher than the
 8 density of bald eagles in the east.

Likewise, the density of wind turbines in the west is orders -- probably several orders of magnitude higher than the density in the east. This is an issue that is going to become more likely as more wind turbines occur in the east. So...

Q. So you didn't think it was important to mention in your testimony that there haven't been any golden eagle fatalities at eastern wind farms in the United States?

MR. ROTH: Objection. She didn't say that. That's your words, not hers.

MS. GEIGER: I'm going to object to Mr. Roth objecting to my questions of this panel. If Ms. -- they're represented

- 1 by counsel. And if Ms. --
- 2 MS. MANZELLI: I'll make the
- 3 same objection. If you'd like to rephrase?
- MS. GEIGER: No. I asked the
- question and I got an answer and I'd like to
- move on, because I don't think we need to bog
- 7 the Committee down with this testimony.
- 8 BY MS. GEIGER:
- 9 Q. Are you aware that the U.S. Fish and Wildlife
- 10 Service has indicated that, based on its
- 11 risk-assessment model, the Service predicts
- that the project's risk to golden eagles is
- 13 within the range that the Service considers
- 14 low risk?
- 15 A. (Foss) Yes, I'm aware of that.
- 16 Q. Okay. And the model that was referred to in
- 17 that exhibit that I just referenced, AWE 43,
- which is, I believe, a copy of some e-mails
- 19 from Ms. Nystrom --
- 20 A. (Foss) Correct.
- 21 Q. -- that's the only model that exists at the
- 22 current time for assessing risk to golden
- eagles; isn't that correct -- that the
- 24 Service uses?

- 1 A. (Foss) That the Service uses, yes.
- 2 Q. Now, in your supplemental prefiled testimony,
- you comment on various sections of the
- 4 Applicant's Avian and Bat Protection Plan.
- 5 And you make some recommendations for changes
- in some instances; is that correct?
- 7 A. (Foss) Correct.
- 8 Q. Now, your recommendations were not adopted by
- 9 U.S. Fish and Wildlife Service; is that
- 10 right?
- 11 A. (Foss) I beg your pardon?
- 12 Q. Well, the recommendation that you made in
- 13 your prefiled testimony concerning the ABPP
- 14 were not, in fact, accepted by U.S. Fish and
- 15 Wildlife when they --
- 16 A. (Foss) To my knowledge --
- 17 MS. MANZELLI: Objection.
- 18 There's nothing in the record here that
- indicates that any request was made to the
- 20 agency to consider Ms. Foss's recommendation.
- 21 MS. GEIGER: All right. I'll
- 22 rephrase the question.
- CHAIRMAN IGNATIUS: All right.
- Let -- you know, if the witness doesn't know,

1 you're always welcome to say you don't know.

- 2 If you say, "But that's not the way it
- happened, you're also welcome to say that.
- If we can have a little more exchange -- if
- we can have the witnesses do more of the
- 6 testifying than the parties' counsel, that
- 7 would be helpful.
- 8 BY MS. GEIGER:
- 9 Q. Well, I guess you've indicated in your
- 10 prefiled testimony that you made some
- recommendations about the project's Avian and
- 12 Bat Protection Plan; correct?
- 13 A. (Foss) Correct.
- 14 Q. Is your position shared by U.S. Fish and
- Wildlife concerning those recommendations?
- 16 A. (Foss) I have no idea.
- 17 O. Well, isn't it true that U.S. Fish and
- 18 Wildlife indicated to the Applicant that its
- 19 ABPP is consistent with the Service's
- 20 land-based wind energy guidelines, and that
- that agency didn't have any additional
- 22 comments or suggested revisions to it at this
- 23 time?
- 24 A. (Foss) I don't know that I had seen that

response from the Service at the time I prepared my testimony.

- Q. But is it your understanding now that the

 ABPP prepared by Antrim Wind has been deemed

 satisfactory to U.S. Fish and Wildlife

 Services at this time?
- 7 A. (Foss) I guess what I would like to say on that --

MS. MANZELLI: Would it be helpful for you to have the exhibit about which you're testifying in front of you?

MS. GEIGER: I was just going to show her that. And I apologize. I don't want to...

MR. ROTH: Madam Chairman, to the extent that, you know, there were complaints about repetitive and duplicative testimony, it seems to me that we've talked about the Fish and Wildlife Services' approval or non-approval, whatever it means, a number of times by a number of witnesses. And this is clearly a place where Ms. Geiger should be objecting to her own questions in that regard.

1 CHAIRMAN IGNATIUS: Well, Mr.

2 Roth, this is a question that Ms. Geiger

3 wants to have this witness address

4 recommendations this witness made about U.S.

5 Fish and Game standards. So I think it's --

I'm sorry -- U.S. Fish and Wildlife. So I'm

7 going to allow it.

6

8 MS. GEIGER: Let me just ask

9 the witness if she's seen AWE 43.

- 10 A. (Foss) Yes, I'm looking at it now. This
- communication is specifically from the
- 12 Northern States Bald and Golden Eagle
- 13 Coordinator. So it refers specifically to
- the aspects of the ABPP that deal with bald
- and golden eagles.
- 16 BY MS. GEIGER:
- 17 Q. Does it say that?
- 18 (Witness reviews document.)
- 19 Q. Well, let me rephrase the question. Is
- 20 there -- there's no limiting language in that
- e-mail correspondence that says that this --
- 22 that the reviewer, Ms. Nystrom, is limiting
- her review just to the bald and golden eagles
- 24 aspects of the ABPP, is it?

1 A. (Foss) No. And at the end it does refer more

generally to the ABPP. However, I mean, I'm

not the Fish and Wildlife Service. And even

4 were Audubon not an intervenor in the

process, I would feel that I had the right,

as a professional biologist, to provide

7 comments on the ABPP.

- 8 Q. Okay. Understood.
- 9 A. (Foss) And I would further say that

10 state-listed endangered species are not the

11 realm of the federal Fish and Wildlife

12 Services' concern. So I would not expect the

13 Service to have comments regarding the

14 nighthawk recommendations.

- 15 Q. Okay. Turning to the nighthawks, if you
- will, just for a second. Are you aware that

this project consulted with U.S. Fish and

18 Wildlife and New Hampshire Fish and Game in

doing -- in developing its pre-construction

20 studies?

19

- 21 A. (Foss) Yes.
- 22 Q. Okay. Do you know whether either of those

agencies directed this Applicant to conduct

24 pre-construction nighthawk nesting studies?

```
A. (Foss) We were not aware of the nighthawk problem at the time.
```

- 3 Q. Which problem are you talking about?
- A. (Foss) The fatalities at a New Hampshire wind facility.
- 6 Q. At the Lempster facility?
- 7 A. (Foss) Correct.

10

- 8 Q. Isn't it true that when the pre-construction 9 studies were done for Lempster, that a
- seaares were delice for reinforcer, chack

nighthawk nest was found there?

- 11 A. (Foss) On an adjacent ridge, yes.
- 12 Q. Was there any nighthawk nest found during
- pre-construction here at this site?
- 14 A. (Foss) Let me back up for a minute, because
- 15 I'm not sure that a nest was found during the
- 16 Lempster pre-construction surveys. I know
- 17 that there was activity observed. I don't --
- 18 I can't testify to the presence of a nest.
- 19 Q. If I were to tell you that Mr. Gravel, in his
- 20 testimony, indicated that there -- that he
- 21 had found a nest during pre-construction
- 22 studies at Lempster, would you have any
- reason to disagree with that?
- 24 A. (Foss) No, I would not.

```
Q. Okay. So here in Antrim, we do not have a
```

- nest -- at least we've not found a nest
- during our studies pre-construction; correct?
- 4 A. (Foss) Correct.
- 5 Q. Okay. Now, Mr. Nickerson, your direct
- 6 testimony provides information about federal
- 7 laws that protect bald and golden eagles and
- 8 other raptors; is that correct?
- 9 A. (Nickerson) Yes, it is.
- 10 Q. Okay. Your testimony, your supplemental
- 11 testimony, which is now adopted by Ms. Von
- 12 Mertens, indicates that you have a
- 13 position -- you have some concerns about the
- 14 land management committee, about the proposed
- 15 conservation easements for this project;
- 16 correct?
- 17 A. (Von Mertens) I think we both can answer yes
- 18 on that. Mr. Nickerson is part of that
- 19 committee.
- 20 O. Okay.
- 21 A. (Nickerson) And I'll answer yes as well.
- 22 O. Okay. Now, the conservation -- I believe I
- indicated earlier on the record that the
- conservation easements were filed by the

```
Applicant on June 4th, 2012 in this docket;
is that correct; is that correct?
```

- A. (Von Mertens) I certainly trust your calendar better than mine.
- 5 Q. Okay. Thank you.

And you folks filed prefiled testimony
in July of 2012. But none of you talked
about this conservation easement, did you?

- 9 A. (Von Mertens) Not in prefiled.
- 10 Q. I guess I'm wondering why not.
- 11 MS. MANZELLI: I object.
- 12 CHAIRMAN IGNATIUS: On what
- 13 basis?

MS. MANZELLI: I've not done
this with this Committee before, but I would
like to discuss approaching the Bench, off
the record, with co-counsel.

18 CHAIRMAN IGNATIUS: Oh, all

19 counsel?

MS. MANZELLI: Yeah.

21 CHAIRMAN IGNATIUS: All right.

MS. MANZELLI: Or if we can go

off the record for a moment?

24 CHAIRMAN IGNATIUS: All right.

1 Let's go off the record.

2 (Discussion off the record.)

3 CHAIRMAN IGNATIUS: All right.

We're back on the record. Please proceed,

5 Ms. Geiger.

6 BY MS. GEIGER:

7

8

14

15

16

17

18

19

20

21

22

23

- Q. When did you become aware that the project was negotiating conservation easements?
- 9 A. (Von Mertens) I was -- I have no idea. But I
 10 know that the Harris Center was, as I said
 11 earlier, was in -- that Eolian, Antrim Wind
 12 and the Harris Center were working on a
 13 conservation plan.
 - Q. Okay. Did you read or become familiar with the conservation easements for this project before you prefiled your testimony in July?
 - A. (Von Mertens) I didn't read the easements.

 There was repeated message -- competed -- I'm sorry -- repeated -- in the Antrim Wind

 Energy initial application, there was repeated reference to conservation of 685 acres. I took that literally to mean pure conservation. And I was the one who then read the conservation easements and

```
1 brought it to the attention of the sanctuary
```

- 2 committee and the New Hampshire Audubon, and
- 3 that's when I read Reserved Rights,
- 4 Section 3.
- 5 Q. And when was that?
- 6 A. (Von Mertens) It was certainly after the
- 7 initial filed testimony.
- 8 Q. You're on the service list for this docket;
- 9 right?
- 10 A. (Von Mertens) Yes.
- 11 Q. And I believe that you would have received
- all the e-mail correspondence that the
- 13 Applicant --
- 14 A. (Von Mertens) Absolutely. And I take
- 15 responsibility for not reading them all.
- 16 Q. Okay.
- 17 A. (Von Mertens) As someone interested in
- 18 conservation easements, I should have --
- June -- what was the date they were filed?
- 20 Q. June 4th.
- 21 A. (Von Mertens) I should have. And it's a... I
- didn't.
- 23 Q. Okay. Thank you.
- Now, on Page 2 of your supplemental

- testimony -- and this again is Mr.
- Nickerson's that you've adopted, Ms. Von
- 3 Mertens -- you note that the project's
- 4 conservation easements will be held by the
- 5 Harris Center for Education. Do you have any
- 6 concern with that?
- 7 A. (Von Mertens) The Harris Center is a premiere
- 8 land trust. And I know it well and have
- great respect for the Harris Center.
- 10 O. Now, isn't it true that some of the
- 11 conservation easements I believe that -- do
- 12 conservation easements that we've been
- 13 discussing this morning, that New Hampshire
- 14 Audubon has, I believe in response to
- 15 questions by Mr. Froling, are any of those
- 16 provisions similar to the conservation
- 17 easements that are part of Antrim Wind's
- 18 plans?
- 19 A. (Von Mertens) That we hold around the state?
- 20 Q. Yes. I believe you said in your testimony
- 21 that there's some standard boiler --
- 22 A. (Von Mertens) Oh, definitely boiler plates
- everywhere.

24

Q. So there are some easement provisions in

easements that you hold that are similar to
the easement provisions that this project has
in the easements granted to Harris Center;

- (Von Mertens) The conservation easements 5 Α. began in the '70s. They're evolving. 6 7 they're evolving towards requiring forestry 8 management plans. And again, you're dealing with a landowner and the land trust, and it's 9 10 a conversation back and forth. I have an 11 easement with the Harris Center that I chose to restrict commercial logging, but not cord 12 So, it's all a dialogue back and 13 wood. 14 forth. Very few easements are -- they're
 - Q. All right. So let's turn to these four,
 because I believe on Page 2 of your
 supplemental testimony you've indicated some
 concerns about the project's proposed
 conservation easements; is that correct?

like snowflakes. Very few other than these

A. (Von Mertens) Yes.

four are similar.

correct?

4

15

16

17

18

19

20

21

22

Q. Now, one of those concerns you've indicated is that the easements allow for future

```
1 residential development on the ridgeline and
```

- that there are no siting restrictions on
- where houses can be built; is that right?
- 4 A. (Von Mertens) Correct. There are -- I did
- 5 mention that there are -- correct.
- 6 Q. Okay. So in terms of where the houses can be
- 7 built, can we talk about that for a minute?
- 8 A. (Von Mertens) Yes.
- 9 Q. Isn't it true that the agreement -- the
- 10 easement on the Micheli -- I believe I'm
- 11 pronouncing --
- 12 A. I'm glad you --
- 13 Q. -- that correctly -- the Micheli property --
- 14 A. I'm glad you pronounced it first.
- 15 Q. Hasn't Dr. Micheli agreed in writing that the
- easement on his property would restrict the
- 17 right to build a future home to the low-lands
- 18 section of Salmon Brook?
- 19 A. The easement doesn't mention that. But I
- 20 have seen, and I believe it was filed after
- 21 my -- I'm not sure when it was filed. But
- with great pleasure, I saw the letter from
- Dr. Micheli to, I believe -- I did see it,
- and they said that we intend to build off

- 1 Salmon Brook Road.
- Q. So if you turn to AWE 42 that's in the binder
- in front of you, is that the letter that
- 4 you're referring to?
- 5 A. (Von Mertens) I'm sure it is.
- Q. Okay. So does that letter address that concern you had about that property?
- 8 A. (Von Mertens) I think there's language in
 9 that letter that says in a future amendment
 10 to the easement, the Michelis would be happy
 11 to put that language in, in Section 3, that
 12 they reserve the right to say that they can
- 14 Thank you. Now, your supplemental Q. Okay. 15 testimony also states that, given site 16 preparation and leveling for turbine pads and 17 access roads, future residential development is likely to be on those locations high and 18 visible on the ridgeline. Is that your 19 20 testimony?
- 21 A. (Von Mertens) That is.

build a home.

13

Q. Now, we've already established that the
Micheli property construction would occur not
on the ridgelines; correct?

A. (Von Mertens) Yes, and that's the most westerly property.

Q. Okay. Now, are you aware that there is a provision in Mr. Ott's easement, or the easement on his property, that would prohibit the use of the project's roads to access the other two easements that would allow houses to be built?

MR. ROTH: Madam Chairman, again, we're -- this is duplicative and repetitive testimony about the content of the easements. She's simply asking the witness to recite what is or is not in these easement documents. We've been over this several times before this week, and probably the last time we were all together.

CHAIRMAN IGNATIUS: Well, I thought she was asking whether those terms satisfied the concerns that Ms. Von Mertens raised in testimony. But if I'm wrong, Ms. Geiger --

MS. GEIGER: That's where I'm going. And these witnesses have not been on the stand yet, and I want to find out what

{SEC 2012-01} [DAY 9 MORNING SESSION] {11-30-12}

these witnesses know about them and what they
feel about them.

CHAIRMAN IGNATIUS: If you can focus your questions as much as possible on what those provisions' impact, if any, is on their recommendations, that would be helpful.

MS. GEIGER: Right. And I'm trying to reference the witness to this easement restriction to see whether it addresses her concern about ridgeline development.

- A. (Von Mertens) I was aware for all four easements that there's no through right-of-way on the existing access road to any abutting property. And I knew that when I wrote my supplemental.
- 17 BY MS. GEIGER:

- Q. Okay. So on Page 3 of the supplemental
 testimony, you recommend the Committee
 require a Forever Wild easement on the
 ridgeline if the project is approved; is that
 right?
- 23 A. (Von Mertens) Yes.
- 24 Q. Okay. And I think we've established earlier

this morning that the easements the Audubon

itself holds are not Forever Wild easements;

- 3 is that correct?
- 4 A. (Von Mertens) We tend not to hold easements
- on our own property. We manage our own
- 6 property.
- 7 O. Okay. But easements that are -- that exist
- around your property are not Forever Wild; is
- 9 that correct?
- 10 A. (Von Mertens) I don't see the relevance.
- 11 Q. Well, I haven't heard an objection, and I
- 12 think it's relevant.
- 13 A. (Von Mertens) Okay. Could you repeat the
- 14 question, please?
- 15 Q. I think you indicated in answers to questions
- from Mr. Froling that the easements that you
- 17 identified in the sanctuary are not Forever
- 18 Wild.
- 19 A. (Von Mertens) I was shocked by the -- I was
- 20 surprised by the question and had regrets
- about my answer.
- 22 Audubon does not put easements on its
- own property. We manage our own property.
- 24 If you put an easement, that puts the

```
1 management in the hands of the easement
```

- language. And so it's rare. We do have -- I
- was asked about an easement on the easterly
- 4 side. We inherited that easement. It was
- 5 done 15 years ago. As I've said, easements
- have evolved. And we also own that property.
- 7 We manage it. NRCS grants, we do a very good
- 8 forestry management plan.
- 9 Q. Now, the supplemental testimony states on the
- 10 last page that New Hampshire Audubon stands
- in strong opposition to permitting the
- 12 project; correct?
- 13 A. (Von Mertens) Correct.
- 14 Q. Did the membership of New Hampshire Audubon
- take a vote on this position?
- 16 A. (Von Mertens) The board did.
- 17 Q. Okay. So the membership did not; correct?
- 18 A. (Von Mertens) That's certainly correct.
- 19 Q. Okay. Now, Mr. Brown, on Page 6 of your
- 20 testimony, you described recreational
- 21 activities that occur within the wildlife
- 22 sanctuary at Willard Pond; correct?
- 23 A. (Brown) Let me take a look at that. Can you
- point out the reference on Page 6, please?

```
1 Q. I believe it's a description there about the
```

- 2 type of recreational activities that occur,
- and they include: Hiking, snowshoeing,
- 4 cross-country skiing and hunting. Do you see
- 5 that?
- 6 A. (Brown) I'm not seeing that on Page 6. Okay.
- 7 Missed that. Thanks.
- 8 A. (Nickerson) Right there.
- 9 Q. You don't have -- you got it?
- 10 A. (Brown) Okay. I think that refers
- specifically to the trail system. Yeah.
- 12 Q. Okay. And this project will not affect folks
- 13 from engaging in those activities in the
- 14 future, will it?
- 15 A. (Brown) I believe that people will still be
- able to partake in those activities.
- 17 Q. Okay. On Page 9 of your testimony, you
- 18 state, "Aesthetics is an important
- 19 consideration that has guided ASNH's
- 20 management activity at the sanctuary since
- the beginning of its ownership"; correct?
- 22 A. (Brown) Yes.
- 23 Q. Has New Hampshire Audubon adopted any written
- 24 standards or guidelines regarding how

```
1 aesthetic considerations should guide
2 management of the sanctuary?
```

- 3 A. (Brown) I don't believe it has, other than
- 4 the wild -- the forestry management plan,
- 5 which does speak to aesthetics.
- 6 Q. Okay. And on Page 9 of your prefiled
- 7 testimony, you talked about the Goodhue Hill
- 8 timber harvest on over 100 acres of forest
- 9 land; correct?
- 10 A. (Brown) Correct.
- 11 Q. Is that the same harvesting you were talking
- 12 about this morning?
- 13 A. (Brown) Yes, it was.
- 14 Q. Okay. And does New Hampshire Audubon have
- any objection to lands that abut its property
- in engaging in the same type of timber
- 17 harvesting projects?
- 18 A. (Brown) Specifically this property? Is that
- 19 the question?
- 20 Q. Any property.
- 21 A. (Brown) Any property?
- 22 Q. Any abutting property, let's put it that way.
- 23 Since you folks are doing this on your
- 24 property, would you have problems with

```
abutters doing timber harvesting on their property?
```

- A. (Brown) I guess it depends on the nature and extent of that work.
- Q. Now, you direct land conservation management activities for Audubon of New Hampshire; correct?
- 8 A. (Brown) Yes.
- 9 Q. And part of your responsibilities include 10 conservation easement monitoring; correct?
- 11 A. (Brown) Correct.
- 12 Q. What does that entail?
- A. (Brown) Well, it's -- I don't know if I can
- very quickly sum it up. But it involves
- either ground monitoring or aerial
- monitoring, looking at boundaries, looking at
- 17 structures, making sure that any restrictions
- 18 are being followed, that permitted uses are
- 19 guiding the management of the properties.
- 20 Q. So you've had an opportunity as part of your
- 21 responsibilities to review easement language;
- is that correct?
- 23 A. (Brown) Yes.
- 24 Q. And would you agree there are some provisions

```
1
         in easements that Audubon holds that are
2
         similar to the easements that the project
         would be granting if it goes forward?
3
                         MS. MANZELLI:
                                         Objection.
4
         That's already been asked and answered.
5
                         CHAIRMAN IGNATIUS:
6
7
         Geiger.
                                       I'm asking this
8
                         MS. GEIGER:
         witness if he knows that.
9
                         CHAIRMAN IGNATIUS:
                                              And has
10
11
         that not already been addressed?
                         MS. GEIGER:
                                       I believe the
12
         answer I got was that there is some boiler
13
         plate that's similar in all easements.
14
    BY MS. GEIGER:
15
16
         Is that correct?
17
                         MS. MANZELLI: Well, I have a
         pending objection. I'm not sure why she's
18
19
         asking a question that's already been asked
20
         and answered.
                         CHAIRMAN IGNATIUS:
21
                                              Right.
22
         And I asked as well. Hasn't that already
23
         been addressed?
24
                         MS. GEIGER:
                                       I think I heard
```

1 the answer that there was some similar boiler 2 plate from Ms. Von Mertens.

CHAIRMAN IGNATIUS: 3 Right. So

is there a reason why you need to ask Mr.

5 Brown the same question?

MS. GEIGER: Well, he's a --6 7 his position with the organization is for land conservation and management activities, 8 and I wanted to make sure that his answer was 9

the same. That's all. 10

11 CHAIRMAN IGNATIUS: All right.

So why don't you ask him if he disagrees with 12

Ms. Von --13

14 BY MS. GEIGER:

4

Do you disagree with Ms. Von Mertens' 15 0.

16 assessment of the fact that the Applicant's

17 easements contain similar language to

- easements that Audubon holds? 18
- (Brown) From what I've read, I think there is 19 Α.
- 20 some similar language.
- 21 Q. Okay. Thank you.

22 I believe somebody on the panel this

23 morning talked about folks coming to Willard

Pond after the project is built and maybe not 24

1 having the same experience that they might

2 have had beforehand. Did I understand that

3 correctly?

- 4 A. (Brown) I think that was a question that was brought up before.
- Q. And is it possible for people who value

 conservation and renewable energy, such as

 wind power, to enjoy the experience at

 Willard Pond post-construction?
- 10 A. (Brown) Sure.

23

- 11 Q. Are there any rights on either the easements
 12 that Audubon holds or the land that you own
 13 that would require the views from Willard
 14 Pond to Willard Mountain to remain the same
 15 forever?
- 16 A. (Brown) From Willard Pond to --

personal knowledge of.

MR. ROTH: I'm going to

object. That sounds like a legal conclusion.

She's asking Mr. Brown, who has a bachelor of

science in biology, if I'm not mistaken, to

interpret terms of property deeds and

transactions that he may not even have

MS. GEIGER: He just testified

that he's the conservation management person for Audubon and that he has familiarity with

3 at least the conservation language,

4 conservation easement language.

5 CHAIRMAN IGNATIUS: I think

6 everyone's been asking these witnesses about

terms contained in conservation easements.

So it's a fair question.

BY MS. GEIGER:

7

8

12

13

14

15

16

17

18

19

20

21

22

23

- Q. Do you know of anything in the, at least the easements that you've looked at, that you're responsible for managing, that indicate that the views in the sanctuary, or on the land relating to those easements, require that the views either within the sanctuary or -- I guess from within the sanctuary remain the same forever?
- A. (Brown) I'm a little unclear about the question, because you're asking about conservation easement deed language, but also the sanctuary, the fee-owned property. If you could just clarify that.
- Q. Sure. Either one, if you know. Is there anything that restricts development on that

ridgeline, such that it would affect the views?

- A. (Brown) On that ridgeline --
- MS. MANZELLI: Objection. I
 don't understand the question or questions,

and that might be the problem.

MS. GEIGER: And I apologize.

They're not artfully phrased. Basically, I

just wanted to find out if there was anything

Audubon was aware of, in the documents that

this witness is familiar with, that would

provide that the views from within the

MS. MANZELLI: I have no objection to that.

sanctuary remain the same.

- A. (Brown) I don't think it would be possible or enforceable to require that something can't happen on a property that's outside of our ownership or easement.
- 20 BY MS. GEIGER:

3

6

- 21 Q. Okay. Thank you very much.
- MS. GEIGER: Could I just have a moment, please?
- 24 CHAIRMAN IGNATIUS: Please.

1 (Pause in proceedings)

2 MS. GEIGER: Thank you very

much for your patience. I have no further

4 questions.

5 CHAIRMAN IGNATIUS: Thank you.

6 Questions from the Committee members. Ms.

Lyons.

7

8

9

10

11

INTERROGATORIES BY MS. LYONS:

- Q. Ms. Von Mertens, I just have a couple questions on Forever Wild, and if anybody else on the panel has more experience.
- 12 You've just brought it up several times.
- 13 A. (Von Mertens) Certainly.
- Q. Is "Forever Wild" a term or a type of easement that has an accepted structure?
- 16 A. (Von Mertens) Again, conservation easements
 17 are evolving. And there is a land trust, the

Northeast Wilderness Trust, that specializes

in Forever Wild easements. And New Hampshire

20 Audubon is about to complete an easement with

them on a sanctuary farther north. That's

one -- that's the strictest category. And

that would be a Forever Wild easement. I

don't know that that term necessarily becomes

1 part of the -- it does sometimes, and it So it's a convenient -- I 2 doesn't sometimes. mentioned an easement that the Harris Center 3 did in Peterborough, my town, possibly within 4 5 the year, maybe within two years, that is a large parcel, hundreds of acres. 6 And there 7 is a designated surveyed area within that 8 larger property that has exemplary natural communities, and that is Forever Wild. 9 10 believe -- I don't know what terminology was 11 used for that. So that's the middle range. I guess legally those would be the two kinds 12 of easements that I'm familiar with that 13 would be Forever Wild. 14

Q. Now, in your response, you just mentioned an organization. You said it quickly.

Northeast --

15

16

17

22

23

- A. Northeast Wilderness Trust. It's a regional land trust. Headquarter's in Boston. But it's active in Maine, New Hampshire, Vermont, Massachusetts, that I'm aware of.
 - Q. Do you know of any other organizations that hold those types of easements that have that language?

1 A. (Von Mertens) I'm not aware. I believe there
2 are.

- Q. If offered, would Audubon agree to a Forever
 Wild language in an easement?
- 5 A. (Von Mertens) We are doing that in our 6 Thompson Sanctuary up north.
- 7 (Brown) I think I might be able to answer Α. 8 that question, and the last one a little better, too, just to clarify, that we also do 9 10 have -- one of our easements is Forever Wild, 11 and it has a backup with it, the nature conservancy. So, one property in New 12 13 Hampshire at least does have a Forever Wild 14 easement on it.
- Q. Is that for the whole property or a portion of?
- A. (Brown) The entirety, although there's a house cut out of the easement itself. So, yeah, it's the entirety of the property.
- 20 O. Thank you. That's all I have.
- 21 CHAIRMAN IGNATIUS: Thank you.
- 22 Mr. Simpkins.
- DIR. SIMPKINS: Thank you.

INTERROGATORIES BY DIR. SIMPKINS:

Q. I had a few questions. I'll kind of go off what Ms. Lyons was talking about, as far as land conservation. I'm not sure who's the best person on the panel to answer this, because several of you have talked about land conservation.

But as far as the conservation easement proposed by the Applicant, do you feel that that is adequate if they added in a requirement of a forest management plan written by a licensed professional forester and restricted where development could occur? Are those the two issues?

A. (Von Mertens) Those were the two issues I brought up. And a Forever Wild easement -- a traditional easement often has, as I said in my testimony, a designated building site.

And that's what Phil is talking about. That would usually, typically protect an exemplary national resource.

The other issue which I mentioned is that the easements are fragmented. The larger two properties are not under easement.

And the largest property that's not under an easement has more ridgeline than any other individual property. And I believe there's four turbines on that parcel.

5

6

7

8

9

20

21

22

- Q. So then, what I'm hearing you -- I think I understand what you're saying is that you feel that there should be additional properties covered by easement. Is that what you're saying?
- 10 (Von Mertens) Do I get a chance to very Α. 11 respectfully say to the Site Evaluation Committee that I believe that every 12 13 application should require a Forever Wild 14 easement on the ridgeline, the project impact 15 area, which is -- and a little bit bigger? 16 And I think that's very important mitigation, 17 given that wind projects are on our wild ridgelines. That's where industrial wind 18 capacity lies. 19
 - Q. So I guess I want to ask -- I want to understand this Forever Wild easement a little bit more.

Is the Forever Wild easement to replace
the forestry management plan written by a

licensed forester? Because if I'm
understanding you correctly, Forever Wild

would not allow harvesting; is that correct?

- A. (Von Mertens) Again, easements are negotiable. But a typical New England forestry -- Northeast Wilderness Trust's Forever Wild easement restricts commercial logging. It doesn't restrict activity. But again, they're negotiated. Sometimes there's a particular area where commercial logging is not allowed. But what I'm recommending is no
- 14 A. (Brown) If I could just jump in and add that
 15 the Northeast Wilderness Trust does require a
 16 management plan drafted for every property
 17 that it holds an easement.

commercial logging and no residential

development on the ridgeline.

- Q. Okay. So this Forever Wild easement, I did
 hear that Audubon uses forest management to
 enhance wildlife habitat; is that a correct
 statement?
- 22 A. (Brown) Yes.

4

5

6

7

8

9

10

11

12

13

Q. So are you saying -- there's roughly 600-some acres of proposed easements by the Applicant.

Are you saying you would have Forever Wild on all of that or just portions?

- A. (Von Mertens) The ridgeline. The exemplary natural community.
- Q. And when you use the term "exemplary natural community," are you using a specific definition of that, such as like National Heritage Bureau would use, and it's actually been identified as such, or are you using your own definition?
- 11 (Von Mertens) Typically you have a Α. credentialed wildlife biologist do a natural 12 resource inventory and identify the 13 exemplary. That would -- I don't believe 14 15 that would bring in aesthetics. So I think 16 that's important to bring into it. That's a 17 major component of why you don't want houses 18 up there.
- Q. Do you know if the ridgeline has been identified as an exemplary natural community by any state agency?
- 22 A. (Von Mertens) I believe it has not.
- 23 Q. Okay. Thank you.
- 24 Switching gears. This question is

1 probably for Mr. Brown. It was in his

testimony. It was also brought up by several

- other people over the last few days,
- 4 including Ms. Vissering and Mr. Jones. The
- issue of Quabbin to Cardigan, could you
- explain, from Audubon, what's the importance
- 7 of that effort?
- 8 A. (Brown) I know a little bit about it, but I'm
- not intimately familiar with all of its goals
- and objectives. But it's a regional effort
- 11 throughout Massachusetts and New Hampshire to
- 12 conserve and protect land within the
- 13 highlands regions of those states: The
- southwestern part of New Hampshire and
- 15 northwestern Massachusetts. Do you have any
- 16 other specific questions about that, that I
- 17 can address?
- 18 Q. Well, you mentioned it in your testimony, so
- 19 I just wanted to understand from Audubon's
- 20 viewpoint what the importance of that effort
- 21 is.
- 22 A. (Brown) Can you just refer me to a page,
- 23 please?
- 24 Q. I can give you the...

```
1
         (Brown) I was able to find it. I see it on
   Α.
        the bottom of Page 3. Yeah, it's a
2
        multiple-partner effort and multiple-state
3
        effort, which typically gives a higher
4
        credibility to the resources contained in
5
        these focused areas.
                               Multiple conservation
6
7
        groups have decided that this is a high-value
8
                So I'm simply stating that that falls
        within this area.
9
```

- Q. Would you consider the Quabbin-to-Cardigan

 Initiative a statewide, New England regional

 or a national significant project?
- 13 A. (Brown) Just by the definition of where it
 14 lies, I would call it a New England regional,
 15 since it extends beyond state boundaries.
 - Q. And do you feel that this project would somehow have unreasonable impacts on that effort?

MS. MANZELLI: Objection. I
just want to make sure that the question is
clear. By "this project" --

DIR. SIMPKINS: The wind.

MS. MANZELLI: And "on this

24 effort," you mean --

10

11

12

16

17

18

DIR. SIMPKINS: Quabbin to

2 Cardigan.

3

4

5

6

7

8

9

19

20

21

22

23

24

MS. MANZELLI: Thank you.

- A. (Brown) Well, since I believe aesthetics does factor into their -- the placement of value through the Quabbin-to-Cardigan effort, I would say there is -- you know, that would be -- that could be a place that does draw from the value given to that area.
- Okay. The last few questions I have deal 10 0. 11 with Audubon Society of New Hampshire's 12 policy statement on energy conservation. I 13 believe it's AWE 26. And it says that -- and 14 I'm not sure again who's the best panel 15 member to -- maybe Mr. Nickerson -- to answer 16 this. But it says, "The Audubon Society of 17 New Hampshire supports renewable sources, including wind." Is that a correct statement? 18
 - A. (Nickerson) Yes, that's correct.
 - Q. Okay. And there's several bullets on Page 2 of that, which state various ways that impacts could be mitigated. One of them is Bullet No. 2 with a little asterisk there, "Developing compensation programs for public

lands." Can you describe what Audubon means by that?

- A. (Nickerson) I can't find that here.
- 4 Q. It's on Page 2. Do you see --
- 5 A. (Nickerson) There's two dots on Page 2.
- 6 MS. MANZELLI: Excuse me. If
- 7 I might interject to clarify? As I
- 8 understand it, there are two Audubon policies
- that are in the record. Mr. Nickerson, we're
- not discussing the New Hampshire Audubon
- 11 policy on wind energy projects.
- 12 WITNESS NICKERSON: Oh, we're
- 13 not?

- MS. MANZELLI: No. We're
- 15 discussing the Audubon Society of New
- 16 Hampshire energy conservation policy.
- 17 And may we get that in front
- 18 of him?
- 19 DIR. SIMPKINS: Sure. That's
- 20 AWE 26.
- 21 A. (Nickerson) That was before my time, so I'm
- 22 not very familiar with that one.
- 23 Q. I don't know if there's anyone else on the
- panel that may be able to speak to it. Maybe

- 1 I should ask the question.
- 2 Is this still an official policy
- 3 statement of Audubon?
- 4 A. (Nickerson) I think it's fair to say it's
- been supplanted by New Hampshire Audubon's
- 6 policy on wind energy projects approved by
- 7 the board of directors on 1/24/2012.
- 8 Obviously, wind is an evolving technology in
- 9 the energy arena, and we're evolving along
- 10 with it.
- 11 Q. So, just to clarify, then, this energy
- conservation policy, AWE 26, is no longer an
- official policy statement of Audubon?
- 14 A. (Nickerson) That's correct.
- 15 Q. Okay. Thank you. I don't have any further
- 16 questions.
- 17 CHAIRMAN IGNATIUS: Thank you.
- 18 Dr. Boisvert.
- 19 DR. BOISVERT: Thank you.
- 20 CROSS-EXAMINATION
- 21 BY DR. BOISVERT:
- 22 Q. In listening to your discussion of easements,
- what I understand, leads me to this question:
- Is it Audubon's condition that, as a

condition of the permit that would be granted

by the PUC, that the Applicant should put the

3 ridgeline into a Forever Wild status

4 easement?

- 5 A. (Von Mertens) Yes, that's correct.
- Q. And as I understand it, it's because the ridgeline is an exemplary natural community?
- 8 A. (Von Mertens) That talks mostly about habitat
 9 and natural resources. And I think added to
 10 that is the aesthetics that Jean Vissering
 11 did a good job in her report highlighting.
- Q. Don't you see a contradiction between
 maintaining the aesthetics and putting 10
 turbines up there?
- 15 A. (Von Mertens) Definitely.
- Q. So how do you reconcile the establishment of
 an easement, a Forever Wild status, that
 would have within it 10 turbines?
- A. (Von Mertens) I think that's the problem.

 And I tried to address it in my supplemental,

 that recommending the Forever Wild easement

 on that geographic area is presupposing that

 it's going to be approved. But I also said

 Audubon stands in strong opposition to the

project. So we have to...

- Q. Okay. And potentially related to that, do you see the establishment of the access road to the turbines as fragmenting the property, by definition of "fragmenting" in a natural resources sense?
- (Von Mertens) Yes. And also houses up there Α. would be -- as Jeff Jones said yesterday, would also contribute. And residential development is another form of fragmentation. And so looking beyond the life of this project to residential -- with the possibility of residential development, that's the long-term fragmentation, permanent fragmentation, that's the concern.
 - Q. But are you not then concerned that by having a Forever Wild designated area that has potentially -- or that has 10 turbines, and potentially houses in it, thereby creates a whole new category of Forever Wild that might be used in other circumstances in the future to say such that intrusions are not necessarily prohibitive of a Forever Wild status?

```
1 A. (Von Mertens) It's looking at 50 years down
```

- the road when decommissioning and the site is
- restored as much as possible, that thereafter
- it would be Forever Wild. The concern is
- that the roads and the development will
- 6 increase the possibility of future
- 7 residential development. I don't --
- 8 Q. So you see the Forever Wild status outliving
- 9 the project life.
- 10 A. (Von Mertens) Oh, very definitely. Thank you
- 11 for that clarification.
- 12 Q. Okay. For it to be -- accepting all these
- 13 apparent contradictions, in order for the
- 14 Forever Wild status to be created, would
- there need to be a survey by qualified
- biologists, naturalists, whoever is most
- 17 appropriate, to define the area that would
- 18 come under the Forever Wild restrictions?
- 19 A. (Von Mertens) Yes.
- 20 Q. And do you see this as the responsibility of
- the Applicant? Who's going to do the survey,
- and who will pay for it?
- 23 A. (Von Mertens) I think it would be a cost of
- the project.

- 1 Q. So, the Applicant.
- 2 A. (Von Mertens) I'd be willing to pay for it.
- 3 Q. And that's on the record.
- That's all I have.
- 5 CHAIRMAN IGNATIUS: Thank you.
- 6 Mr. Dupee.
- 7 MR. DUPEE: Thank you, Madam
- 8 Chair.
- 9 INTERROGATORIES BY MR. DUPEE:
- 10 Q. Thank you, panel members, for being witnesses
- this morning -- for I guess the next eleven
- minutes this morning. I'd like to start my
- 13 questions with Mr. Brown.
- 14 And on Page 4 of your testimony, you
- talk about Willard Pond, and you mention the
- fact that it is a relatively pristine body of
- 17 water, free of surrounding development. You
- 18 further go on to characterize it as being "96
- acres, plus or minus," in size; is that
- 20 correct?
- 21 A. (Brown) Yes, that's correct.
- 22 Q. Do you know how many ponds there are in New
- Hampshire that would be 96 acres or larger in
- 24 size?

- 1 A. (Brown) I don't have any idea.
- 2 Q. If the Committee were to ask you to obtain
- 3 that information, would you be willing to
- 4 find it for us?
- 5 A. (Brown) I think we would be able to find
- 6 that, yeah.
- 7 Q. Yes? I see panel members nodding. Okay
- 8 Thank you.
- 9 Do you know how many -- and I know you
- 10 may not know this -- how many great ponds are
- 11 -- I'll rephrase that.
- How many ponds of 96 acres or greater
- 13 have undeveloped shorelines?
- 14 A. (Brown) Again, I don't know the answer to
- that, but -- no, I don't know the answer.
- 16 Q. But would you be willing to find that out if
- we asked you to do so?
- 18 A. Yes.
- 19 CHAIRMAN IGNATIUS: Mr. Dupee,
- 20 are you making a record request that that be
- identified as an exhibit to be submitted as
- soon as it can be developed by the witness?
- MR. DUPEE: Yes, Madam Chair.
- 24 CHAIRMAN IGNATIUS: All right.

1	Why don't we reserve any objection to
2	that?
3	Ms. Manzelli, any concern you
4	have on the commitment your witness just made
5	to go do some work?
6	MS. MANZELLI: No, as long as
7	Ms. Von Mertens is not expected to show up
8	with a check that would be the next exhibit.
9	[Laughter]
LO	MS. MANZELLI: We can
L1	certainly come up with this. Obviously, it
L2	won't be this week.
L3	MS. GEIGER: Actually, during
L4	the break, if we have a chance to confer with
L5	this panel, we have documents that might help
L6	them answer that question.
L7	CHAIRMAN IGNATIUS: All right.
L8	Well, maybe that's a good idea, to discuss
L9	it. We'll hold off on reserving an exhibit
20	number. Thank you for that offer.
21	MR. DUPEE: I have several
22	more questions, Madam Chair, along similar
23	lines. And maybe you want to combine
24	exhibits, perhaps not.

1 BY MR. DUPEE:

Q. So I would ask you, once we determine how
many ponds greater than 96 acres there are in
New Hampshire with undeveloped shorelines,
how many of those exist in the southern part
of the state? I'll arbitrarily call that
south of Plymouth.

And in a similar manner, how many of those 96-acre or larger ponds have dams on them? Would you be willing to get that information?

(Court Reporter interjects.)

MR. DUPEE: How many have dams

on them?

8

9

10

11

12

21

22

23

- 15 A. (Brown) Okay.
- Q. And the same -- I guess the last question
 along that line is how many of these ponds,
 96 acres or greater in size, are part of a
 wildlife sanctuary, a state park or a federal
 preserve?
 - A. (Brown) Can I ask, wildlife sanctuary
 designated by any particular organization?

 MR. ROTH: Madam Chairman, I'm
 sort of reluctant to make this suggestion and

this commentary, but I think putting the burden on the Audubon Society for producing what could be a rather detailed and difficult research project, seems to me it's not Audubon's burden to do that. However, I'm looking over at Director Stewart and realized that his program probably has people who think about this sort of thing all the time, and perhaps a request of this nature to the Water Division of DES would be more appropriate.

MS. MANZELLI: Quite frankly, that is who we would contact.

CHAIRMAN IGNATIUS: I think
this is something we can discuss in a break
to see what is already available that Ms.
Geiger referenced. There may be state
records that already have identified that.
So let's identify, first, the information
that's being sought and then during a break
have some discussion about the best way to
locate it.

I'm sorry. Mr. Froling.
MR. FROLING: Madam Chairman,

{SEC 2012-01} [DAY 9 MORNING SESSION] {11-30-12}

1	could we include in that
2	(Court Reporter interjects.)
3	MR. FROLING: Could you
4	include in that request private water
5	impediments, not great ponds
6	MR. ROTH: I'm going to object
7	to this. Mr. Froling had his opportunity to
8	cross-examine and ask for information when it
9	was his turn. And I've noticed throughout
LO	this proceeding he hasn't asked a single
L1	question until today, and that was his
L2	opportunity. So I think this is out of
L3	order.
L 4	CHAIRMAN IGNATIUS: And the
L5	reason that you're requesting that, Mr.
L6	Froling?
L7	MR. FROLING: Well, for
L8	instance, the Robb Reservoir is not a great
L9	pond; it's a private water impediment. It's
20	in the same vicinity. It serves the same
21	function.
22	CHAIRMAN IGNATIUS: I think
23	I'm going to accept the objection and not
24	include that in the request.

1 Please continue, Mr. Dupee.

2 MR. DUPEE: Thank you, Madam

3 Chair.

- 4 BY MR. DUPEE:
- In regards to your question to me, Mr. Brown,
 if there's a statutory definition, either a

 New Hampshire law or rule defining a wildlife
 sanctuary, I would ask for whatever gets to
 that. If not, it could be the sanctuaries
- 10 owned by the Audubon Society.
- 11 A. (Brown) Okay.
- Q. How many sanctuaries does Audubon Society operate in New Hampshire?
- 14 A. (Brown) I believe the number is 39.
- 15 Q. And this might be any panel member. Does the
- 16 national Audubon Society contribute in any
- 17 way towards the maintenance of the Willard
- 18 Pond Sanctuary -- and by "maintenance," do
- 19 they provide management expertise, funding,
- 20 technical assistance, or any other way
- 21 support the Willard Pond Sanctuary?
- 22 A. (Foss) New Hampshire Audubon is completely,
- 23 politically and financially and in every
- other way independent of the national arm.

```
1 Q. Thank you. And I think I heard the answer to
```

- my next question, which is: Are there
- 3 acreage under the control of other
- 4 organizations adjacent to the Audubon Society
- 5 holdings? I'm calling it the leveraged
- 6 holdings, meaning there are other parcels of
- 7 property contiguous with the Audubon holdings
- also used for conservation purposes. And I
- believe the answer I heard earlier was yes.
- 10 A. (Brown) Can you just clarify that, please?
- 11 O. I'm sorry. If we looked at --
- MS. MANZELLI: I think it's
- 13 ASNH 3.
- 14 MR. DUPEE: Thank you for
- pre-assuming my question. You are correct.
- 16 BY MR. DUPEE:
- 17 Q. This document -- what I'm really asking you
- is, are there parcels of land contiguous with
- 19 that held by Audubon which essentially serves
- 20 the same purpose of conservation?
- 21 A. (Von Mertens) Very definitely a significant
- 22 corridor of conserved lands.
- 23 Q. I believe I heard a figure of 30,000 acres,
- or I saw that in your testimony?

- 1 A. (Von Mertens) Yes.
- 2 Q. And in terms of purchase of these acreages, I
- 3 believe I heard earlier testimony today of a
- figure of 500,000 was out there for some
- payments by the, I guess, Forest Legacy
- 6 Management Program? Is that right?
- 7 A. (Von Mertens) Specifically for the Audubon
- 8 Sanctuary.
- 9 Q. And did I hear of a Phrase 3 cost of
- 10 \$3 million? Is that right?
- 11 A. (Von Mertens) For land abutting the sanctuary
- that's held by the Harris Center.
- 13 Q. And then the State contributed -- I believe I
- heard LCHIP contributed \$250,000?
- 15 A. (Von Mertens) That's correct.
- 16 Q. And then an additional \$150,000 I understand
- 17 was donated by the Fish and Game Department.
- 18 A. (Von Mertens) Correct. That's my
- 19 understanding.
- 20 O. So it would be correct to assume that this
- "Super Sanctuary," as it's referred to in
- your testimony, has significance beyond the
- 23 town of Antrim?
- 24 A. (Von Mertens) Yes.

- 1 Q. Would it be of state-level significance?
- 2 A. (Von Mertens) I don't know how to define
- 3 that.

10

- Q. I would say, are state dollars contributing towards the project?
- 6 A. (Von Mertens) Then it would be federal.
- 7 Q. That would be my next question. So there are state and federal dollars obviously involved with the purchase and, I assume, management
- And when did the Audubon Society begin
 the process of creating what became the
- 13 Willard Pond Sanctuary?

of this area.

- A. (Von Mertens) It's a wonderful story, and I
 could tell it in a half an hour. But it was
 back with the death of Elsa dePierrefeu in
- 17 1962. How is that for short?
- 18 Q. Okay. I think I noted also in the testimony,
- a number 1985. But maybe it's another
- 20 number.
- 21 A. (Von Mertens) It's expanded and expanded and
- 22 expanded. But the original donation was upon
- 23 Elsa dePierrefeu's death.
- Q. You mentioned that was in the 1960s?

- 1 A. (Von Mertens) Yes.
- 2 Q. So, even the 1985 number -- or year would
- have been 27 years ago, by my math. And
- d obviously, the 1960s would be a good deal
- 5 earlier than that.
- 6 A. (Von Mertens) What is the 1985 date?
- 7 Q. I understood from, I believe it was your
- 8 testimony, that it was when the process began
- 9 of procuring the Willard Pond Sanctuary. But
- 10 maybe I'm incorrect about that.
- 11 A. (Von Mertens) No. I have an exhibit that
- 12 gives the chronological dates. And I believe
- it's No. 2 or 3 in the packet. Let me
- just...
- 15 MS. MANZELLI: I believe what
- 16 you're looking for is ASNH 5.
- 17 WITNESS VON MERTENS: Thank
- 18 you.
- 19 MS. MANZELLI: Which is
- "Willard Pond, A Legacy Of Protection."
- 21 WITNESS VON MERTENS: Thank
- 22 you.
- MS. MANZELLI: You may not
- have a copy there. Give me a moment.

1 WITNESS VON MERTENS: I have

2 one.

MS. MANZELLI: Okay. Go

4 ahead.

- 5 A. (Von Mertens) Yes. I had it wrong. It was
 6 1967 that Elsa dePierrefeu died. And do you
 7 have that in --
- Q. I will take your word for it. I'm sure it'sin the record.
- 10 A. (Von Mertens) And then it's about 15
 11 transactions gradually adding on to her
 12 initial bequest, which was 650 acres. And
 13 then her family members, one by one by one
 14 added on. And then the State and Harris
 15 Center and Audubon --
- Q. So, from almost the middle of the last
 century until the present, this has been an
 ongoing effort organized and led by the
 Audubon Society.
- 20 A. (Von Mertens) And as recently as last year
 21 was the most recent purchase -- fundraising
 22 and purchase.
- Q. Ms. Von Mertens, has the Audubon Society
 publicized the existence of the Willard Pond

Sanctuary, such as in places like books,

pamphlets, magazines, web sites, news

releases, or otherwise made the public aware

of the fact there was a wildlife sanctuary up

in that area?

A. (Von Mertens) It is a wildlife sanctuary.

And Audubon's mission is for wildlife and for people, and we try to keep a balance. And we were horrified when the Boston Globe, I don't know how many years ago, featured it in their Travel Section as "the place to go." And so I guess Phil should answer that question.

WITNESS VON MERTENS: Do we publicize the sanctuary?

- A. (Brown) I think we do a pretty good job of publicizing it on our level, anyway, through most of the sources that you referred to.
- Q. So nobody would be surprised, do you think, to know that there's a wildlife sanctuary at that pond?
 - A. (Von Mertens) There's signage, certainly. I
 would say, as someone who was fundraising for
 two of the expansions of the project, there
 are a number of people that go to the

sanctuary and have no idea it's an Audubon sanctuary. And we try to address that education in our fundraising.

- Q. Thank you. So, Mr. Brown, you thought there was some publication going on. So it's not recently, the last month or last year that the Audubon Society has made an effort to make this known. It's been known for a period of time?
- 10 A. (Brown) Yeah, since I've been managing the land, anyway.
- Q. And do you think the business community in the Antrim area is aware of the fact that Willard Pond is a sanctuary?
- 15 A. (Brown) Yes, certainly.

4

5

6

7

8

9

16 Okay. And so my next question is going to go 17 to aesthetics. I guess I'll ask panel members for each or all of you to comment as 18 you wish. But in your opinion -- and I'm 19 20 asking you strictly on the basis of 21 aesthetics, not on whether or not there's 22 another solution that could be done or you 23 had to make some sort of other arrangement to maybe obtain some offsetting benefit. 24

```
1 Strictly on the basis of aesthetics, is the
```

- visual presence of a wind farm aesthetically
- 3 consistent with an abutting piece of property
- 4 which is managed as a wildlife sanctuary, as
- 5 managed by intention to be an undeveloped
- 6 piece of property?
- 7 A. (Nickerson) I think it is. Obviously, I
- 8 think it depends on how pristine the property
- 9 is and the purposes for which it was
- 10 purchased and expanded. But I think in this
- 11 case the answer is yes.
- 12 Q. You're telling me that you think that they
- are aesthetically consistent?
- 14 A. (Nickerson) I think they're inconsistent.
- 15 Q. Okay. My question was: Do you think they
- 16 are consistent?
- 17 A. (Nickerson) Oh, I'm sorry. I thought you
- 18 said -- my apologies.
- 19 Q. So your answer, sir, would be inconsistent.
- 20 A. (Nickerson) Inconsistent.
- 21 Q. Which I think would be probably consistent
- with the position taken by your policy
- 23 committee and your --
- 24 A. (Nickerson) Yes, sir.

- 1 Q. -- exhibit.
- 2 And was that committee, was that a duly
- 3 constituted, bona fide committee of the
- 4 Audubon Society of New Hampshire?
- 5 A. (Nickerson) Yes, sir. It's the board of
- 6 trustees.
- 7 Q. So it represents the Audubon Society
- 8 membership, do you think?
- 9 A. (Nickerson) I feel that it does. Yes, sir.
- 10 Q. Now, does -- okay.
- And I believe, Ms. Von Mertens, I think
- in your testimony you mention meeting a
- 13 canoeist or a kayaker out on Willard Pond who
- 14 worked for EPA; is that correct?
- 15 A. (Von Mertens) Yes.
- 16 Q. And what was that individual doing there?
- 17 A. (Von Mertens) He was with his children. He
- 18 was collecting water-quality samples. He was
- 19 also going to depths and exploring sediment.
- 20 I really don't know. But it's a national
- 21 program that he was involved in, and he was
- 22 testing Willard Pond as the only baseline
- water body in the state against which --
- 24 because it's undeveloped, against which water

quality in other water bodies in the region were compared.

- Q. So, the U.S. Environmental Protection Agency had taken notice of Willard Pond as being a clean, unmolested water body which could then be used to compare to other water bodies as a sort of baseline quality?
 - A. (Von Mertens) They have a label for that category, and I don't remember what the label is. But I do remember that there's only one water body in the state that has -- is the baseline, the gold standard against which other water-quality bodies are compared.
 - Q. Maybe we'll be able to confirm that through
 Director Stewart's organization so we can
 learn more about that EPA initiative.

Mr. Brown, would you agree that the -or what is -- I should just ask you that.
What is your opinion about the compatibility
of the aesthetics between a wind turbine
facility visible from a wildlife sanctuary?

- A. (Brown) I personally feel that they're aesthetically incompatible.
- Q. And for the larger group, do you think

1 there's way to mitigate that? If the windmills were painted a different color or 2 they were relocated along the ridgeline in 3 some way or they were made smaller? 4 think any of those particular things would, I 5 will say, solve the aesthetics problem?

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

24

- (Foss) I would need to see the visual Α. approximation of what it would look like under any other conditions in order to make that judgment, the visual simulation or whatever they call them.
- Which goes back to my earlier question. Q. Do you feel there's a fundamental incompatibility? So I guess if you answered that you're willing to entertain, it would suggest to me that you would think there wasn't. But if you feel that there is, then you would say that there is no different size that would change your opinion.

So, just to make sure I'm clear on the question I'm asking you and I'm not confusing anybody, in other words, you're not trying to mitigate. You're simply telling me whether or not you think those views are compatible

in any sense.

- A. (Foss) If the size and placement was such that they were not visible from the pond, then that would be sufficient. However, I'm not sure that -- given that there's, I think, 8 or 10 that are visible from the pond, I think mitigation would be very difficult.
- 8 Q. So then, if they're visible from your
 9 perspective, there's no mitigation that would
 10 allow for a co-existence, in your opinion.
 - A. (Foss) In my personal opinion? If the visibility was limited above the ridge, there is a potential for it to be compatible. But for them to loom essentially another almost full distance above the horizon, that's pretty incompatible.
 - Q. I guess I'm a bit confused. So I guess my question is: Are these compatible aesthetically, these two programs? Is there any way they can be made aesthetically compatible? It sounds like you're telling me, yes, that they can be. But I understood a person on the panel say, no, they aren't. So I'd like to maybe have some sense as to

- what the panel thinks.
- 2 A. (Foss) As currently proposed, they are
- incompatible.
- A. (Brown) And that's what I would agree as well.
- Q. Then let me go back to my question. Is there
 any change that could be made that would make
 it compatible? Or is it the very existence
 of a wind farm in conjunction with your
 facility visually not subject to mitigation?
- 11 A. (Brown) I feel that upon seeing a proposal, I

 12 could feel differently about visual effects,

 13 if a lot of alterations were made.
- 14 O. Mr. Nickerson?
- 15 A. (Nickerson) Yeah, the focus is strictly on
 16 aesthetics. But let's keep in mind the fact
 17 that we're carving up the ridgelines,
 18 fragmenting the forest. We may kill
 19 migratory birds and bats. And those things
- are all issues for Audubon as well. So I'll
- 21 take the hard line. I think they're
- incompatible under any circumstance. That's
- 23 my personal opinion.

24

A. (Von Mertens) And that's what I was going to

say. I have trouble isolating the aesthetics

as the only consideration. And I think Mr.

Nickerson expressed that well.

- 4 Q. Dr. Foss?
- 5 A. (Foss) I would agree with that. I was

6 limiting my response to your restriction on

- 7 aesthetics.
- 8 Q. Mr. Brown?
- 9 A. (Brown) As was I.
- 10 A. (Von Mertens) We were trying to listen to the
- 11 question and respond to it, and we did too
- good a job.
- 13 Q. You realize it's sort of a key thought here.
- 14 Nothing further, Madam Chairman.
- 15 CHAIRMAN IGNATIUS: All right.
- 16 Thank you. Other Committee member questions?
- Ms. Lyons.
- 18 MS. LYONS: I just have a --
- 19 we're struggling for an exhibit here. I was
- looking for the wind energy policy from
- 21 Audubon that was referenced from 2012.
- MR. IACOPINO: I have been
- told it's an AWE exhibit. But I think the
- 24 AWE exhibit is the energy conservation policy

that, as been testified, is no longer the 1 2 policy. Does anybody know if the wind 3 energy policy is actually in the record? 4 MS. MANZELLI: I don't know if 5 it's in the record. I know that it is not 6 7 currently an Audubon exhibit, and I was going to ask you about that over the next break. 8 CHAIRMAN IGNATIUS: Wasn't Mr. 9 Nickerson looking at it, and we told him, no, 10 11 don't look at that one, look at the other 12 one? 13 MS. MANZELLI: We did. 14 CHAIRMAN IGNATIUS: Okay. So 15 we know it's here. We just don't know --16 MS. MANZELLI: I have a copy 17 in my hand. CHAIRMAN IGNATIUS: 18 So at a 19 break, let's sort that out. 20 Other questions? Ms. Bailey. 21 INTERROGATORIES BY MS. BAILEY: 22 You don't have an electronic device up there 0. 23 that you can look at exhibits? 24 MS. MANZELLI: Oh, I can --

```
1
                         MS. BAILEY:
                                      No, no, not that.
         I'm looking at Exhibit PC 1, the Vissering
2
         testimony, the pictures in the back.
3
         it's specifically the picture of Willard
4
5
         Pond.
               Actually, we --
                         MR. ROTH:
                                    We have the boards.
6
7
                         MS. BAILEY:
                                      Yeah, it might be
                         It's the picture that's
8
         on the board.
         labeled 1B, but it's on -- I don't remember
9
         what exhibit on the board it is.
10
11
                         MR. ROTH:
                                    Glad I did that
         without dropping it --
12
                         CHAIRMAN IGNATIUS:
                                            You can't
13
14
         whack the witness. That's one of the rules.
15
                         MR. ROTH:
                                    1B?
16
                         MS. BAILEY:
                                      Picture 1B.
17
    BY MS. BAILEY:
         Now, can you look at Exhibit ASNH No. 3.
18
19
         That's the map that was provided by you this
         morning in color. What's the exhibit on that
20
                 What's the exhibit number on the
21
         board?
22
         original corner of the board that your --
23
                         MR. IACOPINO:
                                        Upper right
24
         orange sticker.
```

- 1 A. (Brown) PC 1B.
- 2 BY MS. BAILEY:
- 3 Q. PC 1B. And we're looking at the middle
- 4 picture, which is a simulation photograph
- that Ms. Vissering -- yeah, that Ms.
- 6 Vissering created of Willard Pond. Do you
- 7 recognize that area of Willard Pond?
- 8 Anybody?
- 9 A. (Brown) Yes.
- 10 Q. Okay. Can you orient me on the map, on
- 11 ASNH 3, as to where that picture was taken
- 12 from?
- 13 A. (Brown) Okay. Well, on the actual exhibit it
- says "Willard Pond Dam." So --
- 15 Q. Right. But I don't know where Willard Pond
- 16 Dam is.
- 17 A. (Brown) Okay. On this exhibit, the dam would
- 18 be the far southeastern corner of Willard
- 19 Pond. So, to the right of that corner of the
- 20 boat picture.
- 21 Q. All right. Thank you. That's all I needed.
- 22 INTERROGATORIES BY CHAIRMAN IGNATIUS:
- 23 Q. While we're sticking with that, does that
- 24 mean that the orientation of the photograph

is away from the direction of the turbines if

- it's -- did you say the dam is to the right
- of the boat picture on the map? So does that
- 4 mean that the picture is taken pointing
- 5 towards the east?
- 6 A. (Foss) Northwest.
- 7 A. (Brown) Yeah, the map says "northwest" on
- 8 this exhibit.
- 9 Q. So it is in the direction of the turbines?
- 10 A. (Brown) I would say so.
- 11 Q. I'm asking you. I'm just trying to compare
- where we see the location of the turbines on
- the map and try to align that with what the
- 14 photograph is. I can't see the picture, so I
- don't know. Do you see turbines in the
- 16 picture?
- 17 A. (Panel Members) Oh, yes. Yes.
- 18 Q. Thank you.
- MR. ROTH: You're supposed to
- 20 stand 17 inches from the picture.
- 21 BY CHAIRMAN IGNATIUS:
- 22 Q. I have some other questions that I hope are
- more coherent than the first. I'd love hear,
- Mr. Nickerson, about the bald eagle egg

transplant, but that's got to be in another
proceeding.

[Laughter]

- 4 A. (Nickerson) I'll see you after the show.
- Q. Okay. Mr. Brown, you had said that there are some bats which have taken up residence in a
- barn after they left another property. Is
- 8 that barn on the sanctuary lands?
- 9 A. (Brown) Yes, it is.
- 10 Q. And do you know, is it a little brown bat
 11 colony there?
- 12 A. (Brown) Yes, they've been determined to be
 13 little brown bats by New Hampshire Fish and
 14 Game biologists.
- 15 Q. Thank you.

3

- 16 You also stated in your direct testimony
- that placement of the turbines will determine
- the direction of runoff. It's Page 8, at the
- 19 bottom of the page. And so I don't mess up
- your quote, why don't we try and find that.
- 21 It's electronically Exhibit 26, if people
- 22 have it that way.
- 23 A. (Brown) Okay. Are you looking for me to read

24 that?

Well, let's make sure everybody finds that.

```
It's towards the bottom of Page 8. And that
the placement of Turbine 10 -- actually, it
wasn't all the turbines. And then I'm
jumping ahead "will determine the direction
```

- jumping ahead "will determine the direction in which runoff from the turbine pad and
- 7 associated roads will flow." Can you explain
- _ _

Q.

1

19

20

21

22

23

24

Α.

10 (Discussion between Mr. Brown and Dr.

why you draw that conclusion?

11 Foss off the record.)

(Brown) Yes, I --

- A. (Foss) The placement of Turbine 10 is very near the boundary between three different watersheds, one of which is the Willard Pond watershed, one of which drains east and is called the Great Brook Antrim Tributaries, and one of which drains to the west. So it's difficult with the scale of this map to know which watershed that turbine pad is actually going to drain into because the precision may not be exact.
 - Q. And what's the import of that? It will determine the direction one of those three ways. But why does it make a difference

which of them it may go to, the runoff may go to?

- A. (Foss) Because of the quality of the water in
 Willard Pond, which was recently discussed.

 The potential for sedimentation getting into
 streams that drain into Willard Pond was the
 concern.
- Q. Are you aware that any construction
 authorized would have runoff protocols and
 management of construction impacts?
- 11 A. (Foss) I am. But I'm also aware that in

 12 events of major precipitation, sometimes

 13 those structures can fail.
- 14 Q. All right. Ms. Von Mertens, in your direct
 15 testimony, on Page 12, you said that no other
 16 water body of equal size in the region has
 17 this degree of undeveloped shoreline. That's
 18 not a full quote. But when you refer to
 19 "this region," what region are you talking
 20 about?
 - A. (Von Mertens) I don't know of any other -- I

 don't know where the nearest one is. But I

 was -- we talk about "our Monadnock Region"

 all the time. And I think, default,

21

22

23

that's -- of course, I was a little surprised
when I heard people in Keene talk about their
Monadnock Region, too. So it's a loose
definition.

5

6

7

8

- Q. So it's not quite so quantifiable. But I take it you're saying it is fair to say that it's an unusually large water body to have no developed shoreline.
- (Von Mertens) I think the point I was making, 9 Α. 10 and it's a bit of a Catch-22, but it's 11 accessible. People go there. And of course, in the summer, I think I mentioned, on a hot 12 summer Saturday it becomes a swimming beach. 13 14 And the wildlife sanctuary, you would not 15 know it was a wildlife sanctuary. But that 16 activity is limited. And our management of 17 the sanctuary creates undisturbed areas. that's the importance, that people do go 18 there because -- I think probably you could 19 20 hike to an area that was pristine. I can't 21 think of one without development. But you 22 can drive to this one. And you park away 23 from the launch, but...
 - Q. In the materials that were handed out in

color this morning, looking at Attachment -well, that's got another siting, FVM-4F.

That must refer to something else.

MS. MANZELLI: It should also have the ASNH dash number on the top

6 somewhere written in handwriting.

CHAIRMAN IGNATIUS: It may be part of No. 6. ASNH 6 has a series of photographs.

10 BY CHAIRMAN IGNATIUS:

- Q. And so No. 4F is a picture that says it's a poster created by Trout Unlimited. And I don't want to ask about the Trout Unlimited project, but I do want to ask you about, in the bottom right-hand corner, it says the "Willard Pond Forever Wild Project" is referenced. What is the Willard Pond Forever Wild Project?
 - A. (Von Mertens) That was my terminology for the fundraiser for the last remaining unprotected parcel on Willard Pond. And my pitch to donors was that this would make what you see Forever Wild. And it's a confusing -- it has nothing to do with an easement.

- 1 Q. Okay. Thank you.
- 2 A. (Brown) I can jump in. We do have a
- 3 self-imposed forestry restriction on that
- 4 last parcel --
- 5 A. (Von Mertens) Could I add a little humor?
- 6 Q. Okay. I think we could probably use it.
- 7 A. (Von Mertens) There's a picture here of a
- great blue heron with a rainbow trout. And
- 9 my friend, Ed Henault, who I mentioned
- before, said, "Wait a minute. I've never
- 11 caught a brookie" -- or a rainbow. Is that a
- 12 brook trout or a rainbow? I think it's a
- brookie. "I've never caught a fish that
- 14 large."
- 15 A. (Nickerson) It's a big brook trout.
- 16 A. (Von Mertens) It's a brookie.
- 17 Q. That's great.
- 18 MR. ROTH: The heron's the
- 19 better fisherman.
- 20 BY CHAIRMAN IGNATIUS:
- 21 Q. You also have a photograph of someone in a
- 22 black fly mask. Only the true lovers of
- winged creatures would want to be sure that
- we're preserving the black flies. But...

A couple of other questions. Dr. Foss,

2 you had stated in your direct that migrating

3 raptors and golden eagles concentrate along

4 ridgelines that are perpendicular to the

5 prevailing northwest winds.

- 6 A. (Foss) Correct.
- 7 Q. Is that -- well, first of all, does the

8 ridgeline where these turbines are proposed

9 meet that definition of what you're talking

10 about?

- 11 A. (Foss) Yes.
- 12 Q. And is it unusual in this area to have those
- sorts of ridgelines? Do you know?
- 14 A. (Foss) No. The whole kind of western
- 15 backbone of New Hampshire has ridgelines

trending in that direction, which is why the

17 American Bird Conservancy has included that

in their Atlantic migration -- raptor

19 migration corridor.

20 Q. So it's not that you're saying that this is

the only location they might go to, but that

they're likely to go to that area and be at

23 risk?

24

A. (Foss) Correct.

Q. You stated in your direct -- and this was on
Page 3 -- that flight altitude -- and I
forget if we're talking about raptors or who
specifically -- the flight altitude decreases

6 A. (Foss) Correct.

Q. What's the import of that? What should we make of that?

as wind speed increases.

A. (Foss) Well, early in the migration season, late August and during September, there's still a fair amount of heat. And the heat rising from the ground creates what are called thermals. And they're basically rising pockets of warm air. And during their migration, raptors will find those pockets and circle around in them to gain altitude and then glide off to find the next pocket. So that is one way in which raptors make their migration efficient. Later in the season it's colder, and that option is less available, if at all.

And during that portion of the migratory period they use what's called "orographic lift." And if you imagine a wind coming

across this room and hitting this wall, it's
going to rise, and it's going to trend kind
of along that ridge, so to speak. And
those -- that orographic lift only -- I'm
trying to remember the figure. That only
rises to maybe 200 meters, whereas the
thermals go way, way up. So raptors using

thermals go way, way up. So raptors using

8 orographic lift are migrating at lower

elevations than raptors using thermals. Does

10 that help?

- 11 Q. It does. But your statement had been that
 12 the flight altitude decreases as the wind
 13 speed increases. So how does that then
 14 factor in?
- 15 A. (Foss) Okay. As wind speed increases, these
 16 thermals break up because the wind kind of
 17 blows them apart. So thermals really develop
 18 under fairly calm conditions. So that's the
 19 relationship between wind speed.
- Q. And what import does that have on us considering the turbine proposal? I mean, if -- go ahead.
- 23 A. (Foss) Particularly with respect to golden
 24 eagles which migrate later in the season and

are much more apt to use orographic lift than

- thermals. So they are flying at lower
- elevations than, for example, broad-winged
- 4 hawks which travel through New Hampshire in
- 5 huge numbers, but typically at very high
- elevation. So it's a matter of the risk.
- 7 Q. Does the speed of the wind, and therefore the
- 8 speed of the rotation of the turbines, create
- a greater risk or a lesser risk to golden
- 10 eagles, in terms of collisions?
- 11 A. (Foss) I'm not sure I understand the
- 12 question.
- 13 Q. Are they -- are the golden eagles any more
- 14 likely to have a collision in high wind
- 15 conditions or in low wind conditions, or is
- there no difference on wind speed?
- 17 A. (Foss) I would really need to defer to my
- 18 colleagues in West Virginia on that. But I
- believe that, in general, the stronger the
- wind, the lower they're flying.
- 21 Q. And the lower they're flying, then that
- increases or decreases the risk of
- collisions, if you know?
- 24 A. (Foss) Well, if they're flying within the

rotor-swept zone, that would increase the risk.

- Q. A few questions about common nighthawks. You had said in your supplemental testimony, on Page 3, that you would recommend mitigation strategies for common nighthawks. What strategies are you aware of that might be wise?
- (Foss) We're actually still trying to figure 9 Α. 10 that out. But I think the major one would 11 be -- well, there would be two. One would be if a pair of nighthawks was discovered to be 12 nesting in the immediate vicinity of the 13 14 turbine pad, that once the young hatched, and 15 until the young dispersed, that turbine be 16 feathered or turned off during the period of 17 the day when nighthawks are active.
- 18 Q. And what time of day is that?
- A. (Foss) Well, definitely dawn and dusk,

 potentially through the night. But that's

 research that needs to be done.
- Q. All right. And you said there were two.
 What would be another strategy?
- 24 A. (Foss) Another would be trying to render the

turbine pads inhospitable to nighthawk
nesting.

- Q. Have you ever heard anyone propose anything other than the gravel base that might be helpful?
- A. (Foss) We've been discussing all kinds of
 possibilities, including the tarps that they
 use on football fields. But we haven't quite
 got that figured out yet. I mean, it depends
 on what you're dealing with for a turbine pad
 to begin with.
 - Q. Do people ever create gravel bases somewhere away from turbines as a way to mitigate, to encourage nighthawks, but somewhere that isn't in the danger zone near a turbine, similar to the sort of wetlands mitigation that Mr. Stewart was mentioning the other day?

12

13

14

15

16

17

- 19 A. (Foss) I have no idea if that would work for nighthawks.
- Q. You also said, going back to golden eagles, that you could minimize the risk -- this is on Page 5 of your direct -- that you could minimize the risk with a combination of

conservation measures and forms of
mitigation. What kind of mitigation were you
thinking of?

4

5

6

7

8

9

10

11

12

13

14

15

16

17

18

19

20

21

22

23

- (Foss) Well, there are a lot of cutting-edge Α. forms of mitigation that are being developed right now for large birds of prey, including using radar to detect when large birds are coming and then contacting the operators to shut down specific turbines. I don't think we're quite at that level of sophistication in New Hampshire at this point. But possibly there's -- there are scientists working on modeling the specific wind conditions under which these birds are migrating. And there's the potential for identifying conditions under which migration is likely and constraining turbines under those conditions.
- Q. And it's probably in your testimony. The migratory period for the golden eagles, or I guess let's do it in a broader sense, the large birds of prey is what?
- A. (Foss) Well, for everybody it starts in

 August and runs into November. Goldens tend
 to be later and are more October, November.

Q. You also recommended a change in the period of time that clear cutting would be allowed.

- A. (Foss) I believe Fish and Game also recommended that in their recent comments.
- Q. I have it here somewhere. You had said to avoid tree clearing until after August 1st; is that right?
- 8 A. (Foss) Yes.

18

19

20

21

- 9 Q. That was on Page 2 of your supplemental
 10 testimony. And the reason for holding off
 11 until after August 1st is what?
- 12 A. (Foss) Is to enable forest-nesting birds to
 13 complete their nesting cycle.
- 14 Q. How early would that period of time where
 15 there would be a moratorium on cutting start,
 16 in your view? If it's going to end
 17 August 1st, when do you think it would begin?
 - A. (Foss) Well, given mud season, it's generally better to do harvesting in the fall, and in many cases in the winter when you're on frozen ground and avoiding soil compaction and erosion issues.
- Q. And at what point does the nesting cycle
 begin that you'd want to -- I assume you'd be

concerned about the beginning of the cycle
phase as well as the end.

- A. (Foss) Depends on the species. I mean, if
 you're a great horned owl -- but we're not
 going to -- we can't worry about great horned
 owls.
 - I guess my recommendation would be to start August 1st and then go as long as you can on frozen ground. I mean, by the time you're done with mud season, your migrants are back and things are starting.
- Q. So when you say "done with mud season," what do you mean by that?
- A. (Foss) That depends on the year. I expect
 our local residents can be a better judge
 when that occurs in that particular area than
 I. But March, for sure. In some years, I'm
 sure it runs well into April.
- Q. You also -- I'm sorry to be jumping around on you. My notes are jumping around on me.

Also back on golden eagle migration, you had said on Page 7 of your direct testimony that another way to minimize risk would be to curtail operations during daylight hours

during golden eagle migration periods; is that right?

A. (Foss) Correct.

3

7

8

9

- Q. And so when you say "daylight hours," do you really mean sunup to sundown, or is there a particular time of day that's more active?
 - A. (Foss) I would need to look at data on when goldens are starting in the morning and when they're putting down at night, and that's not something I can answer here.
- 11 Q. Those are all my questions.
- 12 CHAIRMAN IGNATIUS: Anything
- else from the Committee?
- Yes. Well, from Mr. Iacopino,
- 15 questions.
- 16 INTERROGATORIES BY MR. IACOPINO:
- 17 Q. My first question, and it doesn't really
- 18 matter who answers it, just as long as you
- 19 know, because I was surprised -- ASNH 3, the
- 20 map that you submitted as one of your
- 21 exhibits, it does not appear from that map
- that the summit of Bald Mountain, at least,
- is in protected land by conservation easement
- or otherwise. Is that correct?

```
1 A. (Brown) I can clarify. There are two
```

- distinct summits on Bald Mountain. So the
- northern summit, which has the loop trail as
- 4 part of its feature, that's the actual high
- 5 point of Bald Mountain.
- 6 Q. So where the designation of Bald Mountain is,
- 7 that would be at the southern summit?
- 8 A. (Brown) Yeah, the map's a little misleading
- 9 in that way.
- 10 Q. And that southern summit is not in
- 11 conservation land?
- 12 A. (Brown) That is correct.
- 13 Q. Okay.
- 14 A. (Brown) At least it's not in New Hampshire
- 15 Audubon conservation.
- 16 Q. But this map tries to designate other
- 17 conservation land abutting your properties;
- 18 correct?
- 19 A. (Brown) I see that, yes. So it's not in
- 20 conservation, from my knowledge.
- 21 Q. Okay. Ms. Foss, early on in your testimony
- 22 today, you indicated that the U.S. Fish and
- Wildlife Services' model is one, for golden
- eagle analysis, is one of a number of things

1 that should be used in making a

2 determination. Did I understand that

- 3 correctly?
- 4 A. (Foss) Yes.
- 5 Q. You also then indicated that it was your
- 6 impression in this case that the Fish and
- 7 Wildlife Service only used the model.
- 8 A. (Foss) That's my impression. I don't know
- 9 one way or the other.
- 10 Q. Well, I was going to ask you. What did you
- base -- what brought you to that impression?
- 12 A. (Foss) What brought me to that impression was
- 13 discussions at the conference I just returned
- from and in the -- I'm not sure if it's in
- the e-mail I have here. But in --
- 16 MS. MANZELLI: I believe it's
- 17 AWE 43. Is that the e-mail, Susan?
- 18 MS. GEIGER: Yes.
- 19 MS. MANZELLI: Yeah. If you
- want to refer to AWE 43, that's the Nystrom
- 21 e-mail.
- 22 WITNESS FOSS: Is that the one
- that includes the output from the model?
- MS. MANZELLI: Why don't you

- look at the exhibit.
- 2 A. (Foss) Yes. The fact that AWE 43 includes 3 the output from the model.
- Q. Okay. But I mean, that exhibit includes
 other, I don't know if they're called
 criteria, but other things that were
 considered by Fish and Wildlife Service as
 well, doesn't it? I mean, didn't they also
 consider their land-based wind energy
 quidelines and...
- 11 A. (Foss) I would need to go back and...

 (Witness reviews document.)
- 13 Q. Well, let me -- I don't...
- 14 (Witness reviews document.)
- 15 A. (Foss) I'm not aware of any other specific criteria.
- Q. Do you see the last full paragraph -- well, second to the last full paragraph on Page 2 of the exhibit starts off, "According to my
- 20 review, the ABPP prepared for AWE's Antrim
- 21 Wind Energy Project is consistent with the
- 22 Service's land-based wind energy guidelines"?
- 23 A. (Foss) Right. That's the land-based energy
 24 guidelines.

- 1 Q. Land-based wind energy guidelines.
- 2 A. (Foss) Right, which is different from the
- bald and golden eagles guide. I'm just
- 4 getting a little confused about which
- document you're referring to.
- 6 Q. So I guess your determine -- your
- 7 understanding is that those guidelines don't
- 8 address golden eagles at all.
- 9 A. (Foss) They do not address any specific --
- any species specifically. They're more
- 11 general guidelines.
- 12 Q. Okay. So that contributed to your impression
- that only the model was used to send this
- 14 e-mail out.
- 15 A. (Foss) That contributed to my impression,
- 16 yeah.
- 17 O. You also mentioned something about
- 18 discussions at your conference in Denver.
- 19 Did you -- was Sarah Nystrom there, and did
- 20 you have any discussions with her about this?
- 21 A. (Foss) She was on the list of people who were
- 22 to attend, but I never laid eyes on her while
- I was there.

24

Q. Also, you indicated early on in your

1 testimony that you were concerned because

- there was no reference to the common
- 3 nighthawk in the materials that you had
- reviewed with respect to the project.
- 5 A. (Foss) Correct.
- 6 Q. Do you recall, in the Breeding Bird Survey,
- 7 seeing reports of incidental findings of the
- 8 common nighthawk in that survey?
- 9 A. (Foss) I do. I'm pretty certain that there
- 10 were incidental observations.
- 11 Q. Okay. I think you indicated to Commissioner
- 12 Ignatius that you were familiar with the New
- Hampshire Fish and Game letter that is marked
- as Committee Exhibit 16, dated October 26,
- 15 2012.
- 16 A. (Foss) Yes.
- 17 Q. That letter contains what appears to be at
- 18 least two specific, or maybe three specific
- 19 recommendations to the Applicant with respect
- 20 to the common nighthawk.
- 21 A. (Foss) Yes.
- 22 Q. And I guess my question to you is: Do you
- believe that those recommendations would
- 24 resolve -- if they were made conditions of a

certificate of site and facility, would they
resolve your concerns with respect to the

3 common nighthawk?

8

9

10

13

14

15

16

17

18

19

20

21

22

24

- 4 A. (Foss) I believe so, yes.
- Q. Okay. If I understand correctly, your own
 assessment -- and I'm sorry. I'm going back
 to the golden eagle again.

I guess your assessment of the risk factor to the golden eagle was a "high" risk factor; is that correct?

- 11 A. (Foss) I would have put it "moderate." I

 12 would not have put it at "high."
 - Q. Oh, okay. All right. So you would have the same opinion as the -- I think I'm getting my eagles mixed up. Let me just pull up AWE 43 again. I'm sorry. Sorry about that. It's the Fish and Wildlife e-mail.

Okay. Let me ask you about each one.

Do you disagree with their assessment -- is

your assessment the same as theirs with

respect to golden eagles, that golden eagles

is a low risk?

- 23 A. (Foss) No.
 - Q. What is your assessment of the impacts to

golden eagles or risk to golden eagles?

- 2 A. (Foss) I would rate it as "moderate."
- Q. Okay. They've put the bald eagle risk in the
- 4 "moderate" category. What is your --
- 5 A. (Foss) I would concur.
- 6 Q. All right. Mr. Brown, you indicated that you
- 7 did not believe there was sufficient data for
- 8 the Applicant's witnesses to make a
- 9 determination that the Tuttle Ridge was not a
- 10 leading line. Do you recall that testimony?
- 11 A. (Brown) I don't know if that was exactly what
- 12 I was saying.
- 13 Q. Well, why don't you refresh my memory,
- because that's the way I understood it.
- 15 A. (Brown) I may need a little help with that.
- 16 But I was referring to one particular
- 17 question. Can anybody help with those
- 18 transcripts or --
- 19 Q. Well, okay.
- 20 A. (Brown) If you could refer to that, I'll --
- 21 Q. I don't have the transcript reference because
- I was actually going off what you testified
- 23 to.

MS. MANZELLI: Would you like

```
the transcript reference?
```

- 2 MR. IACOPINO: Sure.
- MS. MANZELLI: Okay. Give me
- 4 a second.
- 5 MR. IACOPINO: Actually, it's
- 6 okay, Ms. Manzelli.
- 7 BY MR. IACOPINO:
- 8 Q. Do you believe that Tuttle Ridge is a leading 9 line?
- 10 A. (Brown) As I answered before, I said I
 11 couldn't make that determination one way or
 12 the other, but that many ridges with that
 13 sort of geography and direction can be
 14 considered -- are considered leading lines.
- Q. Did you review the various pre-construction studies provided by the Applicant?
- 17 A. (Brown) Not to very much extent.
- 18 Q. Okay. Could you just give us a quick
- definition of what a "leading line" or
- 20 "leading edge" is? I think we do have it in
- the record, but just for everybody's
- 22 refreshed recollection.
- 23 A. (Brown) If you want to say it better that I

24 can --

```
1 A. (Foss) A leading line is a geographic feature
```

- that kind of guides migrating birds. It
- 3 could be a lakeshore, such as the shores of
- the Great Lakes; it could be a coastline; it
- 5 could be a ridgeline.
- 6 Q. What is it that makes them more important?
- 7 A. (Foss) In the cases of ridges, it's an area
- 8 where you get orographic lift as I described
- 9 before.
- 10 Q. Okay. And then, Ms. Von Mertens, I just want
- to understand something. You used the term
- "exemplary natural community." And there is,
- in fact, an exhibit that we have -- it's
- AWE 6 -- which I'll pull it up. It's the
- 15 first supplement to the application. And I
- 16 believe there's a letter from the New
- 17 Hampshire Natural Heritage Bureau, dated
- 18 August 2nd, 2012. Did you review that?
- MS. MANZELLI: Excuse me,
- 20 Mike. Where in the first supplement?
- 21 MR. IACOPINO: It's electronic
- 22 Document 5.
- MS. MANZELLI: Thank you.
- 24 BY MR. IACOPINO:

1 Q. Did you have occasion to review that?

there.

else's?

4

10

23

- 2 A. (Von Mertens) I do remember the conclusion
 3 that there was no exemplary natural community
- Q. And all I want to know is, when they're talking about "exemplary natural communities," are you using the same definition as them? Or is this something that's your own terminology, or somebody
- 11 (Von Mertens) No. Thank you for asking the Α. question. I think it's a combination. 12 think Sue Morse's testimony about wildlife --13 it's a combination of -- that's natural 14 15 community. The Natural Heritage Bureau, the 16 State, would define it in terms of species, 17 specifically ferns, spruce. There's numbers of plant communities. And I've broadened it 18 out more to wildlife. And often plant 19 20 species relate to wildlife. But I have a 21 looser -- as a layperson, I have a looser 22 definition of it. Thank you.
 - Q. So your understanding of the definition used by the Natural Heritage Bureau is that

exemplary natural communities does not apply
to wildlife?

A. (Von Mertens) It's a broader -- I would
broaden it out. I think that's the danger of
a layperson versus a credentialed master's
Ph.D., that they're very specific with their
terminology. And as you've noticed with
Forever Wild, I'm not.

And then I guess my final question is

9

21

22

23

24

Q.

- really -- and I think Ms. Foss may be the
 best person to answer this. It's about this
 "high elevation," just the definition.
 Somebody, I think, said, is it spruce-fir is
 the vegetation that characterizes "high
 elevation"?
- 16 A. (Foss) Well, it depends on your -- it depends
 17 on the context. But in New Hampshire,
 18 high-elevation spruce-fir is a specific
 19 habitat type that's characterized by red
 20 spruce and balsam fir.
 - Q. Is it also characterized by other things other than just the vegetation, though?

 Soils and things like that? Aren't they all part of the designation of "high elevation"?

A. (Foss) You're talking about high elevation,

period, or high --

- Q. Elevation habitat or -- well, I shouldn't say habitat, but -- well, that's why I asked you.
 - A. (Foss) The high-elevation habitat that was of concern with the Granite Reliable project, which is kind of what I assume we're talking about here, is inhabited by a particular suite of wildlife species. And perhaps the flagship species of that habitat is the big-nose thrush, which was a major issue with respect to that application. The big-nose thrush does not occur this far south in New Hampshire if that's what you're trying to get at.
 - Q. Well, what I'm trying to determine is
 whether -- I mean, we've had somebody testify
 that, in his opinion, this is high-elevation
 habitat. And that wasn't my understanding of
 the definition of "high-elevation habitat"
 before I came into this thing. And I'm
 asking you whether or not you would say that
 this area where this ridgeline is, Tuttle
 Ridge, fits within that definition.

```
1
         (Foss) Well, wait a minute. I mean, "high
   Α.
         elevation" is a relative term.
2
        context of Hillsborough County, which I guess
3
         is what we're talking about here, that is
4
5
        high elevation. However, with respect to the
         species that we are typically concerned about
6
7
         in the New Hampshire high-elevation
         spruce-fir context, it is not in that
8
```

- Q. Okay. Thank you. I don't have any other questions.
- 12 CHAIRMAN IGNATIUS: All right.

Anything further from the Committee?

If not,

14 Ms. Manzelli -- I'm sorry.

category.

15 (Discussion among Subcommittee members
16 off the record.)

17 CHAIRMAN IGNATIUS: Ms.

Manzelli, it's your opportunity for redirect.

I don't know how much you have. If it's very short, I would recommend doing it with a -if you need a quick consultation, that would be fine. If it's going to be anything lengthier, we may need to take a break.

MS. MANZELLI: Well,

definitely not very short. I'm betting somewhere between 15 and 35 minutes. And I definitely do want a consultation.

CHAIRMAN IGNATIUS: All right.

I'll tell you 15 to 35 minutes isn't going to
go over well with me, because it's hard to
imagine that that's all within our very
narrow standards of what we allow on
redirect.

So why don't we take a break.

Let's take a lunch break. Over that time,
anything you can do to really focus your
questions and be certain that they are
appropriate as redirect, based on things that
have not already -- on things that emerged
during the cross-examination, as opposed to
things that you kind of wished you'd asked
beforehand and forgot to. Thank you. And
that goes to everyone. That wasn't -- that
sounded like a dig against you. I didn't
mean it that way. So we'll take a break
until 2:00. Thank you.

(Whereupon the lunch recess was taken, and this MORNING SESSION ONLY ended at
